Terks Tale:

British Short Fiction in the Early Nineteenth Century Tim Killick, 2016-05-23 In spite of the importance of the idea of the tale within Romantic era literature short fiction of the period has received little attention from critics Contextualizing British short fiction within the broader framework of early nineteenth century print culture Tim Killick argues that authors and publishers sought to present short fiction in book length volumes as a way of competing with the novel as a legitimate and prestigious genre Beginning with an overview of the development of short fiction through the late eighteenth century and analysis of the publishing conditions for the genre including its appearance in magazines and annuals Killick shows how Washington Irving's hugely popular collections set the stage for British writers Subsequent chapters consider the stories and sketches of writers as diverse as Mary Russell Mitford and James Hogg as well as didactic short fiction by authors such as Hannah More Maria Edgeworth and Amelia Opie His book makes a convincing case for the evolution of short fiction into a self conscious intentionally modern form with its own techniques and imperatives separate from those of the novel *The Chameleon and the Dream* Karl D. Kramer, 2013-09-26 No detailed description available for *The Chameleon and the Dream*

James Flaubert Kafka and D H Lawrence by authors who specifically dedicated themselves to the art of the short story like Kipling Chekhov and Katherine Mansfield by contemporary practitioners like Angela Carter and Jorge Luis Borges and by unfairly neglected writers like Sarah Orne Jewett and Joel Chandler Harris

The Sketch, the Tale, and the Beginnings of American Literature Lydia G. Fash, 2020-03-31 Accounts of the rise of American literature often start in the 1850s with a cluster of great American novels Hawthorne's *The Scarlet Letter* Melville's *Moby Dick* and Stowe's *Uncle Tom's Cabin* But these great works did not spring fully formed from the heads of their creators All three relied on conventions of short fiction built up during the culture of beginnings the three decades following the War of 1812 when public figures glorified the American past and called for a patriotic national literature Decentering the novel as the favored form of early nineteenth century national literature Lydia Fash repositions the sketch and the tale at the center of accounts of American literary history revealing how cultural forces shaped short fiction that was subsequently mined for these celebrated midcentury novels and for the first novel published by an African American In the shorter works of writers such as Washington Irving Catharine Sedgwick Edgar Allan Poe and Lydia Maria Child among others the aesthetic of brevity enabled the beginning idea of a story to take the outsized importance fitted to the culture of beginnings Fash argues that these short forms with their ethnic exclusions and narrative innovations coached readers on how to think about the United States past and the nature of narrative time itself Combining history print history and literary criticism this book treats short fiction as a vital site for debate over what it meant to be American thereby offering a new account of the birth of a self consciously national literary tradition

Feminism's Empire Carolyn J. Eichner, 2022-06-15 *Feminism's Empire* investigates the complex relationships between imperialisms and feminisms in the late nineteenth century and demonstrates the challenge of conceptualizing pro imperialist and anti imperialist as binary

positions By intellectually and spatially tracing the era's first French feminists' engagement with empire Carolyn J Eichner explores how feminists opposed yet employed approaches to empire in writing, speaking and publishing In differing ways they ultimately tied forms of imperialism to gender liberation Among the era's first anti-imperialists French feminists were enmeshed in the hierarchies and epistemologies of empire They likened their gender-based marginalization to imperialist oppressions Imperialism and colonialism's gendered and sexualized racial hierarchies established categories of inclusion and exclusion that rested in both universalism and ideas of nature that presented colonized people with theoretical yet impossible paths to integration Feminists faced similar barriers to full incorporation due to the gendered contradictions inherent in universalism The system presumed citizenship to be male and thus positioned women as outsiders Feminism's Empire connects this critical struggle to hierarchical power shifts in racial and national status that created uneasy linkages between French feminists and imperial authorities
