William Dalrymple Prof Naseer Aruri Dr Ilan Pappé Prof Isma'il Abu Sa'ad and Dr Nur Masalha **Introducing Human Geographies** Paul Cloke, Philip Crang, Mark Goodwin, 2013-12-05 *Introducing Human Geographies* is the leading guide to human geography for undergraduate students explaining new thinking on essential topics and discussing exciting developments in the field. This new edition has been thoroughly revised and updated and coverage is extended with new sections devoted to biogeographies, cartographies, mobilities, non-representational geographies, population geographies, public geographies and securities. Presented in three parts with 60 contributions written by expert international researchers, this text addresses the central ideas through which human geographers understand and shape their subject. Part I Foundations engages students with key ideas that define human geography's subject matter and approaches through critical analyses of dualisms such as local/global, society/space and human/nonhuman. Part II Themes explores human geography's main sub-disciplines with sections devoted to biogeographies, cartographies, cultural geographies, development geographies, economic geographies, environmental geographies, historical geographies, political geographies, population geographies, social geographies, urban and rural geographies. Finally Part III Horizons assesses the latest research in innovative areas from mobilities and securities to non-representational geographies. This comprehensive, stimulating and cutting-edge introduction to the field is richly illustrated throughout with full-colour figures, maps and photos. These are available to download on the companion website located at www.routledge.com/9781444135350. **Fields in Motion** Dena David, 2011-10-01 *Fields in Motion: Ethnography in the Worlds of Dance* examines the deeper meanings and resonances of artistic dance in contemporary culture. The book comprises four sections: methods and methodologies, autoethnography, pedagogies and creative processes, and choreographies as cultural and spiritual representations. The contributors bring an insider's insight to their accounts of the nature and function of these artistic practices, giving voice to dancers, dance teachers, creators, programmers, spectators, students and scholars. International and intergenerational, this collection of groundbreaking scholarly research points to a new direction for both dance studies and dance anthropology. Traditionally the exclusive domain of aesthetic philosophers, the art of dance is here reframed as cultural practice and its significance is revealed through a chorus of voices from practitioners and insider ethnographers. **Art Practice as Research** Graeme Sullivan, 2010 *Art Practice as Research* Second Edition continues to present a compelling argument that the creative and cultural inquiry undertaken by artists is a form of research. The text explores themes, practices and contexts of artistic inquiry and positions them within the discourse of research. Sullivan argues that legitimate research goals can be achieved by choosing different methods than those offered by the social sciences. The common denominator in both approaches is the attention given to rigor and systematic inquiry. Artists emphasize the role of the imaginative intellect in creating, criticizing and constructing knowledge that is not only new but also has the capacity to transform human understanding. *City of Collision* Philipp Misselwitz, Tim Rieniets, 2006-06-02 War has entered the cities. Since September 11, 2001, at the latest, it has become apparent that this is the case not only in
