## **Ten Cents War Chile Peru And Bolivia In The War Of The Pacific 1879 1884:**

**The Ten Cents War** Bruce W. Farcau,2000-09-30 The Atacama Desert a coastal area where the borders of Chile Peru and Bolivia meet was a region of little interest in the late nineteenth century until European research on the use of nitrates in fertilizers and explosives rendered the droppings of millions of sea birds a valuable commodity In a move that echoed the California Gold Rush the three neighboring countries soon battled for control of the region In 1879 a comparatively modern and powerful Chile seized Bolivia s coastal province and a secret alliance between Peru and Bolivia soon led to a full scale war one which saw the employment of much new military technology Using such new weapons as the breech loading rifle rapid fire cannon ironclad warships torpedoes and electronic mines Chile quickly crushed the allied armies but a guerrilla war would drag on for years While the three armies fought over some of the most inhospitable terrain imaginable from burning waterless deserts to snow clogged mountain passes at 15 000 feet their governments bumbled and wrangled In the end the lure of easy wealth undermined the economies of all three nations and served no good purpose when the market for nitrates soon evaporated leaving all three much poorer for the experience

**Armies of the War of the Pacific 1879-83** Gabriele Esposito,2016-01-20 The Pacific War was the greatest and bloodiest war ever fought in the Andean region and is one of the most important conflicts in South American history It is also known as the Saltpeter War or the Guano War because the possession of these two highly profitable nitrates was the main cause of the conflict By the 1870s Chilean military superiority and expansionist policies exploded into full scale conflict This book examines the troops uniforms and equipment used by the Chilean Peruvian and Bolivian forces and traces the events of the war from the early naval blockades through major pitched battles to the final guerilla campaign in occupied Peru The war ended in total victory for Chile and that country s military emergence thereafter as the Prussia of South America while it cost Peru some lucrative provinces and Bolivia its outlet to the Pacific coast

**Warships in the War of the Pacific 1879-83** Angus Konstam,2024-05-23 Superbly illustrated with original artwork throughout this book explores the ironclad warships that fought the little known battles of South America s War of the Pacific In the late 19th century a war erupted between Chile and Peru the catalyst for which was control of guano rich Chincha islands Given the geography of the two countries with a narrow arid land border and long exposed coastlines it was inevitable that the War of the Pacific would predominantly be a naval war It was a unique episode of military history fought by two newly emergent South American states using the latest technology ironclad steam powered warships and involving more naval battles than in the American Civil War including a blockade the capture of key warships and bombardments of ports Chile s navy was larger and more modern while Peru s trump card was the small but powerful ironclad Hu scar In this book naval expert Angus Konstam offers readers an essential guide to this little known naval war illustrated with detailed profiles of the key ironclads spectacular original artwork of the battles and a cutaway of Hu scar He briefly covers the strategies of the warring powers as well as exploring all the key points of the naval campaign and the

details of the warships involved as a handful of ironclads fought for naval supremacy in South America      Market Justice  
Brent Z. Kaup, 2012-12-24 Market Justice explores the challenges for the new global left as it seeks to construct alternative means of societal organization Focusing on Bolivia Brent Z Kaup examines a testing ground of neoliberal and counter neoliberal policies and an exemplar of bottom up globalization Kaup argues that radical shifts towards and away from free market economic trajectories are not merely shaped by battles between transnational actors and local populations but also by conflicts between competing domestic elites and the ability of the oppressed to overcome traditional class divides Further the author asserts that struggles against free markets are not evidence of opposition to globalization or transnational corporations They should instead be understood as struggles over the forms of global integration and who benefits from them

*The Colonial Past in History Textbooks* Karel Van Nieuwenhuyse, Joaquim Pires Valentim, 2018-05-01 This book examines the evolving representations of the colonial past from the mid 19th century up to decolonization in the 1960s and 70s the so called era of Modern Imperialism in post war history textbooks from across the world The aim of the book is to examine the evolving outlook of colonial representations in history education and the underpinning explanations for the specific outlook in different former colonizer and colonized countries to be found in collective memory popular historical culture social representations identity building processes and the state of historical knowledge within academia The approach of the book is novel and innovative in different ways First of all given the complexity of the research an original interdisciplinary approach has been implemented which brings together historians history educators and social psychologists to examine representations of colonialism in history education in different countries around the world while drawing on different theoretical frameworks Secondly given the interest in the interplay between collective memory popular historical culture social representations and the state of historical knowledge within academia a diachronic approach is implemented examining the evolving representations of the colonial past and connecting them to developments within society at large and academia This will allow for a deeper understanding of the processes under examination Thirdly studies from various corners of the world are included in the book More specifically the project includes research from three categories of countries former colonizer countries including England Spain Italy France Portugal and Belgium countries having been both colonized and colonizer Chile and former colonized countries including Zimbabwe Malta and Mozambique This selection allows pairing up the countries under review as former colonizing colonized ones for instance Portugal Mozambique United Kingdom Malta allowing for an in depth comparison between the countries involved Before reaching the research core three introductory chapters outline three general issues The book starts with addressing the different approaches and epistemological underpinnings history and social psychology as academic disciplines hold In a second chapter evolutions within international academic colonial historiography are analyzed with a special focus on the recent development of New Imperial History A third chapter analyses history textbooks as cultural tools and political means of transmitting historical knowledge and

