The Lever of Riches Joel Mokyr, 1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation's creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval

Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity The Lever of Riches with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential *Bisexual Women in the Twenty-First Century* Dawn Atkins,2013-11-19 *Bisexual Women in the Twenty First Century* reflects the brave new world of bisexual women s lives through an eclectic collection of articles that typifies an ongoing feminist process of theory grounded in life experience The book s broad scope addresses a world created in response to lesbian feminism homophobia within the mainstream women s movement and sexism within the gay rights movement The book includes Carol Queen s memoirs of the swinging lesbian scene in the 1970s a critical examination of Alice Walker s novel *The Temple of My Familiar* and a look back at the controversy surrounding bisexual inclusion in the Northampton Lesbian and Gay Pride March in Massachusetts in the early 90s Previous groundbreaking work on bisexuality had to focus on breaking the silence around bisexual invisibility This collection works from that foundation to explore the complexities and histories of bisexual women s lives *Bisexual Women in the Twenty First Century* examines tensions between lesbians and bisexual women the shifting place of bisexual women in society the use of skin color as a charged metaphor the inclusion of bisexuality into queer theory groundbreaking new work on bisexual youth the creative use of the sacred whore archetype *Bisexual Women in the Twenty First Century* is an essential source of social and political critique and a vital resource for anyone interested in the complex dynamics of human sexuality regardless of sexual orientation *Book Prices: Used and Rare, 1994* Edward N. Zempel,1994 *The Cambridge Guide to Women's Writing in English* Lorna Sage,1999-09-30 This Guide aims to consolidate and epitomise the re reading of women s writing that has gone on in the last twenty five years This is an opportunity for stock taking a timely project when so much writing has been rediscovered reclaimed and republished There are entries on writers on individual texts and on general terms genres and movements all printed in a single alphabetical sequence The earliest written documents in medieval English the visionary writings of Julian of Norwich and Margery Kempe are covered in an historical and geographical sweep that takes us up to the present day The book reflects the spread of literacy the history of colonisation and the development of post colonial cultures using and changing the English language The entries are written by contributors from all the countries covered The result is a work of reference with a unique feeling for the vitality wealth and diversity of women s writing *Book Prices* Edward N. Zempel,Linda A. Verkler,1993 **The Other Black Church** Joseph L. Tucker Edmonds,2020-12-02 *The Other Black Church*

Alternative Christian Movements and the Struggle for Black Freedom examines the movements led by Father Divine Charles Mason and Albert Cleage later known as Jaramogi Abebe Agyeman as alternative Christian movements in the middle of the twentieth century that radically re envisioned the limits and possibilities of Black citizenship These movements not only rethink the value and import of Christian texts and reimagined the role of the Black Christian prophetic tradition but they also outlined a new model of protest that challenged the language and logic of Black essentialism economic development and the role of the state By placing these movements in conversation with the long history of Black theology and Black religious studies this book suggests that alternative Christian movements are essential for thinking about African American critiques of and responses to the failures of U S based democracy These prophets of Black theological thought and their attention to the limits of the state and traditional Black religious formations are most fully appreciated when studied in light of their conversations and interactions with other key Black prophetic and theological figures of the mid twentieth century Ultimately The Other Black Church will use those conversations and archives from these movements to highlight their protest of the racial state to explore the limits of the Black church and to argue for their continued significance for thinking about the variety and vibrancy of Black protest specifically Black religious protest during the twentieth century
