**Telling Our Own Stories** Shetler, 2021-10-11 In this collection of ethnic group histories written by authors from the Mara Region of Tanzania local people tell their stories as a way to inspire development that builds on the strengths of the past It combines histories from the small but closely related ethnic groups of Ikizu Sizaki Ikoma Ngoreme Nata Ishenyi and Tatoga in South Mara east of Lake Victoria and west of Serengeti National Park Many of the authors compiled their stories by meeting with groups of elders They were concerned to preserve history for the next generation who had not taken the time to learn the stories orally The stories were written in Swahili and translated into English with annotations and an introduction so that readers not familiar with this region might also share in the experience It also includes transcriptions of oral interviews with some of the same stories to get a sense of the ongoing conversations about the past This collection makes local history told in a local idiom accessible to students of African history interested in social memory and the creation of ethnicity

*Tell Our Story* Julie Reid, Dale T. McKinley, 2020-05-02 Focusing on three South African communities the authors dismiss the idea that some groups are voiceless arguing that they are being deliberately ignored by dominant news media The dominant news media are often accused of reflecting an elite bias privileging and foregrounding the interests of a small segment of society while ignoring the narratives of the majority The authors of *Tell Our Story* investigate this problem and offer a hands on demonstration of listening journalism and research in practice In the process they dismiss the idea that some groups are voiceless arguing that what is often described in such terms is mostly a matter of those groups being deliberately ignored Focusing their attention on three very different South African communities they delve into the life and struggle narratives of each exposing the divide between the stories told by the people who actually live in the communities and the way in which those stories have been understood and shaped by the media The three communities are those living in the Glebelands hostel complex in Durban where over 100 residents have been killed in politically motivated violence in the past few years the Xolobeni community on the Wild Coast which has been resisting the building of a new toll road and a dune mining venture and Thembelihle a settlement south west of Johannesburg that has been resisting removal for many years The book concludes with a set of practical guidelines for journalists on the practice of listening journalism

**The Handover** David Runciman, 2023-11-14 Witty and refined Runciman's point is that the alliance between even a democratic government and a selfish AI could derail civilization Gideon Lewis Kraus New Yorker An eminent political thinker uses our history with states and corporations artificial agents to which we have granted immense power to predict how AI will remake society Countless books news reports and opinion pieces have announced the impending arrival of artificial intelligence with most claiming that it will upend our world revolutionizing not just work but society overall Yet according to political philosopher and historian David Runciman we've actually been living with a version of AI for 300 years because states and corporations are robots too In *The Handover* Runciman explains our current situation through the history of these artificial agents we created to rescue us from our all too human limitations and demonstrates what this radical new view of our recent past means for our collective future From the United States and the United Kingdom to the East India Company Standard Oil Facebook and Alibaba states and corporations have gradually and then much more rapidly taken over the planet They have helped to conquer poverty and eliminate disease but also unleashed global wars and environmental degradation As Runciman demonstrates states and corporations are the ultimate decision making machines defined by their ability to make their own choices and crucially to sustain the consequences of what has been chosen And if the rapid spread of the modern state and corporation has already transformed the conditions of human existence new AI technology promises the same But what happens when AI interacts with other kinds of artificial agents the inhuman kind represented by states and corporations Runciman argues that the twenty first century will be defined by increasingly intense battles between state and corporate power for the fruits of the AI revolution In the end it is not our own human relationship with AI that will determine our future Rather humanity's fate will be shaped by the interactions among states corporations and thinking machines With clarity and verve *The Handover* presents a brilliantly original history of the last three centuries and a new understanding of the immense challenges we now face
