The Darned Nuisances Jack Seward, Charles Beardsley, 1971 **The Nuisance** Cora Smith Gould, 1919 *The Freethinker*, 1917 **Evaluation in Text : Authorial Stance and the Construction of Discourse** Susan Hunston, Geoffrey Thompson, 2000-02-24

A crucial aspect of any discourse is what the writer or speaker thinks about his/her topic in other words how the writer or speaker evaluates the topic. Evaluation in Text brings together work from many different perspectives providing a unique profile of this important topic which will be essential reading for any student or researcher of Discourse Analysis. This is an accessible and wide-ranging account of current research in one of the most central aspects of discourse analysis: evaluation in and of written and spoken language. Evaluation is the broad cover term for the expression of a speaker's or writer's attitudes, feelings and values. It covers areas sometimes referred to as stance, modality, affect or appraisal. Evaluation expresses the speaker's opinion and thus reflects the value system of that person and their community. b constructs relations between speaker and hearer or writer and reader. c plays a key role in how discourse is organized. Every act of evaluation expresses and contributes to a communal value system which in turn is a component of the ideology that lies behind every written or spoken text. Conceptually, evaluation is comparative, subjective and value-laden. In linguistic terms, it may be analysed lexically, grammatically and textually. These themes and perspectives are richly exemplified in the chapters of this book by authors aware and observant of the fact that processes of linguistic analysis are themselves inherently evaluative. The editors open the book by introducing the field and provide separate contextual introductions to each chapter. They have also collated the references into one list itself a valuable research guide. The exemplary perspectives and analyses presented by the authors will be of central interest to everyone concerned with the analysis of discourse, whether as students of language, literature or communication. They also have much to offer students of politics and culture. The editors open the book by introducing the field and provide separate contextual introductions to each chapter. Women Workers in the Second World War Penny Summerfield,2013-03-05 The Second World War is often seen as a period of emancipation because of the influx of women into paid work and because the state took steps to relieve women of domestic work This study challenges such a picture The state approached the removal of women from the domestic sphere with extreme caution in spite of the desperate need for women s labour in war work Women s own preferences were frequently neglected or distorted in the search for a compromise between production and patriarchy However the enduring practices of paying women less and treating them as an inferior category of workers led to growth in the numbers and proportions of women employed after the war in many areas of work Penny Summerfield concludes that the war accelerated the segregation of women in inferior sectors of work and inflated the expectation that working women would bear the double burden without a redistribution of responsibility for the domestic sphere between men women and the state First published in 1984 this is an important book for students of history sociology and women s studies at all levels