representations across generations The next ten chapters form the core of the book in which evolving representations of colonial history from mid 19th century until decolonization in the 1960s and 1970s are examined explained and reflected upon for the above mentioned countries This is done through a history textbook analysis in a diachronic perspective For some countries the analysis dates back to textbooks published after the Second World War for other countries the focus will be more limited in time The research presented is done by historians and history educators as well as by social psychologists In a concluding chapter an overall overview is presented in which similarities and differences throughout the case studies are identified interpreted and reflected upon

*Sovereignty and Territorial Temptation* Christopher R. Rossi, 2017-04-27 This powerful reworking of the liberal tradition of international law uses Grotius as the vehicle for understanding coming challenges to the global commons Fundamental problems of scarcity sovereignty anachronistic thinking and territorial temptation are interwoven in historical and contemporary contexts to illuminate the tendency among states to share resources but only when necessary

*The Cartel System of States* Avidit Acharya, Alexander Lee, 2022-12-08 The people who live in border towns often have closer relations with people across their immediate borders than with people in the same country as them Despite how intertwined these border communities often are neither community can access the governmental institutions of the nation on the other side Why are the citizens of neighboring regions that lie across an international border often subject to very different governance systems More broadly why can't public services be bought piecemeal on an a la carte basis with governments competing to provide higher quality services at the lowest cost in a marketplace for government services These questions lie at the heart of modern International Relations In *The Cartel System of States* Avidit Acharya and Alexander Lee provide a powerful and field shaping theory to address a fundamental issue in world politics the character of the territorial nation state They contend that the modern territorial state system works as an economic cartel in which states have local bounded monopolies in governing their citizens States refuse to violate each other's monopolies even when they could do so easily Acharya and Lee examine what makes this system stable when and how it emerged how it spread how it has been challenged and what led it to be so resilient over time Drawing from the centuries long process of modern state formation *The Cartel System of States* explains both how the present system of territorial states by no means a foregone conclusion in retrospect took over the world and how it might change in the future

*Pawned States* Didac Queralt, 2022-08-09 How foreign lending weakens emerging nations In the nineteenth century many developing countries turned to the credit houses of Europe for sovereign loans to balance their books and weather major fiscal shocks such as war This reliance on external public finance offered emerging nations endless opportunities to overcome barriers to growth but it also enabled rulers to bypass critical stages in institution building and political development *Pawned States* reveals how easy access to foreign lending at early stages of state building has led to chronic fiscal instability and weakened state capacity in the developing world Drawing on a wealth of original data to document the rise of cheap overseas credit

between 1816 and 1913 Didac Queralt shows how countries in the global periphery obtained these loans by agreeing to extreme conditionality which empowered international investors to take control of local revenue sources in cases of default and how foreclosure eroded a country's tax base and caused lasting fiscal disequilibrium Queralt goes on to combine quantitative analysis of tax performance between 1816 and 2005 with qualitative historical analysis in Latin America Asia Africa and the Middle East illustrating how overreliance on external capital by local leaders distorts their incentives to expand tax capacity articulate power sharing institutions and strengthen bureaucratic apparatus Panoramic in scope Pawned States sheds needed light on how early and easy access to external finance pushes developing nations into trajectories characterized by fragile fiscal institutions and autocratic politics

*Enduring Controversies in Military History* Spencer C. Tucker, 2017-09-21 This provocative examination of major controversies in military history enables readers to learn how scholars approach controversial topics and provides a model for students in the study and discussion of other historical events Why did Alexander the Great's empire fall apart so soon after his death How did France win the Hundred Years War despite England winning its major battles Was slavery the primary cause of the American Civil War Would it have benefited the Allies militarily to have gone to war against Germany in 1938 rather than in 1939 Should women be allowed to serve in combat positions in the U S military All of these questions and many other historical controversies are addressed in this thought provoking reference book By exploring every angle of some of the most contentious debates involving military history this book builds students critical thinking skills by supplying a complete background of the controversial topic to provide context and also by providing multiple perspective essays written by top scholars in the field The perspective essays present arguments for different positions on the controversy Readers will consider the cases for and against whether Hannibal should have marched on Rome after his momentous victory at Cannae whether the United States was justified in using the atomic bomb in Japan whether Adolf Hitler was primarily responsible for the Holocaust and whether torturing prisoners during the War on Terror is warranted among many other historical military debates

