Sabnis, 2011-10-19 With superior fire resistance strength and a long service life concrete is the most widely used construction material in the world A sustainable material concrete is also easily and affordably reused and rehabilitated The first book to provide an overview of sustainability and concrete Green Building with Concrete Sustainable Design and Construction *Urban and Highway Stormwater Pollution* Thorkild Hvitved-Jacobsen, Jes Vollertsen, Asbjorn Haaning Nielsen, 2010-03-25 As the world population grows already burgeoning cities are becoming taxed in every conceivable way One topic that receives few headlines but significantly impacts an area's quality of health and economic development is the challenge to maintain sustainable urban drainage SUD Poor drainage can hamper transportation add to problems of pollution Environmental Engineering James R. Mihelcic, Julie B. Zimmerman, 2021-07-14 Focuses on modern sustainable design concepts processes and practices Applies foundational principles of physics chemistry biology and sustainability to creating solutions for managing and mitigating environmental problems Places emphasis on global issues such as pollution prevention and resource recovery Explains energy and mass balance concepts using numerous clear and engaging example problems Provides a coherent and unified

approach to life cycle assessment and thinking development Features effective pedagogical tools including numerical assessment and design problems research activities discussion topics and extensive online learning resources Includes extensive teaching materials for instructors such as active learning exercises homework assignments classroom activities and a solutions manual

*Urban Stormwater Management in Developing Countries* J. Parkinson, O. Mark, 2005-09-30 The purpose of this book is to disseminate contemporary knowledge and practical experiences concerning problems and solutions related to urban hydrology and drainage Although the main focus is on developing countries the book draws from experiences in many other parts of the world Based upon numerous practical examples and case studies the book provides information to assist in the management planning and engineering design processes Urban Stormwater Management in Developing Countries covers a wide range of methods and approaches to improve the understanding and ability of local stakeholders to solve stormwater problems within the framework of integrated urban water management As well as structural interventions the book describes various non structural approaches for flood mitigation and pollution control This book encourages the reader to adopt an integrated approach towards stormwater management and considers the importance of institutional arrangements participation of local stakeholders in planning as well as aspects of financing and cost recovery This comprehensive and topical book Addresses the broad range of issues related to urban stormwater management with a specific focus on developing countries Covers the main aspects of planning design operation and maintenance of urban drainage systems as well as socio economic and institutional issues related to urban stormwater management Presents structural and non structural approaches for flood mitigation and pollution control within an integrated water resource management framework Provides extensive examples and case studies of best practice Contents Urbanisation and urban hydrology Impacts of flooding on society Integrated framework for stormwater management Institutional structures and policies Planning for urban stormwater management Approaches to urban drainage system design Ecological approaches to urban drainage system design Applications of computer models Operational performance and maintenance Flood mitigation and response strategies Participation and partnerships Economics and financing Full Contents List 27KB

*Water Ethics* Neelke Doorn, 2019-10-25 While the interdependence of the different aspects of water security and the relevance of ethical and distributive aspects is acknowledged in both policy circles and academia a comprehensive introduction to water ethics is still missing This book aims to fill that gap by exploring the common thread that follows from three current interrelated debates the allocation of water resources the human right to water and the commodification and privatisation of water services These questions create a plea for alternatives to the predominantly consequentialist approach to dealing with water issues The author explores the normative and ethical aspects of flood and water related risks and looks at the topic of responsibility who should be responsible for correcting inequities or taking remedial action in the case of pollution These and other questions to be linked to ongoing discussion in other disciplines within philosophy such as environmental ethics climate

ethics the ethics of technology and climate justice making this text important across a wide range of courses for upper undergraduate and graduate students

*Water Quality Concepts, Sampling, and Analyses* Yuncong Li, Kati Migliaccio, 2010-10-21

As water quality becomes a leading concern for people and ecosystems worldwide it must be properly assessed in order to protect water resources for current and future generations

Water Quality Concepts Sampling and Analyses supplies practical information for planning conducting or evaluating water quality monitoring programs

It presents the *Impounded Water Bodies Modelling and Simulation* Salisu Dan'azumi, Supiah Shamsudin, 2014-05-02

This book enhances knowledge on Impounded Water Bodies IWB systems of the interested parties

They include academicians scholars scientist researchers engineers undergraduate and postgraduate students

Specifically this book is valuable for everyone involved in water hydrology environment civil engineering and other related disciplines

This book emphasized modelling and simulation of IWB particularly Reservoir and Detention Pond in relation to the two major hydrological problems Flood and Water Pollution

The knowledge presented is useful for hydrological systems real phenomenon replication and prediction

This book also provides IWB general overview in terms of the preliminary and state of the art analysis which may trigger the interest for further research and investigations

The IWB related factors were integrated to provide the quantitative framework alternative approaches and valuable outcomes that lead to worthy policy establishment

This book covers topic related to nutrient phosphorus loadings estimation using the new version of Event Based Stochastic Model in reservoir systems

The detention pond systems modelling using Analytical Probabilistic Models APM and the optimization of detention time using Particle Swarm Optimization PSO are elaborated

It is hoped that the book provides useful knowledge in pursuit of the IWB sustainable development

Dr Supiah Shamsudin is an Associate Professor in Water Resources and Hydrology at the Razak School of Engineering and Advanced Technology Universiti Teknologi Malaysia Kuala Lumpur Malaysia

She obtained Bachelor of Science Civil Engineering from University of Miami USA and Master of Science Hydrology and Water resources from University of Nebraska Lincoln USA

