**Rivers of Europe** Klement Tockner, Christiane Zarfl, Christopher T. Robinson, 2021-11-10 Rivers of Europe Second

Edition presents the latest update on the only primary source of complete and comparative baseline data on the biological and hydrological characteristics of more than 180 of the highest profile rivers in Europe With even more full color photographs and maps the book includes conservation information on current patterns of river use and the extent to which human society has exploited and impacted them Each chapter includes up to 10 featured rivers with detailed information on their physiography hydrology ecology biodiversity and human impacts Rivers selected for specific coverage include the largest the most natural and those most affected by humans This book provides the most comprehensive information ecologists and conservation managers need to better assess their management and meet the EU legislative good governance targets Includes comparison photos of rivers along with information on the history and management of each river Presents summary information on hydrological ecological and freshwater biodiversity patterns and trends of each river Highlights environmental issues of great importance to citizens and governments including fragmentation by dams pollution introduction of nonnative species and reductions in biodiversity **American Book Publishing Record** ,2004 The Lower Danube River Abdelazim Negm,Liliana Zaharia,Gabriela Ioana-Toroimac,2022-06-14 This book provides essential information and recent findings on hydro environmental issues in the Lower Danube River particularly its hydrological and hydromorphological processes physico chemical features climate and water related hazards and not only the biodiversity and quality but also the sustainable management and governance of its hydro environment Accordingly it presents a broad range of scientific information on the lower sector of the second longest river in Europe which holds major economic importance and has been severely impacted by human pressures especially since the second part of the last century The engineering works e g dams reservoirs levees channelization etc on the Danube and its tributaries despite their benefits to society have altered its flow and significantly reduced its sediment load with consequences for hydromorphological processes and aquatic ecosystems These ecosystems have also been affected by pollution from various sources To promote sustainable management of the Danube River and its watershed several strategies and measures have been developed by a number of institutions from the European level to the national and regional levels commissions national authorities non governmental organizations etc Compared to the upper and middle sectors of the Danube the lower sector has received less attention in the international scientific literature in terms of hydro environmental issues The book fills this gap and provides current and original insights and findings from recent studies conducted by scientists from three countries drained by the Lower Danube River and its tributaries Bulgaria Romania and Serbia This unique book will be of great scientific interest to professional engineers policy planners and policymakers in the three countries mentioned above helping them to implement their own sustainable development plans It also offers a valuable resource for graduate students researchers and stakeholders **Facing Global Environmental Change** Hans Günter Brauch,Navnita Chadha Behera,Patricia Kameri-Mbote,John Grin,Úrsula Oswald Spring,Béchir Chourou,Czeslaw Mesjasz,Heinz Krummenacher,2009-06-04 The year 2007 could perhaps accurately be

described as the year when climate change finally received the attention that this challenge deserves globally Much of the information and knowledge that was created in this field during the year was the result of the findings of the Fourth sessment Report AR4 of the Intergovernmental Panel on Climate Change IPCC which were disseminated on a large scale and reported extensively by the media This was the result not only of a heightened interest on the part of the public on various aspects of climate change but also because the IPCC itself proactively attempted to spread the findings of its AR4 to the public at large The interest generated on the scientific realities of climate change was further enhanced by the award of the Nobel Peace Prize to the IPCC and former Vice President of the US Al Gore By taking this decision in favour of a leader who has done a great deal to create awareness on c mate change and a body that assesses all scientific aspects of climate change and disseminates the result of its findings the Norwegian Nobel Committee has clearly drawn the link between climate change and peace in the world

**Hydropolitical Vulnerability and Resilience Along International Waters** ,2009 The hydro vulnerability of Europe is governed by the institutions created to resolve transboundary water issues in a cooperative manner that attempts to prevent potential conflict Institutional capacity through water management bodies treaties or generally positive international relations is possibly more important than the physical environment for minimising hydropolitical vulnerability and conflict on the one hand and strengthening resilience and cooperation on the other hand This publication aims at a broader promotion and dissemination of assessed information and data that can support informed policy making

