Neolithic of Mainland Scotland Kenneth Brophy, 2016-03-16 Archaeologists show us how the Neolithic human lived in mainland Scotland What was life like in Scotland between 4000 and 2000BC Where were people living How did they treat their dead Why did they spend so much time building extravagant ritual monuments What was special about the relationship people had with trees and holes in the ground What can we say about how people lived in the Neolithic and early Bronze Age of mainland Scotland where much of the evidence we have lies beneath the ploughsoil or survives as slumped banks and ditches or ruinous megaliths Each contribution to this volume presents fresh research and radical new interpretations of the pits postholes ditches rubbish dumps human remains and broken potsherds left behind by our Neolithic forebears From the APF What was life like in Scotland between 4000 and 2000BC Where were people living How did they treat their dead Why did they spend so much time building extravagant ritual monuments What was special about the relationship people had with trees Why was so much time and effort spent digging holes and filling them back up again What can we say about how people lived in the Neolithic and early Bronze Age of mainland Scotland where much of the evidence we have lies beneath the plough soil or survives as slumped banks and filled ditches or ruinous megaliths This book will draw together leading experts

and young researchers to present fresh research and outline radical new interpretations of the pits postholes ditches rubbish dumps human remains and broken potsherds left behind by our Neolithic forebears Much of this evidence has come to light in the past few decades putting the emphasis very much lowland mainland Scotland as opposed to more famous Orcadian Neolithic sites Inspired by the work of Gordon Barclay the leading scholars of Scotland s Neolithic in the last 40 years the chapters in this book offer a wide ranging analysis of the evidence we have for the first farmers in Scotland *The Old Stones of the South, Midlands & East of England* Andy Burnham,2019-01-01 This ebook covers the Neolithic and Bronze Age remains of southern and central England from Wiltshire to the west and Derbyshire in the north over to Kent and Essex in the east yes there are megalithic sites in Essex read on to find out where Wiltshire needs no introduction but don t forget the lesser known sites there such as Merlin s Mound which was recently confirmed as a prehistoric sibling to Silbury Hill Unlike most books on megalithic sites we haven t overlooked the southeast of England where there are an unexpected number of beautiful long and round barrows including one with its own protected view of St Paul s Cathedral And if you want your fill of megalithic sites there is no need to travel any further afield than Derbyshire where there are many lovely sites to visit from the massive henge of Arbor Low to the charming little woodland circle of Doll Tor to the fascinating complex of Barbrook with one of the Peak District s best preserved stone circles *The Old Stones of the South Midlands East of England* is part of a series covering the megalithic and other prehistoric sites of Britain and Ireland The series is published together as *The Old Stones A Field Guide to the Megalithic Sites of Britain and Ireland* available as a book and an ebook *The Druids and King Arthur* Robin Melrose,2014-01-10 An exploration into the beliefs and origins of the Druids this book examines the role the Druids may have played in the story of King Arthur and the founding of Britain It explains how the Druids originated in eastern Europe around 850 B C bringing to early Britain a cult of an underworld deity a belief in reincarnation and a keen interest in astronomy The work concludes that Arthur was originally a Druid cult figure and that the descendants of the Druids may have founded the Anglo Saxon kingdom of Wessex The research draws upon a number of sources including medieval Welsh tales the archaeology of Stonehenge s Salisbury Plain the legends surrounding the founding of Britain the cult of the Thracian Horseman the oracle of Dodona popular Arthurian mythology and the basic principles of prehistoric astronomy *Moving on in Neolithic Studies* Jim Leary,Thomas Kador,2016-02-29 Mobility is a fundamental facet of being human and should be central to archaeology Yet mobility itself and the role it plays in the production of social life is rarely considered as a subject in its own right This is particularly so with discussions of the Neolithic people where mobility is often framed as being somewhere between a sedentary existence and nomadic movements This latest collection of papers from the Neolithic Studies Group seminars examines the importance and complexities of movement and mobility whether on land or water in the Neolithic period It uses movement in its widest sense ranging from everyday mobilities the routines and rhythms of daily life to proscribed mobility such as movement in and around monuments and occasional and large scale movements

and migrations around the continent and across seas Papers are roughly grouped and focus on mobility and the landscape monuments and mobility travelling by water and materials and mobility Through these themes the volume considers the movement of people ideas animals objects and information and uses a wide range of archaeological evidence from isotope analysis artefact studies lithic scatters and assemblage diversity **The History of Astronomy** Richard Pearson, *The Oxford Handbook of the European Bronze Age* Harry Fokkens, Anthony Harding, 2013-06-27 The Oxford Handbook of the European Bronze Age is a wide ranging survey of a crucial period in prehistory during which many social economic and technological changes took place Written by expert specialists in the field the book provides coverage both of the themes that characterize the period and of the specific developments that took place in the various countries of Europe After an introduction and a discussion of chronology successive chapters deal with settlement studies burial analysis hoards and hoarding monumentality rock art cosmology gender and trade as well as a series of articles on specific technologies and crafts such as transport metals glass salt textiles and weighing The second half of the book covers each country in turn From Ireland to Russia Scandinavia to Sicily every area is considered and up to date information on important recent finds is discussed in detail The book is the first to consider the whole of the European Bronze Age in both geographical and thematic terms and will be the standard book on the subject for the foreseeable future The Memory Code Lynne Kelly, 2017-02-07 In ancient pre literate cultures across the globe tribal elders had encyclopedic memories They could name all the animals and plants across a landscape identify the stars in the sky and recite the history of their people Yet today most of us struggle to memorize more than a short poem Using traditional Aboriginal Australian song lines as a starting point Dr Lynne Kelly has since identified the powerful memory technique used by our ancestors and indigenous people around the world In turn she has then discovered that this ancient memory technique is the secret purpose behind the great prehistoric monuments like Stonehenge which have puzzled archaeologists for so long The henges across northern Europe the elaborate stone houses of New Mexico huge animal shapes in Peru the statues of Easter Island these all serve as the most effective memory system ever invented by humans They allowed people in non literate cultures to memorize the vast amounts of information they needed to survive But how For the first time Dr Kelly unlocks the secret of these monuments and their uses as memory places in her fascinating book Additionally The Memory Code also explains how we can use this ancient mnemonic technique to train our minds in the tradition of our forbearers *Reading Between the Lines* Kenneth Brophy, 2015-10-05 Reading Between the Lines The Neolithic Cursus Monuments of Scotland is the first systematic analysis of Scotland s cursus monuments and is written by one of the foremost scholars of the Neolithic in Scotland Drawing on fifteen years of experience of cropmark interpretation as well as his involvement in several excavations of cursus monuments and contemporary sites Kenneth Brophy uncovers some of the secrets of the Neolithic landscape While outlining the physical characteristics of the cursus this book also addresses the limitations of this kind of typological description when applied to monuments which

varied so remarkably in terms of materiality and size Moving beyond a morphological account Brophy considers what can be said of this diverse group of sites and how they were actually built and used in prehistory in light of several decades of aerial reconnaissance and excavation in Scotland Through a close study of the differences as well as the similarities between these structures this book offers a nuanced account of cursus monuments finally allowing this important monument type to be better understood and placed alongside others of the period Offering exciting new ways of thinking about these enigmatic yet important monuments Reading Between the Lines The Neolithic Cursus Monuments of Scotland is an essential resource for students and specialists in British prehistory providing an introduction to the Early Neolithic archaeology of lowland Scotland as well as a meditation on broader aspects of monumentality and architecture **An Archaeological History of Britain**
