Becker, 2024-09-23 Tense and aspect are crucial devices of sentence meaning They interact with Aktionsart but also with verb types and adverbs when indicating temporal relations and building temporal discourse structure On the discourse level they are co determined by narrative functions enhancing the complexity of their description The volume depicts this vast field It unites twelve contributions which elaborate on three thematic cores 1 the context sensitivity of tense and aspect and their relationships with neighbouring categories 2 their interaction with adverbs 3 their functioning in discourse The volume advances our knowledge of the matters at hand in different respects It discusses the onomasiological status of categories such temporality and aspectuality critically It addresses the functioning of tense in discourse from various angles A further focus is placed on the imperfective past tense aspect form its uses and meaning potentials Its analysis ranges from marking evidentiality to indicating perspectives The volume combines papers with various theoretical approaches and methodologies notably formally oriented linguistics and data driven accounts The multiplicity of subjects and methods may resonate beyond the field of Romance linguistics **Verbal Aspect in Discourse** Nils B. Thelin, 1990-01-01 In the light of growing insights into the universal temporal semantic nature of aspectual distinctions today s aspectology has broadened its attention from restrictedly event defining functions of aspect on the sentence level towards

its primary perspectival functions on the discourse situation level Hereby it attempts to relate these functions to each other in ways that stimulate consistently language processing on a more solid perceptual conceptual and pragmatic basis Reflecting in various ways this general tendency The 13 papers collected in this volume are oriented to four fields of research 1 Developmental properties of aspect and tense 2 Ideo pragmatic and conceptual semantic correlates of aspect and the perspectival organisation of discourse 3 Aspect case and discourse 4 and Aspect in literary discourse The editor s Introduction gives a comprehensive survey of contemporary aspectology and its development towards a proper integration of discourse situation conditions Besides cross linguistic considerations including English the languages analyzed specifically are Russian Bulgarian Lithuanian French and Finnish *Time and the Verb* Robert I. **Tense-Aspect** Paul J. Hopper,1982-01-01 The verbal categories of tense and aspect have been studied traditionally from the point of view of their reference to the timing and time perspective of the speaker s reported experience They are universal categories both in terms of the semantic functional domain they cover as well as in terms of their syntactic and morphological realization Nevertheless their treatment in contemporary linguistics is often restricted and narrow based often involving mere recapitulatoin of traditional semantic and morphotactic studies The present volume arises out of a symposium held at UCLA in May 1979 in which a group of linguists gathered to re open the subject of tense and aspect from a variety of perspectives including in addition to the traditional semantics also discourse pragmatics psycholinguistics child language Creolization and diachronic change The languages discussed in this volume include Russian Turkish English Indonesian Ameslan Eskimo various Creoles Mandari Hebrew Bantu and others The emphasis throughout is not only on the description of language specific tense aspect phenomenon but more on the search for universal categories and principles which underlie the cross language variety of tense and aspect In particular many of the participants address themselves to the relationship between propositional semantics and discourse pragmatics in so far as these two functional domains interact within tense aspect systems Tense and Aspect in Advanced Swedish Learners' Written English Andreas Eriksson,2008 Literaturverz S 233 249 *Tense and Aspect in Second Language Acquisition and Learner Corpus Research* Robert Fuchs,Valentin Werner,2020-06-30 The expression of temporal relations notably through tense and aspect is central in all processes of communication but commonly perceived and described as a major hurdle for non native speakers While this topic has already received considerable attention in the SLA literature it features less prominently in recent corpus based studies of learner language This volume intends to close this gap It shows which additional insights into the area of tense and aspect in learner language can be gained using corpus data addressing the following questions In which ways do corpus based studies complement work based on other methods How can a corpus based approach inform theories on the acquisition of tense and aspect specifically and of language acquisition in general Are results language specific or can universal principles be

established How pervasive are effects of mode register within learner corpus data What role does native and non native input play Which methodological challenges come to the fore when using corpus data instead of elicited data How can the notion of target like performance be operationalized for corpus material Which implications do the findings from the learner corpora have for the teaching and learning of the target language Originally published as special issue of International Journal of Learner Corpus Research 4 2 2018      *The L2 Acquisition of Tense-aspect Morphology* M. Rafael Salaberry,Yasuhiro Shirai,2002 The present volume provides a cross linguistic perspective on the development of tense aspect in L2 acquisition Data based studies included in this volume deal with the analysis of a wide range of target languages Chinese English Italian French Japanese and Spanish Theoretical frameworks used to evaluate the nature of the empirical evidence range from generative grammar to functional typological linguistics Several studies focus on the development of past tense markers but other issues such as the acquisition of a future marker are also addressed An introductory chapter outlines some theoretical and methodological issues that serves as relevant preliminary reading for most of the chapters included in this volume Additionally a preliminary chapter offers a substantive review of first language acquisition of tense aspect morphology The analysis of the various languages included in this volume significantly advances our understanding of this phenomenon and will serve as an important basis for future research      The ^AOxford Handbook of Tense and Aspect Robert I. Binnick,2011-07-01 This Handbook is a comprehensive authoritative and accessible guide to the topics and theories that currently form the front line of research into tense aspect and related areas      Recent Advances in the Syntax and Semantics of Tense, Aspect and Modality Louis de Saussure,Jacques Moeschler,Genoveva Puskás,2008-09-25 It is a fact that tense aspect and modality together form one of the most recurring and active areas of research in contemporary syntax and semantics as well as in other disciplines of linguistics A large number of syntactic and semantic phenomena are concerned by the temporal aspectual modal level of representation information about time aspect and modality is part of virtually all sentences inflexion is quite widely considered as the core of syntactic projections Because of this very crucial situation and role in the sentence structure temporal aspectual and modal information concerns virtually any part of the sentence and this information has scope over the whole characterization of the eventuality denoted by the sentence This book is an up to date milestone for the studies of temporality and language in particular regarding syntax and semantics but with incidental hints to pragmatics and theories of human natural language understanding Through this very tight selection of 15 papers originally delivered during the 6th Chronos colloquium tenses aspect and modality are investigated both at the descriptive and theoretical levels involving many different Indo European and non Indo European languages The volume sheds light on a wide array of phenomena that remained too little explored until now These include the following modal subordination in Japanese epistemic modals in Dutch and English in Free Indirect Speech contexts aspectual readings of idioms adverb licensing with the German perfect French imperfective past compared with English progressive past infinitival perfect in