**Cables, Crises, and the Press** John A. Britton, 2013-12-30 In recent decades the Internet has played what may seem to be a unique role in international crises This book reveals an interesting parallel in the late nineteenth century when a new communications system based on advances in submarine cable technology and newspaper printing brought information to an excitable mass audience A network of insulated copper wires connecting North America the Caribbean South America and Europe delivered telegraphed news to front pages with unprecedented speed Britton surveys the technological innovations and business operations of newspapers in the United States the building of the international cable network and the initial enthusiasm for these electronic means of communication to resolve international conflicts Focusing on United States rivalries with European nations in Latin America he examines the Spanish American War in which war correspondents like Richard Harding Davis fed accounts of Spanish atrocities and Cuban heroism into the American press creating pressure on diplomats and government

leaders in the United States and Spain The new information system also played important roles in the U S British confrontation in the Venezuelan boundary dispute the building of the Panama Canal and the establishment of the U S empire in the Caribbean and the Pacific

**Relics of the Past** Stefanie Gänger,2014-05-29 Relics of the Past tells the story of antiquities collecting antiquarianism and archaeology in Peru and Chile in the second half of the nineteenth and the early twentieth century While the role of foreign travellers and scholars dedicated to the study of South America s pre Columbian past is well documented historians have largely overlooked the knowledge gathered and the collections formed among collectors of antiquities antiquaries and archaeologists born or living in South America during this period The landed gentry the clergy and an urban bourgeoisie of doctors engineers and military officials put antiquities on display in their private mansions or bestowed them upon the public museums that were being formed by municipalities and governments in Santiago de Chile Cuzco or Lima Men and some few women gathered antiquities on their journeys inland and during sociable weekend excursions but also on quotidian commercial voyages or in military campaigns They bartered antiquities with their fellow collectors or haggled about their price on the antiquities market In their hours of leisure they marvelled at them wrote about them and disputed over their meaning age and interest in learned societies informal gatherings and at meetings in universities and public museums This volume unveils a hitherto largely unknown world of antiquarian and archaeological collecting and learning in Peru and Chile

*War in the Modern World since 1815* Jeremy Black,2013-10-11 Conflict is central to human history It is often the cause course and consequence of social cultural and political change Military history therefore has to be more than a technical analysis of armed conflict War in the Modern World since 1815 addresses war as a cultural phenomenon discusses its meaning in different societies and explores the various contexts of military action

**Rebellion, Rascals, and Revenue** Michael Keen,Joel Slemrod,2022-05-17 An engaging and enlightening account of taxation told through lively dramatic and sometimes ludicrous stories drawn from around the world and across the ages Governments have always struggled to tax in ways that are effective and tolerably fair Sometimes they fail grotesquely as when in 1898 the British ignited a rebellion in Sierra Leone by imposing a tax on huts and in repressing it ended up burning the very huts they intended to tax Sometimes they succeed astonishingly as when in eighteenth century Britain a cut in the tax on tea massively increased revenue In this entertaining book two leading authorities on taxation Michael Keen and Joel Slemrod provide a fascinating and informative tour through these and many other episodes in tax history both preposterous and dramatic from the plundering described by Herodotus and an Incan tax payable in lice to the misremembered Boston Tea Party and the scandals of the Panama Papers Along the way readers meet a colorful cast of tax rascals and even a few tax heroes While it is hard to fathom the inspiration behind such taxes as one on ships that tended to make them sink Keen and Slemrod show that yesterday s tax systems have more in common with ours than we may think Georgian England s window tax now seems quaint but was an ingenious way of judging wealth unobtrusively And Tsar Peter the Great s tax on beards

aimed to induce the nobility to shave much like today's carbon taxes aim to slow global warming **Rebellion Rascals and Revenue** is a surprising and one of a kind account of how history illuminates the perennial challenges and timeless principles of taxation and how the past holds clues to solving the tax problems of today **The Story of N** Hugh S.

