The Developing Structure of Temperament and Personality From Infancy To Adulthood Charles F. Halverson, Jr., Geldolph A. Kohnstamm, Roy P. Martin, Charles F. Halverson, Geldolph A. Kohnstamm, 2014-05-12 This book is the first to bring together researchers in individual differences in personality and temperament to explore whether there is any unity possible between the temperament researchers of infancy and childhood and the major researchers in adult personality Prior to the workshop which resulted in this volume the existing literature seemed to document a growing consensus on the part of the adult personality researchers that five major personality dimensions the Big Five might be sufficient to account for most of the important variances in adult individual differences in personality In contrast to this accord the literature on child and infant individual differences seemed to offer a wide variety of opinions regarding the basic dimensions of difference in personality or temperament The editors believed that they could encourage researchers from both the adult and child areas to consider the importance of a lifespan conceptualization of individual differences by discussing their research in terms of a continuity approach Written by some of the most distinguished scholars from Great Britain continental Western Europe and Eastern Europe as well as the United States and Canada the chapters present a cross cultural view of both adult personality and temperament in infancy and childhood By sharing their recent data techniques and theoretical speculations the chapter authors communicate the research enthusiasm engendered by the growing consensus of the adult Big Five as well as the exciting prospects of an integrative program of research from infancy to adulthood that will clarify and consolidate what is

now a disparate set of methods theory and findings across the lifespan The editors suggest that this volume will have considerable heuristic value in stimulating researchers to conceptualize their work in developmental lifespan approaches that will lead to a consolidation of individual differences research at every age Explorations in Temperament Jan Strelau, Alois Angleitner, 2013-11-11 The growing interest in research on temperament during the last decade has been recorded by several authors e g R Plomin J E Bates from such sources of information as the Social Sciences Citation Index or Psychological Abstracts The editors inquiry shows that the number of cases in which the term temperament was used in the title of a paper or in the paper s abstract published in Psychological Abstracts reveals an essential increase in research on temperament During the years 1975 to 1979 the term temperament was used in the title and or summary of 173 abstracts i e 34 6 publications per year during the next five years 1980 1984 it was used in 367 abstracts 73 4 publications per year whereas in the last five years 1985 to 1989 the term has appeared in 463 abstracts that is in 92 6 publications per year Even if the review of temperament literature is restricted to those abstracts it can easily be concluded that temperament is used in different contexts and with different meanings hardly allowing any comparisons or general statements One of the consequences of this state of affairs is that our knowledge on temperament does not cumulate despite the increasing research activity in this field This situation in temperament research motivated the editors to organize a one week workshop on The Diagnosis of Temperament Bielefeld Federal Republic of Germany September 1987 **The Handbook of Life-Span Development, Volume 2**, 2010-12-14 In the past fifty years scholars of human development have been moving from studying change in humans within sharply defined periods to seeing many more of these phenomenon as more profitably studied over time and in relation to other processes The Handbook of Life Span Development Volume 2 Social and Emotional Development presents the study of human development conducted by the best scholars in the 21st century Social workers counselors and public health workers will receive coverage of the social and emotional aspects of human change across the lifespan *Temperament* Diana Wright Guerin, Allen W. Gottfried, Pamella H. Oliver, Craig W. Thomas, 2012-12-06 Your good nature will bring you much happiness Peking Noodle Co We began this book with the belief that there are individual differences in tempera ment that impact the trajectory of the course of development At a particular point in time the impact may be small but over time the effect of these small tweaks may come to be associated with significant and meaningful differences in our indi vidual destinations In this book we examined the relations between temperament and various domains of development as well as the home and family environ ment to document the short and long term sequelae of various temperamental characteristics to test this belief It takes a certain temperamental profile to complete a collaborative longitu dinal research project spanning two decades Especially during the project s early years when we were directly assessing the development of over 100 children twice yearly and visiting their homes high activity level was required Our biological rhythms were constantly disrupted as we worked to complete data coding we used punch cards then and checking before the

next wave of assessments began We learned to approach new problems and tasks with intensity to be adaptable when appointments had to be rescheduled to be sensitive to changes in our study families situations and that a positive mood is essential We were not easily distracted from our goal of following the study participants through high school completion and our persistence has made all the difference *Key Concepts in Developmental Psychology* H Rudolph Schaffer,2006-12-28 Perfect for courses in child development or developmental psychology and arranged thematically in sections corresponding to chapter headings usually found in textbooks this book is ideal for students wanting an accessible book to enrich their learning experience Key Features Provides an overview of the place of each concept in Developmental Psychology under three headings namely its meaning origins and current usage Concepts are grouped into sections corresponding to the main themes usually covered in teaching Relevant concepts in the book are emboldened and linked by listing at the end of each concept Guidance is provided to further reading on each of the concepts discussed The book will be centrally important to undergraduate students who need to learn the language used by developmental psychologists in describing their studies but will also help more advanced readers in checking their ideas regarding the nature and uSAGE of particular concepts