She later obtained Doctor of Philosophy PhD in Civil Engineering from Universiti Teknologi Malaysia in 2003

Her main specialization is Impounded Water Bodies Engineering and Management

Her research interest include intelligent detention pond design watershed and reservoir management under uncertain environment environmental hydrology reservoir eutrophication fuzzy and risk related approaches and multicriteria decision support for water resources systems

She had extensive involvements in international peer reviewed indexed journal publications and presented at many national and international conferences

Dr Salisu Danazumi is currently a Senior Lecturer in the Department of Civil Engineering Bayero University Kano Nigeria

He holds a Bachelors degree Civil Engineering and Masters degree Water Resources and Environmental Engineering from Bayero

University Kano Nigeria in 1998 and 2006 respectively He obtained a PhD degree in Hydrology from Universiti Teknologi Malaysia in 2012 His research interest include multi objective optimization of water resource systems using particle swarm optimization risk and uncertainty analysis and surface water quality modelling He has authored and co authored many papers in international peer reviewed journals and conferences

**Sponge Cities: Emerging Approaches, Challenges and Opportunities** Chris Zevenbergen,Dafang Fu,Assela Pathirana,2018-10-18 This book is a printed edition of the Special Issue Sponge Cities Emerging Approaches Challenges and Opportunities that was published in *Water Pollution*,

Approaches to Water Sensitive Urban Design Ashok Sharma,Ted Gardner,Don Begbie,2018-10-03 Approaches to Water Sensitive Urban Design Potential Design Ecological Health Economics Policies and Community Perceptions covers all aspects on the implementation of sustainable storm water systems for urban and suburban areas whether they are labeled as WSUD Low Impact Development LID Green Infrastructure GI Sustainable Urban Drainage Systems SUDS or the Sponge City Concept These systems and approaches are becoming an integral part of developing water sensitive cities as they are considered very capable solutions in addressing issues relating to urbanization climate change and heat island impacts in dealing with storm water issues The book is based on research conducted in Australia and around the world bringing in perspectives in an ecosystems approach a water quality approach and a sewer based approach to stormwater all of which are uniquely covered in this single resource Presents a holistic examination of the current knowledge on WSUD and storm water including water quality hydrology social impacts economic impacts ecosystem health and implementation guidelines Includes additional global approaches to WSUD including SUDS LID GI and the Sponge City Concept Covers the different perspectives from Australia ecosystem based the USA water quality based and Europe sewer based Addresses storm water management during the civil construction stage when much of the ecological damage can be done *Environmental Health Perspectives*,2001 Advances in Watershed Science and Assessment Tamim Younos,Tammy E. Parece,2015-01-31 This volume offers concepts methods and case studies of innovative and evolving technologies in the area of watershed assessment Topics discussed include 1 Development and applications of geospatial satellite imagery and remote sensing technologies for land monitoring 2 Development and applications of satellite imagery for monitoring inland water quality 3 Development and applications of water sensor technologies for real time monitoring of water quantity and quality and 4 Advances in biological monitoring and microbial source tracking technologies This book will be of interest to graduate students and researchers involved in watershed science and environmental studies Equally it will serve as a valuable guide to experts in government agencies who are concerned with water availability and water quality issues and engineers and other professionals involved in the design of land and water monitoring systems *Environmental Water* V.K. Gupta,Imran Ali,2012-11-29 The world is facing a drinking water crisis Besides continuous population growth uneven distribution of water resources and periodic droughts have forced scientists to search for new and effective water treatment remediation and

recycling technologies Therefore there is a great need for the development of suitable inexpensive and rapid wastewater treatment and reuse or conservation methods This title discusses different types of wastewater treatment remediation and recycling techniques like adsorption membrane filtration and reverse osmosis It also provides guidance for the selection of the appropriate technologies or their combinations for specific applications so that one can select the exact and accurate technology without any problem The book comprises detailed discussion on the application of various technologies for water treatment remediation and recycling technologies and provides an update on the development in water treatment detailed analysis of their features and economic analysis bridging the current existing information gap Each chapter is also documented by references and updated citations Provides guidance for the selection of the appropriate technologies to industrialists and government authorities for the selection of exact inexpensive technologies for specific problem solving Discusses the developments of inexpensive and rapid wastewater treatment remediation and recycling Gives information on the application of analytical techniques such as GC LC IR and XRF for analysing and measuring water Provides an updated development in water treatment technologies detailed analysis of their features and economic analysis enabling to choose a problem specific solution Completely updates the current knowledge in this field bridging the current existing information gap

**Introduction to Water Engineering, Hydrology, and Irrigation** Mohammad Albaji, 2022-06-14 This book is designed as an undergraduate text for water and environmental engineering courses and as preliminary reading for postgraduate courses in water and environmental engineering including introductory coverage of irrigation and drainage water resources hydrology hydraulic structures and more The text and exercises have been classroom tested by undergraduate water and environmental engineering students and are augmented by material prepared for extramural short courses It covers basic concepts of agricultural irrigation and drainage including planning and design surface intakes economics environmental impacts wetlands and legal issues Features Numerous illustrations throughout to clarify the concepts presented Examines and compares the advantages and disadvantages of several methods of irrigation practice Explains the integral components including pumps filters piping valves and more Considers fertilizer application and nutrient management This comprehensive and well illustrated book will be of great interest to students professionals and researchers involved with all aspects of water engineering hydrology and irrigation