Gorman,2013-01-24 In **The Story of N** Hugh S Gorman analyzes the notion of sustainability from a fresh perspective the integration of human activities with the biogeochemical cycling of nitrogen and provides a supportive alternative to studying sustainability through the lens of climate change and the cycling of carbon It is the first book to examine the social processes by which industrial societies learned to bypass a fundamental ecological limit and later began addressing the resulting concerns by establishing limits of their own The book is organized into three parts Part I **The Knowledge of Nature** explores the emergence of the nitrogen cycle before humans arrived on the scene and the changes that occurred as stationary agricultural societies took root Part II **Learning to Bypass an Ecological Limit** examines the role of science and market capitalism in accelerating the pace of innovation eventually allowing humans to bypass the activity of nitrogen fixing bacteria Part III **Learning to Establish Human Defined Limits** covers the twentieth century response to the nitrogen related concerns that emerged as more nitrogenous compounds flowed into the environment A concluding chapter **The Challenge of Sustainability** places the entire story in the context of constructing an ecological economy in which innovations that contribute to sustainable practices are rewarded **Conservation of Marine Birds** Lindsay Young, Eric

VanderWerf,2022-09-27 **Conservation of Marine Birds** is the first book to outline and synthesize the myriad of threats faced by one of the most imperiled groups of birds on earth With more than half of all 346 seabird species worldwide experiencing population declines and 29% of species recognized as globally threatened by the International Union for Conservation of Nature the timing to determine solutions to threats could not be more urgent Written by a diverse team of international experts on marine birds this book explores the environmental and biogeographical factors that influence seabird conservation and provides concrete recommendations for mounting climate change issues This book will be an important resource for researchers and conservationists as well as ecologists and students who want to understand seabirds the threats they are facing and tactics to help conserve and protect them Outlines both threats and solutions in the marine and terrestrial realm Synthesizes information to provide a comprehensive strategy moving forward especially considering climate change Created by a team of experts with the latest and most comprehensive knowledge of seabird conservation **Naval**

**Warfare** Jeremy Black,2017-01-05 The modern age of naval warfare began with the combination of steam power iron warships and modern artillery which launched an intense period of international competition Tracing naval warfare from the 1860s into the future noted historian Jeremy Black provides a dynamic account of strategy and warfare worldwide He focuses on the interplay of technological development geopolitics and resource issues to assess not only the role of leading powers but all those involved in naval conflict Emphasizing conflict and changes since 1945 and notably since the end of the Cold

War the author considers possible future developments of navies their challengers and the geopolitics of maritime power

Spaces of Law in American Foreign Relations Daniel S. Margolies, 2011 In the late nineteenth century the United States oversaw a great increase in extraterritorial claims boundary disputes extradition controversies and transborder abduction and interdiction In this sweeping history of the underpinnings of American empire Daniel S Margolies offers a new frame of analysis for historians to understand how novel assertions of legal spatiality and extraterritoriality were deployed in U S foreign relations during an era of increased national ambitions and global connectedness Whether it was in the Mexican borderlands or in other hot spots around the globe Margolies shows that American policy responded to disputes over jurisdiction by defining the space of law on the basis of a strident unilateralism Especially significant and contested were extradition regimes and the exceptions carved within them Extradition of fugitives reflected critical questions of sovereignty and the role of the state in foreign affair during the run up to overseas empire in 1898 Using extradition as a critical lens Spaces of Law in American Foreign Relations examines the rich embeddedness of questions of sovereignty territoriality legal spatiality and citizenship and shows that U S hegemonic power was constructed in significant part in the spaces of law not simply through war or trade

Chester Alan Arthur Gregory J. Dehler, 2007 Arthur s greatest success was in cutting the surplus although it was a modest reduction maintaining the protectionist tariff system achieving civil service reform and rebuilding the navy Like every president he did disappoint and he carefully crafted his politics to achieve his ends The years of Arthur s administration were ones of great changes Industrial growth and consolidation led to massive economic changes Companies were no longer local entities but now competed in the international marketplace Single companies took over entire industries John Rockefeller Andrew Carnegie and John P Morgan ushered in the era of the trust In North Carolina James Duke began mass producing cigarettes the first significant step on the way to a national economy based on consumption

*The Shock of Recognition* Lewis Pyenson, 2020-10-12 In *The Shock of Recognition* Lewis Pyenson uses a method called Historical Complementarity to identify the motif of non figurative abstraction in modern art and science He identifies the motif in Picasso s and Einstein s educational environments He shows how this motif in domestic furnishing and in urban lighting set the stage for Picasso s and Einstein s professional success before 1914 He applies his method to intellectual life in Argentina using it to address that nation s focus on an inventory of the natural world until the 1940s its adoption of non figurative art and nuclear physics in the middle of the twentieth century and attention to landscape painting and the wonder of nature at the end of the century
