Tentacles Of Progress Technology Transfer In The Age Of Imperialism 1850 194:

The Tentacles of Progress Daniel R. Headrick, 1988 This penetrating examination of a paradox of colonial rule shows how the massive transfers of technology including equipment techniques and experts from the European imperial powers to their colonies in Asia and Africa resulted not in industrialization but in underdevelopment Examining the most important technologies shipping and railways telegraphs and wireless urban water supply and sewage disposal economic botany and plantation agriculture irrigation and mining and metallurgy Headrick provides a new perspective on colonial economic history and reopens the debate on the roots of Asian and African underdevelopment **Antinomies of Modernity** Vasant Kaiwar, Sucheta Mazumdar, 2003-04-21 A collection of essays arguing for a global and economically based modernity driven by capitalist development

Nineteenth-Century Communications: A Documentary History, 1780-1918 Kathleen McIlvenna, Karin Koehler, Eleanor Hopkins, Nicola Kirkby, Ellen Smith, Harriet M. Thompson, 2025-09-30 This volume illuminates some of the manifold ways in which Britain's communication infrastructure affected everyday life in nineteenth century Britain Accordingly it highlights socio economic cultural and material repercussions of selected aspects of mediated communication It covers The rise and role of the communication worker and the Post Office's status as Britain's largest employer as well as pioneering employer of women The campaigns surrounding Sunday labour The connections between new leisure opportunities and activities and new media of communication such as the postcard Concerns about morally suspect uses of new media and technologies of communication e.g. the use of the telegraph for gambling The presence of changing communication practices in material culture e.g. the increasing popularity of greeting cards and new types of stationery

The Tentacles of Progress Daniel R. Headrick, 1988 *British Imperialism* P.J. Cain, A. G. Hopkins, 2016-03-02 A milestone in the understanding of British history and imperialism this ground breaking book radically reinterprets the course of modern economic development and the causes of overseas expansion during the past three centuries Employing their concept of gentlemanly capitalism the authors draw imperial and domestic British history together to show how the shape of the nation and its economy depended on international and imperial ties and how these ties were undone to produce the post colonial world of today Containing a significantly expanded and updated Foreword and Afterword this third edition assesses the development of the debate since the book's original publication discusses the imperial era in the context of the controversy over globalization and shows how the study of the age of empires remains relevant to understanding the post colonial world Covering the full extent of the British empire from China to South America and taking a broad chronological view from the seventeenth century to post imperial Britain today *British Imperialism 1688 2015* is the perfect read for all students of imperial and global history **Secularism in Antebellum America** John Lardas Modern, 2024-05-31 Ghosts Railroads Sing Sex machines These are just a few of the phenomena that appear in John Lardas Modern's pioneering account of religion and society in nineteenth century America This book uncovers surprising connections between secular

ideology and the rise of technologies that opened up new ways of being religious Exploring the eruptions of religion in New York's penny presses the budding fields of anthropology and phrenology and Moby Dick Modern challenges the strict separation between the religious and the secular that remains integral to discussions about religion today Modern frames his study around the dread wonder paranoia and manic confidence of being haunted arguing that experiences and explanations of enchantment fueled secularism's emergence The awareness of spectral energies coincided with attempts to tame the unruly fruits of secularism in the cultivation of a spiritual self among Unitarians for instance or in John Murray Spear's erotic longings for a perpetual motion machine Combining rigorous theoretical inquiry with beguiling historical arcana Modern unsettles long held views of religion and the methods of narrating its past **Empire and the Sun** Alex Soojung-Kim Pang, 2002 Astronomy was a popular and important part of Victorian sciences and British astronomers carried telescopes to remote areas in India North America and Caribbean and Pacific islands to watch solar eclipses This book tells the full story of these expeditions the long periods of planning and financing and the day to day work of getting to field sites setting up camp and preparing observing and recording eclipses Bounding Power Daniel H. Deudney, 2010-12-16 Realism the dominant theory of international relations particularly regarding security seems compelling in part because of its claim to embody so much of Western political thought from the ancient Greeks to the present Its main challenger liberalism looks to Kant and nineteenth century economists Despite their many insights neither realism nor liberalism gives us adequate tools to grapple with security globalization the liberal ascent and the American role in their development In reality both realism and liberalism and their main insights were largely invented by republicans writing about republics The main ideas of realism and liberalism are but fragments of republican security theory whose primary claim is that security entails the simultaneous avoidance of the extremes of anarchy and hierarchy and that the size of the space within which this is necessary has expanded due to technological change In Daniel Deudney's reading there is one main security tradition and its fragmentary descendants This theory began in classical antiquity and its pivotal early modern and Enlightenment culmination was the founding of the United States Moving into the industrial and nuclear eras this line of thinking becomes the basis for the claim that mutually restraining world government is now necessary for security and that political liberty cannot survive without new types of global unions Unique in scope depth and timeliness Bounding Power offers an international political theory for our fractious and perilous global village **Buildings of Empire** Ashley Jackson, 2013-11 An exciting journey to thirteen buildings that capture the essence of the British imperial experience painting an intimate portrait of the biggest empire the world has ever seen the people who made it and the people who resisted it as well as the legacy of the imperial project throughout the world **Empires of Print** Patrick Scott Belk, 2017-05-08 At the turn of the twentieth century the publishing industries in Britain and the United States underwent dramatic expansions and reorganization that brought about an increased traffic in books and periodicals around the world Focusing on adventure fiction published from 1899 to 1919