English Adult Root Infinitives economy constraints on temporal subordinations future modality past interpretation of present tense in embedded clauses and time without tenses in Mandarin and Navajo The book is of interest to scholars and advanced students in the fields of linguistics general linguistics semantics syntax as well as philosophy and logic **The Present in Linguistic Expressions of Temporality** Marie-Eve Ritz, 2023-11-30 This book offers a comprehensive examination of Present Time Expressions PTEs illustrating how a more informed understanding of their semantic and pragmatic representations can offer unique insights into the temporal systems of languages The volume takes as its point of departure the notion that tenses aspectual viewpoint markers and temporal expressions have a semantic meaning which is further pragmatically enriched and manipulated in use by speakers Building on this foundation the book introduces current theories on the linguistic expression of temporality toward better highlighting the need for further understanding of PTEs encompassing tenses of the present and words such as now The volume draws on data from Australian English and Indigenous Australian languages to support its goal of arriving at a theory of the flexibility of uses of PTEs and their centrality in language and highlight the implications for future research on pragmatic and semantic change This book will be of particular interest to graduate students and researchers in semantics pragmatics discourse analysis and philosophy of language as well as those interested in research on Indigenous Australian Languages and Australian English **Focus and Grammatical Relations in Creole Languages** Francis Byrne, Donald Winford, 1993-10-28 The volume has as its topic not only the types of formal constructions and devices which creole languages syntactically utilize to achieve constituent focus but also in a much broader sense the many other phenomena and processes found in these languages which serve to highlight sentence level elements The book is organized into five sections 1 verb focus predicate clefting and predicate doubling 2 focus and anti focus 3 focus and pronominals 4 discourse patterning 5 grammatical relations **Tense and Narrativity** Suzanne Fleischman, 2010-07-22 In this pathfinding study Suzanne Fleischman brings together theory and methodology from various quarters to shed important new light on the linguistic structure of narrative a primary and universal device for translating our experiences into language Fleischman sees linguistics as laying the foundation for all narratological study since it offers insight into how narratives are constructed in their most primary context everyday speech She uses a linguistic model designed for natural narrative to explicate the organizational structure of artificial narrative texts primarily from the Middle Ages and the postmodern period whose seemingly idiosyncratic use of tenses has long perplexed those who study them Fleischman develops a functional theory of tense and aspect in narrative that accounts for the wide variety of functions pragmatic as well as grammatical that these two categories of grammar are called upon to perform in the linguistic economy of a narration **Handbook of Japanese Semantics and Pragmatics** Wesley M. Jacobsen, Yukinori Takubo, 2020-10-12 The volume on Semantics and Pragmatics presents a collection of studies on linguistic meaning in Japanese either as conventionally encoded in linguistic form the field of semantics or as generated by the interaction of form with context the field of pragmatics representing a range of ideas and

approaches that are currently most influential in these fields. The studies are organized around a model that has long currency in traditional Japanese grammar whereby the linguistic clause consists of a multiply nested structure centered in a propositional core of objective meaning around which forms are deployed that express progressively more subjective meaning as one moves away from the core toward the periphery of the clause. The volume seeks to achieve a balance in highlighting both insights that semantic and pragmatic theory has to offer to the study of Japanese as a particular language and conversely contributions that Japanese has to make to semantic and pragmatic theory in areas of meaning that are either uniquely encoded or encoded to a higher degree of specificity in Japanese by comparison to other languages such as conditional forms, forms expressing varying types of speaker modality and social deixis.

**Modes of Modality** Elisabeth Leiss, Werner Abraham, 2014-01-15

The volume aims at a universal definition of modality or illocutionary speaker's perspective force that is strong enough to capture the entire range of different subtypes and varieties of modalities in different languages. The central idea is that modality is all pervasive in language. This perspective on modality allows for the integration of covert modality as well as peripheral instances of modality in neglected domains such as the modality of insufficiency of attitudinality or neglected domains such as modality and illocutionary force in finite vs nonfinite and factive vs non factive subordinated clauses. In most languages modality encompasses modal verbs both in their root and epistemic meanings at least where these languages have the principled distribution between root and epistemic modality in the first place which is one fundamentally restricted in its strict qualitative and quantitative sense to the Germanic languages. In addition, this volume discusses one other intricate and partially highly mysterious class of modality triggers: modal particles as they are sported in the Germanic languages except for English. It is argued in the contributions and the languages discussed in this volume how modal verbs and adverbials next to modal particles are expressed how they are interlinked with contextual factors such as aspect, definiteness, person, verbal factivity and assertivity as opposed to other attitudinal types. An essential concept used and argued for is perspectivization, a sub-concept of possible world semantics. Language groups covered in detail and compared are Slavic, Germanic and South East Asian. The volume will interest researchers in theoretical and applied linguistics, typology, the semantics/pragmatics interface and language philosophy as it is part of a larger project developing an alternative approach to Universal Grammar that is compatible with functionalist approaches.
