**Prehistory at Cambridge and Beyond** Grahame Clark, 1989-08-25 Grahame Clark's book examines the development of prehistoric archaeology at Cambridge and the achievements of its graduates placing this theme against the background of the growth of archaeology as an academic discipline worldwide. Prehistory in Cambridge began to be taught formally in 1920 and emerged as a full tripos soon after the Second World War. From the outset it focused on the aims and methods of archaeological research providing in addition for combinations of study options ranging from early prehistory to the archaeology of the major civilisations of the Old World and the protohistory of Northern Europe. The measure of its success is shown by the achievement of Cambridge graduates at home and overseas in both the study and the field. A significant outcome of their work has been the widespread recognition of archaeology as a subject of broad educational value not merely for undergraduates but for human beings the world over.

Encyclopedia of Prehistory Peter N. Peregrine, Melvin Ember, 2012-12-06 The Encyclopedia of Prehistory represents also defined by a somewhat different set of an attempt to provide basic information sociocultural characteristics than are eth on all archaeologically known cultures nological cultures. **The Lower to Middle Palaeolithic Transition in Northwestern Europe** Ann Van Baelen, 2017-10-17 A well preserved early Middle Palaeolithic site set against a wider northwestern European context. The shift from Lower to Middle Palaeolithic in northwestern Europe dated to around 300 000 250 000 years ago remains poorly understood and underexplored compared to more recent archaeological transitions. During this period stone tool technologies underwent significant changes but the limited number of known sites and the general low spatio temporal resolution of the archaeological record in many cases has impeded detailed behavioural inferences. Brickyard quarrying activities at Kesselt Op de Schans Limburg Belgium led to the discovery and excavation of a well preserved early Middle Palaeolithic level buried beneath a 10 m thick loess palaeosol.

sequence The present volume offers a comprehensive report on the site dated to around 280 000 years ago set against a wider northwestern European context An in depth study of the lithic assemblage including an extensive refitting analysis provides detailed information on the technological behaviour of prehistoric hominins in the Meuse basin during this crucial time period Contributors Jozef J Hus Royal Meteorological Institute of Belgium Frank Lehmkuhl RWTH Aachen University Erik P M Meijis ArcheoGeoLab Philipp Schulte RWTH Aachen University Ann Van Baelen KU Leuven and University of Cambridge Philip Van Peer KU Leuven Joerg Zens RWTH Aachen University

**The Middle Paleolithic Site of Combe-Capelle Bas (France)** Harold L. Dibble, Michel Lenoir, 1995-01-29 This report presents the new excavations at Combe Capelle Bas a Middle Paleolithic site in southern France The site is situated directly on a source of good quality flint and recent theories suggest that such a setting may have certain predictable effects on the lithic industries These effects and others relating to current models of raw material procurement and use are discussed This book will appeal to anyone interested in Paleolithic archaeology lithic analysis raw material use and site formation and taphonomy University Museum Monograph 91

**The Cambridge World Prehistory** Colin Renfrew, Paul Bahn, 2014-06-09 The Cambridge World Prehistory provides a systematic and authoritative examination of the prehistory of every region around the world from the early days of human origins in Africa two million years ago to the beginnings of written history which in some areas started only two centuries ago Written by a team of leading international scholars the volumes include both traditional topics and cutting edge approaches such as archaeolinguistics and molecular genetics and examine the essential questions of human development around the world The volumes are organised geographically exploring the evolution of hominins and their expansion from Africa as well as the formation of states and development in each region of different technologies such as seafaring metallurgy and food production The Cambridge World Prehistory reveals a rich and complex history of the world It will be an invaluable resource for any student or scholar of archaeology and related disciplines looking to research a particular topic tradition region or period within prehistory

African Foragers Sibel Barut Kusimba, 2003-01-21 Study of the development of foraging strategies in Africa from the Middle Stone Age to the present

**Stone Tools and Fossil Bones** Manuel Domínguez-Rodrigo, 2012-03-26 The stone tools and fossil bones from the earliest archaeological sites in Africa have been used over the past fifty years to create models that interpret how early hominins lived foraged behaved and communicated and how early and modern humans evolved In this book an international team of archaeologists and primatologists examines early Stone Age tools and bones and uses scientific methods to test alternative hypotheses that explain the archaeological record By focusing on both lithics and faunal records this volume presents the most holistic view to date of the archaeology of human origins

Perspectives on the Past Geoffrey A. Clark, 2017-11-15 Perspectives on the Past shows how knowledge of the past is contingent and is largely determined by the social and intellectual milieu in which those who study it have received their training In the original essays that comprise the volume field archaeologists discuss

their own biases and the effects these biases have on the way they conduct their research on hunter gatherers in the Mediterranean