Patrick Scott Belk looks at authors such as Joseph Conrad H G Wells Conan Doyle and John Buchan to explore how writers of popular fiction engaged with foreign markets and readers through periodical publishing Belk argues that popular fiction particularly the adventure genre developed in ways that directly correlate with authors experiences and shows that popular genres of the late nineteenth and early twentieth centuries emerged as one way of marketing their literary works to expanding audiences of readers worldwide Despite an over determined print space altered by the rise of new kinds of consumers and transformations of accepted habits of reading publishing and writing the changes in British and American publishing at the turn of the twentieth century inspired an exciting new period of literary invention and experimentation in the adventure genre and the greater part of that invention and experimentation was happening in the magazines

Segregation Carl H. Nightingale, 2012-05-01 When we think of segregation what often comes to mind is apartheid South Africa or the American South in the age of Jim Crow two societies fundamentally premised on the concept of the separation of the races But as Carl H Nightingale shows us in this magisterial history segregation is everywhere deforming cities and societies worldwide Starting with segregation s ancient roots and what the archaeological evidence reveals about humanity s long standing use of urban divisions to reinforce political and economic inequality Nightingale then moves to the world of European colonialism It was there he shows segregation based on color and eventually on race took hold the British East India Company for example split Calcutta into White Town and Black Town As we follow Nightingale s story around the globe we see that division replicated from Hong Kong to Nairobi Baltimore to San Francisco and more The turn of the twentieth century saw the most aggressive segregation movements yet as white communities almost everywhere set to rearranging whole cities along racial lines Nightingale focuses closely on two striking examples Johannesburg with its state sponsored separation and Chicago in which the goal of segregation was advanced by the more subtle methods of real estate markets and housing policy For the first time ever the majority of humans live in cities and nearly all those cities bear the scars of segregation This unprecedented ambitious history lays bare our troubled past and sets us on the path to imagining the better more equal cities of the future

Automotive Empire Andrew Denning, 2024-07-15 In *Automotive Empire* Andrew Denning uncovers how roads and vehicles began to transform colonial societies across Africa but rarely in the manner Europeans expected Like seafaring ships and railroads automobiles and roads were more than a mode of transport they organized colonial spaces and structured the political economic and social relations of empire both within African colonies and between colonies and the European metropole European officials in French Italian British German Belgian and Portuguese territories in Africa shared a common challenge the transport problem While they imagined that roads would radiate commerce and political hegemony by collapsing space the pressures of constructing and maintaining roads rendered colonial administration thin ineffective and capricious Automotive empire emerged as the European solution to the transport problem but revealed weakness as much as it extended power As *Automotive Empire* reveals motor vehicles and roads seemed the ideal solution to

the colonial transport problem They were cheaper and quicker to construct than railroads overcame the environmental limitations of rivers and did not depend on the recruitment and supervision of African porters At this pivotal moment of African colonialism when European powers transitioned from claiming territories to administering and exploiting them automotive empire defined colonial states and societies along with the brutal and capricious nature of European colonialism itself

Engines of Change Ian J. Kerr, 2006-12-30 The former Jewel in the Crown of the British Empire India remains by any measure a major economic and political actor on the world scene Without her extensive railway network completed against all odds by her British colonial masters it is impossible to imagine what might have become of the diverse lands and peoples of the subcontinent These railway networks brought them together as a colony these networks fostered the nationalism that would be Britain's downfall This rail network both remade the physical landscape and brought social cultural cohesion to a diverse and wide ranging populace It would be common rail travel that Gandhi would employ to reach the masses From its romantic mystique to its dangerous reality it is rail travel today that keeps vital social cultural economic and political forces moving India's railroad history serves as a unique lens to her larger story of triumph over adversity By 1905 India had the world's fourth largest railway network a position it retains in the early 21st century The railroads were at the organizational and technological center of many of the inter related economic political social cultural and ecological transformations that produced modern India through and out of its colonial past In addition to this vast technical achievement and in keeping with the series focus there is an equally important and wide sweeping human interest tale to be told with evocative vignettes of the triumph of the human spirit one billion strong in the face of great adversity

