Teoría Transcultural Del Arte:

Teoría transcultural del arte Adolfo Colombres, 2005 El autor pretende elaborar una teoría transdisciplinaria del arte desde la periferia considerando que la estética occidental no ha confrontado sus conceptos y modelos con los de otros pueblos y ha preferido imponerlos como un discurso único que no ha servido generalmente para comprender la producción simbólica ajena sino para oscurecerla para borrar o devaluar los sentidos que los otros habrían construido a lo largo de una historia a menudo milenaria **Para una teoría del arte en Historia y estilo de Jorge Mañach** Yaneidys Arencibia

Coloma, 2018-05-15 Para una teoría del arte en Historia y estilo expone la contribución de Jorge Mañach 1898-1961 a la teoría del arte cubano mediante el examen de Historia y estilo 1944 contenido de varios textos fundamentales y por medio del empleo de conceptos de análisis como electivismo larga duración y teoría de la circunstancialidad histórica del estilo en virtud de precisar el método empleado por Mañach la concepción historiográfica que respalda su propuesta y el empleo del ensayo como soporte textual *An Anthropology of Making in Santa Clara del Cobre* Michele Avis Feder-Nadoff, 2024-05-27 This book introduced with a Foreword by Tim Ingold offers a nuanced reflection on the meaning of making and artisan agency demonstrating how copper smithing produces not only objects but also lives worlds meanings and social transformation Through long term ethnography grounded in apprenticeship to master coppersmith Jesús P rez Ornelas Feder-Nadoff's intimate description of communal and artisanal life in Santa Clara del Cobre Michoacán México provides a critical reappraisal of aesthetics and compelling ways to think about how aura and agency are produced By mapping flows and frictions between persons places and things this study closes the gap between economic and socio political analysis of craft on the one hand and aesthetic material and phenomenological studies of making on the other Although craft historically plays a prominent national even ideological role in Mexico as in many countries most artisans ironically remain absent often living in marginalized precarious circumstances By tracing the cycles of life death and afterlife of these maker protagonists their bodies of knowledge skilled performances and objects this poetic monograph testifies to their presence *The Study of Photography in Latin America* Nathaniel Gardner, 2025-06-17 In this book Nathaniel Gardner provides an insider's perspective to the study of photography in Latin America He begins with a carefully structured introduction that lays out his unique methodology for the book which features over eighty photographs and the insights from sixteen prominent Latin American photography scholars and historians including Boris Kossoy John Mraz and Ana Mauad The work reflects the advances and developments of the study of photography throughout Latin America with certain emphasis on Brazil and Mexico The author further underlines the role of important institutions and builds context by discussing influential theories and key texts that currently guide the discipline The Study of Photography in Latin America is critical to all who want to expand their current knowledge of the subject and engage more robustly with its experts *The SAGE Handbook of Intellectual Property* Matthew David, Debora Halbert, 2014-11-18 This Handbook brings together scholars from around the

world in addressing the global significance of controversies over and alternatives to intellectual property IP today It brings together over fifty of the leading authors in this field across the spectrum of academic disciplines from law economics geography sociology politics and anthropology This volume addresses the full spectrum of IP issues including copyright patent trademarks and trade secrets as well as parallel rights and novel applications In addition to addressing the role of IP in an increasingly information based and globalized economy and culture it also challenges the utility and viability of IP today and addresses a range of alternative futures

Creating Inclusive Knowledges Christopher C. Sonn, Alison M. Baker, 2019-07-23 There has been a growing interest in the role of arts and cultural practice in tackling perennial forms of social exclusion marginalization and oppression Researchers and educators from different disciplines have been collaborating with community based agencies and community groups to forge new ways to challenge these forms of exclusion This volume discusses how various social actors work in interdisciplinary and cross institutional ways to push an agenda that privileges those individuals and groups who experience and live at the front line of social inequality discrimination racism and oppression For instance what new understandings are generated through creative interdisciplinary action oriented work and the implications for social action and transformation How are community pedagogies constructed and communicated through arts based research contemporary and innovative mediums such as creative performances arts technologies mixed cultural practices and social media and networking This collection of articles blurs the lines between cultural practice and knowledge production with the process and products coming in the forms of

theories creative methodologies and a range of arts Together these act as powerful pedagogical tools for engaging in social justice and transformative work The contributions further highlight the multifaceted and diverse ways of creating and disseminating knowledge and the attempts to decenter text based ways of communicating in hopes of sharing collaborative knowledge beyond the academy and engaging the public This volume was originally published as a special issue of the International Journal of Inclusive Education

