What's Stopping You? Robert Kelsey, 2011-05-12

This personal, witty, and insightful book teaches us about the fears that drive failure and the self-awareness that can help us navigate it. The great point about this book is that it is both philosophical with regards to the nature of fear and its impact on achievement and practical. For those that may be paralysed by a fear of failure, it offers a way through.

Luke Johnson, serial entrepreneur, Financial Times columnist, and Chairman of the RSA. This powerful, insightful book shows you how to unlock your unconscious brakes and step on the acceleration of your true potential.

Brian Tracy, author of *Maximum Achievement*. Kelsey offers a successful and eloquent analysis of fear of failure as a mass condition in the modern world and one we ignore at our peril.

Donald Kirkpatrick, psychoanalyst and a founder of the London Association for Counselling and Psychoanalysis. Do fear and doubt hinder your progress in life? Are you paralyzed at key moments by your insecurities? Millions of smart people are held back from achieving their potential by a fear of failure. Many of them don't even realize that this recognized condition is limiting their progress.

What's Stopping You? offers no quick fix solution. Why? Because the key to

unlocking your potential for success lies in understanding the root causes of the fears and insecurities that hold you back and in accepting who you are rather than trying to become someone you are not. Based on extensive research, recognized science, and stark reality, this book will help you navigate the barriers that hold you back at work with people and in life. Robert Kelsey has combined thorough research, careful thought, and the lessons of his own experience to produce a valuable, original, and eminently readable book. I can strongly recommend it to anyone whose progress has been impeded by fear of failure. John Caunt, author of *Boost Your Self Esteem Confidence*, is the ultimate secret weapon of any successful entrepreneur. If Robert's book can help you find yours, then it will be worth its weight in gold. Rachel Bridge, author of *How I Made It* Educational Technology, 1983-07

Storytelling with Data in Healthcare Kevin Masick, Eric Bouillon, 2020-11-29 With the constant evolution of change in healthcare from both a technology and governmental perspective, it is imperative to take a step back and view the big picture. Relying on hunches or beliefs is no longer sustainable, so avoid jumping to conclusions and making decisions without thoroughly understanding the statistics being analyzed. The triple aim of statistics is a conceptual model laying the foundation for improving healthcare outcomes through statistics. This foundation is: know your numbers, develop behavioral interventions, and set goals to drive change. With the availability of electronic data sources, the quantity and quality of data have grown exponentially to the point of information overload. Translating all this data into words that tell a meaningful story is overwhelming. This book takes the reader on a journey that navigates through this data to tell a story that everyone can understand and use to drive improvement. Readers will learn to tell a narrative story based on data to develop creative, innovative, and effective solutions to improve processes and outcomes utilizing the authors' tools. Topics include mortality and readmission, patient experience, patient safety, survey, governmental initiatives, CMS Star Rating, and Hospital Compare. *Storytelling with Data in Healthcare* combines methodology and statistics in the same course material, making it coherent and easier to put into practice. It uses storytelling as a tool for knowledge acquisition and retention and will be valuable for courses in nursing schools, medical schools, pharmacy schools, or any healthcare profession that has a research design or statistics course offered to students. The book will be of interest to researchers, academics, healthcare professionals, and students in the fields of healthcare management and operations, as well as statistics and data visualization.