Africa in Translation Sara Pugach, 2012-01-03 The study of African languages in Germany or Afrikanistik originated among Protestant missionaries in the early nineteenth century and was incorporated into German universities after Germany entered the Scramble for Africa and became a colonial power in the 1880s Despite its long history few know about the German literature on African languages or the prominence of Germans in the discipline of African philology In *Africa in Translation A History of Colonial Linguistics in Germany and Beyond 1814-1945* Sara Pugach works to fill this gap arguing that Afrikanistik was essential to the construction of racist knowledge in Germany While in other countries biological explanations of African difference were central to African studies the German approach was essentially linguistic linking language to culture and national identity Pugach traces this linguistic focus back to the missionaries belief that conversion could not occur unless the Word was allowed to touch a person's heart in his or her native language as well as to the connection between German missionaries living in Africa and armchair linguists in places like Berlin and Hamburg Over the years this resulted in Afrikanistik scholars using language and culture rather than biology to categorize African ethnic and racial groups *Africa in Translation* follows the history of Afrikanistik from its roots in the missionaries practical linguistic concerns to its development as an academic subject in both Germany and South Africa throughout the nineteenth and twentieth centuries

Arch Of Society Thomas Levy, 1995-01-01 This volume marks a departure from earlier descriptive archaeological summaries of the Holy Land Taking an anthropological and socio economic perspective many of the leading archaeologists who work in Israel and Jordan today present timely and concise summaries of the archaeology of this region Chronologically organized each chapter outlines the major cultural transitions which occurred in a given archaeological period To explain the processes which were responsible for culture change a review is made of the most recent research concerning settlement patterns innovations and technology religion and ideology and social organization The material culture of every period of human history in the Holy Land is explored from the earliest prehistoric hominids through the Biblical and historical periods and up to modern 20th century times Each chapter is accompanied by settlement pattern maps and a plate highlighting the major artifacts which archaeologists use to identify the material culture of the period In addition windows are presented which focus on major social issues and controversies such as The Agricultural Revolution the Israelite Conquest of Canaan and Ancient Metal Working and Social Change This volume should provide students and the general reader with a useful reference volume concerning the archaeology of societies which lived and live in the Holy Land

British Naturalists in Qing China Fa-ti FAN, Fa-ti Fan, 2009-06-30 In the eighteenth and nineteenth centuries Western scientific interest in China focused primarily on natural history Prominent scholars in Europe as well as Westerners in China including missionaries merchants consular officers and visiting plant hunters eagerly investigated the flora and fauna of China Yet despite the importance and extent of this scientific activity it has been entirely neglected by historians of science This book is the first comprehensive study on this topic In a series of vivid chapters Fa ti Fan examines the research of British naturalists in China in relation to the history of natural history of empire and of Sino Western relations The author gives a panoramic view of how the British naturalists and the Chinese explored studied and represented China s natural world in the social and cultural environment of Qing China Using the example of British naturalists in China the author argues for reinterpreting the history of natural history by including neglected historical actors intellectual traditions and cultural practices His approach moves beyond viewing the history of science and empire within European history and considers the exchange of ideas aesthetic tastes material culture and plants and animals in local and global contexts This compelling book provides an innovative framework for understanding the formation of scientific practice and knowledge in cultural encounters Table of Contents Acknowledgments Introduction I The Port 1 Natural History in a Chinese Entrep t 2 Art Commerce and Natural History II The Land 3 Science

and Informal Empire 4 Sinology and Natural History 5 Travel and Fieldwork in the Interior Epilogue Appendix Selected Biographical Notes Abbreviations Notes Index Fa ti Fan s study of the encounter between the British culture of the naturalist and the Chinese culture of the Qing is both a delight and a revelation The topic has scarcely been addressed by historians of science and this work fills important gaps in our knowledge of British scientific practice in a noncolonial context and of Chinese reactions to Western science in the eighteenth and nineteenth centuries In addition to the culture of Victorian naturalists and Sinology Fan shows an admirable grasp of visual representation in science Chinese taxonomic schemes Chinese export art British imperial scholarship and journeys of exploration His treatment of the China trade and descriptions of Chinese markets and nurseries are especially welcome I learned a great deal and I strongly recommend this book Philip Rehbock author of *Philosophical Naturalists Themes in Early Nineteenth Century British Biology* By focusing on the experiences of British naturalists in China during a time when it was gradually being opened up to foreign influences Fan makes at least two important contributions to history of science He gives us an authoritative study of British naturalists in China as far as I know the only one of its kind and he forces us to rethink some of our categories for doing history of science including how we conceive of the relationship between science and imperialism and between Western naturalist and native Fan s scholarship is meticulous with careful attention to detail and his prose is clear controlled and succinct Bernard Lightman editor of *Victorian Science in Context* Projecting Capitalism Marc Linder,1994 Disputes the myth that construction is a localized industry of many small firms in perfect competition sheltered from world markets Rather US and European firms have been forced to transcend local markets and incorporate the Third World into world markets and capital circuits