La Città Altra. Storia E Immagine Della Diversità Urbana: Luoghi E Paesaggi Dei Privilegi E Del Benessere, Dell'isolamento, Del Disagio, Della Multiculturalità. Ediz. Italiana E Inglese Francesca Capano,Maria Ines Pascariello,Massimo Visone,2018-10

This volume proposes a rich corpus of papers about the Other City a subject only few times dealt with but worthy of all our attention it imposes itself on the scene of international modern and contemporary historiography for its undeniable topicality Throughout history the city has always had to deal with social otherness i e with class privileges and consequently with discrimination and marginalization of minorities of the less well off of foreigners in short with the differences in status culture religion So that the urban fabric has ended up structuring itself also in function of those inequalities as well as of the strategic places for the exercise of power of the political military or social control of the spaces for imprisonment for the sanitary isolation or for the temporary remedy to the catastrophes From the first portraits of cities made and diffused at the beginning of the fifteenth century for political exaltation purposes or for religious propaganda and for devotional purposes which often through increasingly refined graphic techniques distort or even deny the true urban image we reach at the dawn of contemporary history the new meaning given by scientific topography and new methods of representation these latter aimed at revealing the structure and the urban landscape in their objectivity often unexpected for who had known the city

through the filter of regime iconography The representation of the urban image still shows the contradictions of a community that sometimes includes and even exalts the diversities other times rejects them showing the unease of a difficult integration

Arte y agencia Alfred Gell, 2021 Qu subyace al poder seductor del arte En esta obra Alfred Gell propone una teoría que se aparta radicalmente de las interpretaciones anteriores Critica que las teorías estéticas adopten una posición demasiado pasiva con respecto de los objetos y en cambio hace hincapié en el arte como forma de acción instrumental concibiendo la elaboración de las cosas como

medio de influir en los pensamientos y actos de los demás Los objetos de arte son la materialización de intenciones complejas y sirven de medio para transmitir la agencia social La conceptualización de Gell conduce a la fusión de los objetos de arte con las personas El autor también analiza entre otros temas la psicología de los patrones y la percepción del arte y la personalidad el arte en relación con las prácticas religiosas como la posesión espiritual la idolatría y la misa católica y el significado del arte para el artista el visitante de galerías y el adorador de dolos El detallado razonamiento de Gell enriquecido por las diversas ilustraciones que lo acompañan así como por un análisis del arte europeo y etnográfico toca ámbitos relacionados con la filosofía la psicología y la lingüística El autor completa la versión inglesa de poco antes de su fallecimiento a los 51 años Esta obra encarna la brillantez de su intelecto el vivaz ingenio el vigor y la erudición por los que era tan admirado y conforma el testimonio duradero de que estuvimos ante uno de los antropólogos con mayor talento de su generación

El instinto del arte Denis Dutton, 2010-03-25 Según Denis Dutton los gustos y las preferencias del ser humano por las artes son rasgos evolutivos que se han ido conformando por selección natural No son construcciones sociales como han defendido la crítica de arte y la teoría académica del siglo XX ni están determinados por el entorno cultural Nuestro amor por la belleza es innato y muchos gustos artísticos son universales como la predilección por los paisajes que combinan imágenes de agua y rboles pues evocan las sabanas desde las cuales evolucionamos Uniendo la filosofía del arte y la teoría de la evolución reivindica el lugar preeminente de la belleza el placer y la habilidad técnica como valores artísticos esenciales
