Stochastische Lineare Programme Mit Kompensation Mathematical Systems In Economics 115:

Stochastische lineare Programme mit Kompensation Jürgen Böttcher,1989 Models for Planning Under Uncertainty

Programming Karl Frauendorfer,2012-12-06 Stochastic Programming offers models and methods for decision problems
where some of the data are uncertain These models have features and structural properties which are preferably exploited by
SP methods within the solution process This work contributes to the methodology for two stage models In these models the
objective function is given as an integral whose integrand depends on a random vector on its probability measure and on a
decision The main results of this work have been derived with the intention to ease these difficulties After investigating
duality relations for convex optimization problems with supply demand and prices being treated as parameters a stability
criterion is stated and proves subdifferentiability of the value function This criterion is employed for proving the existence of
bilinear functions which minorize majorize the integrand Additionally these minorants majorants support the integrand on
generalized barycenters of simplicial faces of specially shaped polytopes and amount to an approach which is denoted
barycentric approximation scheme **Stochastic Programming** Andras Prekopa,2014-01-15
