Helen's Babies, with a Partial Record of Their Actions During Ten Days of Their Angelic and Impish Existence Helen,J. C. Habberton,1877 Formation and Evolution of Black Holes in the Galaxy Gerald Edward Brown,Chang-Hwan Lee,2003 In published papers H A Bethe and G E Brown worked out the collapse of large stars and supernova explosions They went on to evolve binaries of compact stars finding that in the standard scenario the first formed neutron star always went into a black hole in common envelope evolution C H Lee joined them in the study of black hole binaries and gamma ray bursts They found the black holes to be the fossils of the gamma ray bursts From their properties they could reconstruct features of the burst and of the accompanying hypernova explosions This invaluable book contains 23 papers on astrophysics chiefly on compact objects written over 23 years The papers are accompanied by illuminating commentary In addition there is an appendix on kaon condensation which the editors believe to be relevant to the equation of state in neutron stars and to explain why black holes are formed at relatively low masses *Days and Deeds of '76* Everett Titsworth Tomlinson,1927 *The Neutron Star-Black Hole Connection* Chryssa Kouveliotou,J.E Ventura,E.P. van den Heuvel,Edward Peter Jacobus van den Heuvel,2001-12-31 The foremost observers and theorists discuss the latest developments in the astrophysics of neutron stars black holes and their interaction in the universe Often found in compact interacting binaries these objects exhibit broadly similar behaviour The determination of observational signatures that distinguish between these two types of objects is systematically explored Supernovae and evolutionary scenarios leading to neutron stars and black holes single or in binaries are also discussed in detail There is also a discussion of the decades old mystery of cosmic gamma ray bursts currently thought to represent enormous stellar explosions at cosmological distances These could be the result of mergers of a neutron star and its compact binary companion a literal neutron star black hole connection A lucid series of lectures for the advanced graduate student A unifying text that will appeal to the research astrophysicist and space physicist **Dark Matter in Astro- and Particle Physics** Hans-Volker Klapdor-Kleingrothaus,Raoul D. Viollier,2012-12-06 The Fourth HEIDELBERG International Conference on Dark Matter in Astro and Particle Physics DARK2002 was held in Cape Town South Africa in the period 4 9 February 2002

This majestic natural area was the site of the first conference of this series hosted since 1996 in Heidelberg to be held outside of Germany. Dark Matter has become one of the most exciting and central fields of astrophysics, particle physics and cosmology. The conference covered as usual for this series a large range of topics theoretical and experimental. Topics included Astronomical Evidence for Dark Matter, the Cosmic Microwave Background, Supersymmetry, Inflation and Dark Energy, Structure Formation, Hot and Cold Dark Matter and Ultrahigh Energy Cosmic Rays, all of which were represented by experts in the field. It was very nice to see again many of our old friends in Dark Matter here in South Africa. The organizers were very glad to see in addition to world experts the new generation here. Many young participants gave very nice professional talks during the conference. We are grateful to John Ellis for doing an incredible job preparing his excellent summary talk during the sessions. Some special interest and intensive discussions were naturally raised by the first announcement of terrestrial evidence for hot dark matter obtained from neutrino less double beta decay. This now adds to the evidence for cold dark matter which we have from DAMA for several years already and which remained unchallenged up to now by other experiments.