**Soils Stones and Symbols Cultural Perceptions of the Mineral World** Nicole

Boivin, Owic, 2013-07-04 Ethnographic and archaeological records feature a rich body of data suggesting that understandings of the mineral world are in fact both culturally variable and highly diverse *Soils Stones and Symbols* highlights studies from the fields of anthropology archaeology and philosophy that demonstrate that not all individuals and societies view minerals as commodities to be exploited for economic gain or as passive objects of disembodied scientific enquiry In visiting such diverse contexts as contemporary India colonial period Australia and prehistoric Europe and the Americas the papers in this volume demonstrate that in pre industrial societies minerals are often symbolically meaningful ritually powerful and deeply interwoven into not just economic and material but also social cosmological mythical spiritual and philosophical aspects of life In addressing the theme of the mineral world this book is not only unique within the social and geo sciences but also at the forefront of recent attempts to demonstrate the importance of materiality to processes of human cognition and sociality It draws upon theoretical developments relating to meaning experience the body and material culture to demonstrate that studies of rock art landscapes architecture technology and resource use are all linked through the minerals that constantly surround us and are the focus of our never ending attempts to understand and transform them

**Southern Asia,**

**Australia, and the Search for Human Origins** Robin Dennell, Martin Porr, 2014-02-24 This is the first book to focus on the role of Southern Asia and Australia in our understanding of modern human origins and the expansion of *Homo sapiens* between East Africa and Australia before 30 000 years ago With contributions from leading experts that take into account the latest archaeological evidence from India and Southeast Asia this volume critically reviews current models of the timing and character of the spread of modern humans out of Africa It also demonstrates that the evidence from Australasia should receive much wider and more serious consideration in its own right if we want to understand how our species achieved its global distribution Critically examining the Out of Africa model this book emphasises the context and variability of the global evidence in the search for human origins

*New Perspectives on Old Stones* Stephen Lycett, Parth Chauhan, 2010-09-05

**A Global History of The Earlier**

**Palaeolithic** Mark J. White, 2022-10-10 This book tells the story of both the ancient humans who made handaxes and the thoughts and ideas of scholars who have spent their lives trying to understand them Beginning with the earliest known finds this volume provides a linear and thematic account of the history of the Old Stone Age or Palaeolithic period covering major discoveries interpretations and debates worldwide a story that takes us from the embers of the Great Fire of London to the beginning of the Covid 19 pandemic It offers a comprehensive and unique history of archaeological theory and interpretation seeking to explain how we know what we know about the deep past and how ideas about it have changed over time reflecting both scientific and societal change At its heart lies the quest for an answer to a most curious and sometimes beautiful tool ever made the handaxe While focused on the Earlier Palaeolithic period the book provides a readable account of how ideas about the prehistoric past generally were formed and altered showing how the wider discipline came to be dominated by a succession of different theoretical paradigms each seeking different answers from the same data set Serving a dual purpose as a historical narrative and as a reference source this book will be of interest to all students and researchers interested in deep human prehistory and evolution archaeological theory and the history of archaeology *Early Human Behaviour in Global Context* Ravi Korisettar, Michael D. Petraglia, 2003-09-02 Early Human Behaviour in a Global Context will be of use to students and professionals who are interested in prehistory Paleolithic archaeology and paleoanthropology Those interested in our ancestors and their place in the natural world will also benefit from the information presented in this book Chapters focus on the nature of archaeological evidence stone tool technology subsistence practices settlement distributions

**Tigers in Africa** Carmel Schrire, 2002 This text is a presentation of the diverse themes that constitute the past at the Southern tip of Africa Human and carnivore evolution colonial slavery and apartheid science and romance are all intermeshed to show how we create the past and also how we understand the present **The Human Career** Richard G. Klein, 2024-05-31 Since its publication in 1989 The Human Career has proved to be an indispensable tool in teaching human origins This substantially revised third edition retains Richard G Klein s innovative approach while showing how cumulative discoveries and analyses over the past ten years have significantly refined our knowledge of human evolution Klein chronicles the evolution of people from the earliest primates through the emergence of fully modern humans within the past 200 000 years His comprehensive treatment stresses recent advances in knowledge including for example ever more abundant evidence that fully modern humans originated in Africa and spread from there replacing the Neanderthals in Europe and equally archaic people in Asia With its coverage of both the fossil record and the archaeological record over the 2 5 million years for which both are available The Human Career demonstrates that human morphology and behavior evolved together Throughout the book Klein presents evidence for alternative points of view but does not hesitate to make his own position clear In addition to outlining the broad pattern of human evolution The Human Career details the kinds of data that support it For the third edition Klein has added numerous tables and a fresh citation system designed to enhance readability

