*Glossary of Chinese Medicine - E-Book* Li Tian, Anton Lachner, 2016-07-02 Anyone who learns the skills of acupuncture or who extends his knowledge of TCM is inevitably confronted with terms which hitherto had always meant something different to him or her Take the use of the word wind for example to refer to a pathogenic factor contributing to illnesses rather than its sense as a climatic factor This difficulty is compounded by the fact that in most books these terms are not used in a clear and uniform way One of the many examples is the Chinese term xu which is translated as insufficiency but also as deficiency or severity and is often not even used consistently within one and the same publication This glossary presents all the Chinese terms in Chinese characters and in Pinyin script that are relevant to TCM and provides their English translations It also provides an explanation of how for example the location or the function of an acupuncture point can be concluded from its name Teaches the reader to correctly pronounce important terms from TCM which are increasingly used in pinyin transcription The significance of TCM concepts provide explanations for the function of points and medications Written by leading experts in the field Attractive design throughout

Chang,2015-01-23 Recent years have seen the development of two significant trends namely the adoption of some Traditional Chinese Medicine Practices into mainstream Allopathic Western Medicine and the advent of the internet and broad band networks leading to an increased interest in the use of Telemedicine to deliver medical services In this book we see the convergence of these two trends leading to a semantically based TCM Telemedicine system that utilizes an ontology to provide sharable knowledge in the TCM realm to achieve this The underpinning research required the development of a three layer architecture and an Ontology of the TCM knowledge As TCM knowledge like all medical knowledge is not frozen in time it was important to develop an approach that would allow evolution of the Ontology when new evidence became available In order for the system to be practically grounded it was important to work with an industry partner PuraPharm Group HerbMiners Informatics Limited This partnership was initiated through Professor Allan Wong and the Chairman of PuraPharm Group Mr Abraham Chan This led to the system being utilized in more than 20 Mobile Clinics in Hong Kong and 300 Hospitals in China In order for these different deployments of the system to be coherent with the main core Ontology it was necessary for us to develop an Ontology Driven Software System Generation approach *E-Book - The Channels of*
