Stoneware Bottles From Bellarmine To Ginger Beers 1500-1949:

The World of British Stoneware Frank L. Wood, 2014-03-28 For nearly three hundred years from the late seventeenth to the middle twentieth century stoneware was a major part of British ceramic output. This book concentrates on that particular area of ceramics and covers the history and development of stoneware in all its many variations. Those variations range widely from brown salt-glazed tavern wares to such refined wares as Jasper Castleford ware and the later art wares to name a few. A specific aspect of the book is to give anyone interested in ceramics and collectors in particular very comprehensive information on the manufacture of the different types of stoneware from the preparation of the clay or body through the forming, decorating and glazing techniques to the firing. Such is likely to provide a greater appreciation and understanding of stoneware in its many variations. There are separate chapters on the later art wares and their makers, bottle wares and marks and identification as well as an appendix listing manufacturers, a comprehensive glossary and a list of museums. The illustrations cover a wide range of types. Many books on ceramics include information on stoneware but this in-depth book benefits from the experience of a writer who is both a collector and ex-potter.

The Importance of British Material Culture to Historical Archaeologies of the Nineteenth Century Alasdair Brooks, 2016 Britain was the industrial and political powerhouse of the nineteenth century, the birthplace of the Industrial Revolution and the center of the largest empire of the time. With its broad imperial reach and even broader indirect influence, Britain had a major impact on nineteenth-century material culture worldwide. Because British manufactured goods were widespread in British colonies and beyond, a more nuanced understanding of those goods can enhance the archaeological study of the people who used them far beyond Britain's shores. However, until recently, archaeologists have given relatively little attention to such goods in Britain itself, thereby missing what is often revealing and useful contextual information for historical archaeologists working in countries where British goods were consumed while also leaving significant portions of Britain's own archaeological record poorly understood. *The Importance of British Material Culture to Historical Archaeologies of the Nineteenth Century* helps fill these gaps through case studies demonstrating the importance and meaning of mass-produced material culture in Britain from the birth of the Industrial Revolution mid-1700s to early World War II. By examining many disparate items such as ceramics made for export, various goods related to food culture, Scottish land documents and artifacts of death, these studies enrich both an understanding of Britain itself and the many places it influenced during the height of its international power.

Antique Glass Bottles Willy van den Bossche, 2001 A major and comprehensive book on the history and evolution of antique glass bottles between 1500 and 1850. Lavishly illustrated with new specially commissioned colour photography, it also includes the most comprehensive worldwide bibliography on glass bottles.

The Doulton Stoneware Pothouse in Lambeth
Kieron Tyler, 2005 Excavations at 9 Albert Embankment in the London Borough of Lambeth uncovered important new evidence for one of the lesser-known pothouses of the Doulton company. This small pottery factory operated from the 1870s

to 1926 and its main products were stoneware bottles essentially the containers for products such as ginger beer and ink. While these types of stoneware vessel are a common find on archaeological sites their actual manufacturing process has rarely been studied. The remains of five downdraught pottery kilns were recorded in the MoLAS excavations of 2001. Two of the kilns formed part of the first pothouse of the 1870s and there were three more kilns from the enlarged pothouse of the 1890s. At their demolition the kilns were backfilled with a mixture of whole pots, kiln furniture and refractory bricks. It is this significant body of material that has enabled a study of both the products and the manufacturing process. The book sets the pottery in its historical context and explores the links between Henry Doulton the proprietor and other Victorian businessmen. The publication shows how Doulton exploited Lambeth in pursuit of the mass market.

The Materiality of Individuality Carolyn L. White, 2009-08-15. Generally individuals in history are known for a particular reason they somehow influenced history. Very little is known about the ordinary person who lived in the past. But historical archaeologists through their interpretation of the material culture and historic record can study the past on an individual level. This brings archaeological interpretation from a micro to a macro level as opposed to the traditional level of society to community to individual interpretation. The cases presented in this volume engage material culture that is owned or used by a single person and is thus associated with an individual at some point in its use-life. The volume takes bodkins, shoes, beads, cloth, religious items, grave goods as well as subassemblages from well defined contexts from New England, the Chesapeake, New Orleans, Hawaii, Spanish colonial America and London in the pursuit of the individual and the textured interpretation. This analytical scale provides. This volume promises to present innovative approaches to a host of archaeological materials drawing widely on the range of archaeological research for the historical period today. Capitalizing on several topics and research threads with great currency such as the examination of material culture and interest in various and intersecting lines of identity construction as well as presenting an international and multiregional approach to these topics, this volume will be of interest to archaeologists, anthropologists, material culture scholars and social historians interested in a wide variety of time periods and subfields.