especially for students He has also included more than fifty new illustrations to help lay readers grasp the fossils artifacts and other discoveries on which specialists rely With abundant references and hundreds of images charts and diagrams this new edition is unparalleled in its usefulness for teaching human evolution      *Archaeological Encounters* Margarita Díaz-Andreu, 2012-11-13 This book examines the relationship between British and Spanish archaeology in the light of international geographies of knowledge It looks at the practical aspects of the personal relationships established between British and Spanish prehistoric archaeologists from the 1920s to the 1970s Part I of the book sets the scene It provides some contextual information on the main events in the archaeology of both countries in the period under study It also introduces Professor Luis Pericot the archaeologist whose archive serves as the basis for much of what is discussed throughout the following chapters In Part II of the book an analysis of the correspondence held in the Pericot Archive the Fons Pericot in the Biblioteca de Catalunya is undertaken The examination of the letters exchanged between Spanish and British prehistorians in general and in particular between Luis Pericot and about a dozen major British scholars of his time allows the reconstruction of the nature of the relationships formed between them The analysis has been divided into three chapters corresponding to the three main towns where his correspondents lived for most of their academic careers London Cambridge and Oxford In Part III of the book the information obtained from the correspondence is then complemented and re examined considering three main aspects the production transmission and reception of knowledge This analysis puts together aspects discussed in Part I of the book with the data gathered from the letters in Part II as well as other information provided by publications including translations and reviews First of all an assessment is made as to whether the geographical context affected the way knowledge of prehistoric archaeology was produced Secondly the mechanisms and networks that allowed the international transmission of both ideas and practices linked to prehistoric archaeology are assessed A third aspect looked into is the reception of knowledge linking this with issues such as academic prestige and authority      **Lucy to Language** R. I. M. Dunbar, Clive Gamble, J. A. J. Gowlett, 2014-02 This volume readdresses the past contribution from archaeology towards the study of evolutionary issues and ties evolutionary psychology into the extensive historical data from the past allowing us to escape the confined timeframe of the comparatively recent human mind and explore the question of just what it is that makes us so different      **Short-Term Occupations in Paleolithic Archaeology** João Cascalheira, Andrea Picin, 2019-12-02 This edited book aims to provide a new perspective on the identification and interpretation of short term occupations in Paleolithic Archaeology The volume includes contributions with a particular focus on the definition and identification of short term occupations in Paleolithic contexts aiming to improve our current knowledge on the topic both methodologically and interpretatively The set of chapters coming from a broad spectrum of geographies and chronologies will contribute to the debate on the definition of short term occupations but also to a better understanding on how past hunter gatherers communities adapted and moved in different environmental contexts across time The in depth examinations of short term

occupations in different chronologies and environments will shed light on an aspect of the behavioral trajectories of the human species in the management of the territory

**Culture Evolves** Andrew Whiten, 2012 Culture broadly defined as all we learn from others that endures for long enough to generate customs and traditions shapes vast swathes of our lives and has allowed the human species to dominate the planet in an evolutionarily unique way Culture and cultural evolution are uniquely significant phenomena in evolutionary biology they are products of biological evolution yet they supplement genetic transmission with social transmission thus achieving a certain independence from natural selection However cultural evolution nevertheless expresses key Darwinian processes itself and also interacts with genetic evolution Just how culture fits into the grander framework of evolution is a big issue though yet one that has received relatively little scientific attention compared to for example genetic evolution Our capacity for culture appears so distinctive among animals that it is often thought to separate we cultural beings from the rest of nature and the Darwinian forces that shape it Culture Evolves presents a different view arising from the recent discoveries of a diverse range of disciplines that focus on evolutionary continuities First recent studies reveal that learning from others and the transmission of traditions are more widespread and significant across the animal kingdom than earlier recognized helping us understand the evolutionary roots of culture Second archaeological discoveries have pushed back the origins of human culture to much more ancient times than traditionally thought These developments together suggest important continuities between animal and human culture A third new array of discoveries concerns the later diversification of human cultures where the operations of Darwinian like cultural evolutionary processes are increasingly identified Finally surprising discoveries have been made about the imprint of cultural evolution in children's predisposition to acquire culture The result of a major interdisciplinary meeting held by the Royal Society and the British Academy this book presents the work of leading experts from the fields of ethology behavioural ecology primatology comparative psychology archaeology anthropology evolutionary biology and developmental psychology
