your child's growth and development *Understand Your Temperament!* Gilbert Childs, 2013-05-17 How can we better understand ourselves and others? The classical concept of the four temperaments—the four personality types characterized as the fiery choleric, the airy sanguine, the watery phlegmatic, and the earthy melancholic—has been revered by many significant thinkers over the ages. In a refreshing treatment, Dr. Childs demonstrates how this ancient doctrine remains relevant to the present day. He shows us how we can recognize the temperaments in our fellow human beings as well as in ourselves and how to understand their workings. A comprehension of their influence can boost personal development as well as help improve interpersonal relationships. Conversational in tone and easily digestible, this book features fascinating discussions of the relationships between adults of various temperaments. Childs reviews matters of compatibility in partnership, family, and workplace situations, liberally spicing his commentary with amusing examples of likely scenarios. He investigates the origins and manifestations of the temperaments in both their psychological and physiological aspects. There is also a section on the temperaments of children with helpful and practical advice on dealing with individual issues. DR GILBERT CHILDS attended the Steiner teacher training course at Michael Hall after war service. He later studied at four universities, his doctoral thesis being entitled *Steiner Education as Historical Necessity*. After teaching at State and Steiner schools, he spent twenty years as a tutor in a further education college for severely physically disabled students. He is in retirement, a full-time author, and keen gardener. His published works include *Your Reincarnating Child* and *Truth, Beauty, and Goodness: The Temperament Perspective*. Jan Kristal, 2005 *The Temperament Perspective* is a cross-disciplinary practical resource for professionals to help them understand and support children with different behavioral styles. The book explains how temperament traits combine to produce behavior and how environment, parenting style, and learning relate to temperament and behavior. Based on the author's research and work on more than 600 clinical cases at The Temperament Learning Center at Kaiser Permanente, the book discusses temperament-related behavior problems that occur at different ages from infancy through middle childhood and in various settings: home, school, child care, health care, and therapy. The book provides specific strategies and techniques to address problematic situations and typical behavior problems that occur at each age and in different environments. Throughout the book, there are case studies and temperament profiles that illustrate various scenarios in temperament counseling, and two appendixes provide a list of temperament questionnaires for the three age ranges covered.