An Introduction to European Intergovernmental Organizations Marc Cogen,2016-04-15 An Introduction to European Intergovernmental Organizations provides an up to date and accessible reference to European intergovernmental organizations other than the European Union The EU is so dominant that people often overlook the multitude of older and newer smaller and larger intergovernmental organizations rooted in the history of contemporary Europe which continue to help shape its future The specialized character of these organizations adds value to cooperation in Europe as a whole creates permanent channels of communication regardless of EU membership and allows the possibility for non European involvement through organizations such as the European Bank for Reconstruction and Development and NATO It also allows sub regional groups of states such as the Nordic countries or the Benelux countries to

exist and express their own identity via their own organizations This book looks at the history of Non EU organizations their decision making characteristics membership policies legal powers actions and interactions with each other and the European Union A uniform scheme of analysis is used to make European intergovernmental organizations comparable and by studying them we gain a deeper understanding and insight into European affairs **Implementing Transboundary Water**

**Agreements** Alistair Rieu-Clarke,2025-04-09 Interdisciplinary and international in scope this detailed book examines the types of compliance and implementation mechanisms that can support transboundary water cooperation By drawing upon a range of theoretical accounts case studies from the Danube Orange Senqu and Mekong rivers and treaty practice the book offers practical insights into how these mechanisms can be incorporated into transboundary water agreements Large Rivers Avijit Gupta,2022-05-02 An updated treatment of management and geomorphology of large rivers around the world The newly revised Second Edition of Large Rivers Geomorphology and Management delivers a thoroughly updated exploration of the form and function of major rivers The book brings together a set of papers on the large rivers of the world offering readers an insightful examination of a demanding subject The new Second Edition of the book includes fully updated and revised chapters as well as two entirely new chapters on the Ayeyarwady and the Arctic rivers This fascinating volume describes the environmental requirements for creating and maintaining a major river system case studies on over a dozen large rivers from different continents in a variety of physical environments and the measurement and management of large rivers Unmatched in scope Large Rivers sheds light on a subject lacking in comprehensive study Readers will benefit from the inclusion of A thorough introduction to the geology of large river systems hydrology and discharge transcontinental moving and storage of sediment and the greatest floods and largest rivers An exploration of the classification architecture and evolution of large river deltas Discussions of sedimentology and stratigraphy of large river deposits including their recognition in the ancient record and the distinction from incised valley fills An examination of the effects of tectonism climate change and sea level change on the form and behavior of the modern Amazon river and its floodplain Measurement and management of large rivers The effect of climatic change on large rivers Perfect for postgraduate students and researchers in fluvial geomorphology hydrology sedimentary geology and river management Large Rivers Geomorphology and Management will also earn a place in the libraries of engineers and environmental consultants in the private and public sectors working on major rivers around the world **Freshwater Fisheries Ecology** John F. Craig,2016-01-12 Inland fisheries are vital for the livelihoods and food resources of humans worldwide but their importance is underestimated probably because large numbers of small local operators are involved Freshwater Fisheries Ecology defines what we have globally what we are going to lose and mitigate for and what given the right tools we can save To estimate potential production the dynamics of freshwater ecosystems rivers lakes and estuaries need to be understood These dynamics are diverse as are the earths freshwater fisheries resources from boreal to tropical regions and these influence how fisheries are

both utilized and abused Three main types of fisheries are illustrated within the book artisanal commercial and recreational and the tools which have evolved for fisheries governance and management including assessment methods are described The book also covers in detail fisheries development providing information on improving fisheries through environmental and habitat evaluation enhancement and rehabilitation aquaculture genetically modified fishes and sustainability The book thoroughly reviews the negative impacts on fisheries including excessive harvesting climate change toxicology impoundments barriers and abstractions non native species and eutrophication Finally key areas of future research are outlined Freshwater Fisheries Ecology is truly a landmark publication containing contributions from over 100 leading experts and supported by the Fisheries Society of the British Isles The global approach makes this book essential reading for fish biologists fisheries scientists and ecologists and upper level students in these disciplines Libraries in all universities and research establishments where biological and fisheries sciences are studied and taught should have multiple copies of this hugely valuable resource About the Editor John Craig is Editor in Chief of the Journal of Fish Biology and has an enormous range of expertise and a wealth of knowledge of freshwater fishes and their ecology having studied them around the globe including in Asia North America Africa the Middle East and Europe His particular interests have been in population dynamics and life history strategies He is a Fellow of the Linnean Society of London and the Royal Society of Biology