Ginger Beer Bottles Ethleen Lastovica, 2000. **John Dwight's Fulham Pottery** Chris M. Green, 1999. John Dwight established the first commercially successful stoneware pottery in England at Fulham in 1672. This book gives the results of the excavations showing that the site layout remained largely unchanged until the 1980s.

English Pottery 1620-1840 Robin Hildyard, 2005-08. Based around the matchless collections of British ceramics in the Victoria and Albert Museum which curators began to assemble as early as the 1840s, this book charts the story of their development from the simple slipware drinking vessel of the seventeenth century to the sophisticated enamelled and transfer printed tableware of the early 1800s. The narrative takes us through successive changes of taste and manners as British potters assimilated and adapted new and often disparate influences from Europe and the Far East. Ceramics ubiquitous, disposable and quintessentially domestic tended to reflect social changes quicker than other branches of the applied arts for example new

fashions in dining and the taking of tea were responsible for major aspects of design and decoration while the rapid rise of the Staffordshire figure enabled it to become a vehicle for satire religion or the commemoration of wildly popular but ephemeral events such as boxing matches and visits from touring menageries Keeping carefully chosen pieces illustrated at the forefront of his discussion Robin Hildyard treats the subject variously by material form decoration or by broader theme sometimes cutting across traditional boundaries in order to look behind established myths and the often misleading evidence of what has survived The methods and history of manufacture are fully explored from the workshop of the independent village potter to the industrialized nineteenth century factory struggling with the stormy beginnings of trade unionism The complex trade in ceramics both at home and abroad and the transition from utilitarian household object to cherished item in collector s cabinet is also examined along with the symbiotic relationship between collector and museum This volume filling the gap in current ceramic literature between narrower scholarly studies and the opulent catalogues of private collections presents an expert and yet highly accessible view of a particularly rich seam of British material culture guiding us from familiar ground into wider and sometimes uncharted territory

BOOK JACKET *Aspects of Medieval and Later Southwark* Heather Knight, 2002 This short monograph presents evidence related to medieval and later Southwark uncovered at London Bridge Station during construction of the Jubilee Line Extension Early medieval Southwark was at risk from flooding and evidence of the environment land reclamation embankments and drainage ditches has been found The Domesday Book provides an early record of the settlement and suggests that a Monesterium stood on the site of the present day Southwark Cathedral It was occupied by the Priory of St Mary Overie in the medieval period when the bishops of Winchester had a palace in its grounds St Thomas s Hospital was founded as part of the priory in 1106 and the settlement expanded around the bridgehead and Borough High Street The hospital was rebuilt in the 13th century on the site of London Bridge Station to the east where structural remains and associated burials were recorded By the 16th century Borough High Street was known as Long Southwark and scattered structural remains of the inns alehouses and tenements which flanked it are described Knight also discusses evidence for the Prior of Lewes townhouse and Southwark s increasingly industrial character as trades relocated from the City of London The volume includes a gazetteer of the 16 areas investigated

Old and New Worlds Geoff Egan, Ronald L. Michael, 1999 Even before the Mayflower sailed across the Atlantic in 1620 the material and cultural lives of the Old and New worlds were inextricably linked This book reflects the techniques which archaeologists have used over the last 30 years to try and unravel from a mass of material evidence the lives of early Americans and their English contemporaries This book discusses the unique methodologies which historical archaeologists in both Britain and the US have developed to study early modern and industrial societies and new theoretical approaches focusing on ethnicity and domestic space and new practical techniques using environmental as well as artifactual evidence The book contains forty two

essays arranged thematically Five are concerned with the use and interpretation of evidence thirteen describe settlements and their communities on both sides of the Atlantic four are on nautical and military operations thirteen are concerned with artefacts and pottery and their manufacture and distribution and seven use environmental evidence to throw new light on the human populations and the plant and animal worlds of the time *Stoneware Bottles* Derek Askey, 1981
