The Death Of Distance:

The Death of Distance Frances Cairncross,1997 Frances Cairncross is the media editor for The Economist magazine With this book she offers an analysis of the changes taking place in the telecommunications industry and the effects these will have on business and society *The Death of Distance* Frances Cairncross,1997-11-01 *The Death of Distance 2.0* Frances Cairncross,2001 *Death of Distance* Cairncross,2000-10-01 **The Death of Distance** Frances Cairncross,1997 Examines the ways in which advances in telecommunication will change the way companies do business governments are run and families and friends interact The Death of Distance Harvard Business School Staff,1997-09-01 One of the world s most insightful journalists argues that swiftly unfolding advances in telecommunications will effectively eliminate distance as a perceptible concept from our lives She predicts that this death of distance between individuals the world will work 24 hours a day on three shifts based on the time zones of the Americas Europe the design of the home the strength of local cultures will be enforced while a global culture will develop in parallel dominated by the English language based world on the Internet **The Death of Distance** Frances Cairncross,2001 Topics covered include corporate commerce reinventing government policing the electronic world Information Technology and Organizational Transformation JoAnne Yates,John Van Maanen,2001 Assesses information technology and organizational transformation Moves beyond the superficial glorification of information technology as an instrument of social change examining mechanisms of change as they play out in everyday organizational life Chapters are in sections on the history rhetori **On the Conservation of Distance in International Trade , The Internet Upheaval** Ingo Vogelsang,Benjamin M. Compaine,2000 Early 2000 saw the US economy enjoy the longest period of sustained growth and economic prosperity in its history This book argues that the impact of information technologies particularly the internet partly explain this phenomenon and analyzes the reform of telecommunications policy **The Eroticization of Distance** Joseph D. Kuzma,2016-07-26 In *The Eroticization of Distance* Nietzsche Blanchot and the Legacy of Courtly Love Joseph D Kuzma explores the significance of courtly erotic themes in Friedrich Nietzsche s mature philosophy and in Maurice Blanchot s writings of the 1940s and early 1950s Rather than offering an account of erotic relationality that prioritizes reconciliation fulfillment or release Nietzsche attempts to formulate a nonteleological eroticism that aims at nothing but the perpetual intensification of desire Kuzma suggests that it is Blanchot who carries Nietzsche s courtly erotic tendencies to their most provocative point by highlighting potentials for intimate relationality that might be established through a shared experience of dispossession and loss This first monograph to engage specifically with the theme of eroticism in Blanchot s writings will be of interest not only to students and scholars of Nietzsche Blanchot or French philosophy but also anyone interested in the philosophy of sexuality the history of love theories of the emotions or nineteenth and twentieth century European thought more generally **The Computable City** Michael Batty,2024-03-26 How computers simulate cities and how they are also being embedded in cities changing our behavior and

the way in which cities evolve At every stage in the history of computers and communications it is safe to say we have been unable to predict what happens next When computers first appeared nearly seventy five years ago primitive computer models were used to help understand and plan cities but as computers became faster smaller more powerful and ever more ubiquitous cities themselves began to embrace them As a result the smart city emerged In *The Computable City* Michael Batty investigates the circularity of this peculiar evolution how computers and communications changed the very nature of our city models which in turn are used to simulate systems composed of those same computers Batty first charts the origins of computers and examines how our computational urban models have developed and how they have been enriched by computer graphics He then explores the sequence of digital revolutions and how they are converging focusing on continual changes in new technologies as well as the twenty first century surge in social media platform economies and the planning of the smart city He concludes by revisiting the digital transformation as it continues to confound us with the understanding that the city now a high frequency twenty four hour version of itself changes our understanding of what is possible

Distance Education and Web-based Training Bettina Lankard Brown,1998 *The Pathos of Distance* Jean-Michel Rabaté,2016-04-21 Jean Michel Rabat uses Nietzsche s image of a pathos of distance the notion that values are created by a few gifted and lofty individuals as the basis for a wide ranging investigation into the ethics of the moderns Revealing overlooked connections between Nietzsche s and Benjamin s ideas of history and ethics Rabat provides an original genealogy for modernist thought moving through figures and moments as varied as Yeats and the birth of Irish Modernism the ethics of courage in Virginia Woolf Rilke Apollinaire and others in 1910 T S Eliot s post war despair Jean Cocteau s formidable selfmythology in his first film *The Blood of a Poet* Siri Hustvedt s novel of American trauma and J M Coetzee s dystopia portraying an affectless future haunted by a messianic promise **The Power of Virtual Distance** Karen Sobel Lojeski,Richard R. Reilly,2020-04-06 This revised second edition presents 15 years of data on Virtual Distance metrics and their predictive impact on organizational success factors shedding new light on how to correct for communication challenges that often show up as a foggy set of digital disconnects where the vitality of the virtual workforce often gets lost in transmission This still evolving Digital Age conundrum continues to present new complications The rise of remote work which rests on an increasing reliance on electronic communication and the overall growth of virtual interactions has led to the escalation of a phenomenon called Virtual Distance Virtual Distance which influences our behavior through three components Physical Distance Operational Distance and Affinity Distance affects not only how we relate to others thousands of miles away but even to co workers sitting right next to each other Perhaps even more problematic Virtual Distance causes measureable malfunctions in teamwork innovation leader effectiveness and overall performance But it doesn t have to be this way *The Power of Virtual Distance* offers specific proven and predictable solutions that can reverse these trends and turn Virtual Distance into a unification strategy to capture untapped competitive advantage Surprised *The Power of Virtual*

The Death of Home Saladdin Ahmed Bahozde,2024-04-22 Digital technology has revolutionized connectivity but it has also overcome spatial obstacles that used to shield people from subjugating gazes and unlimited exercise of power The home as an auratic space is dead and this alienation has hindered our democratic capacities and created complex crises The Death of Home aims to intellectually engage readers via enhancing spatial literacy to critically confront today s crises

Introduction to Urban Science Luis M. A. Bettencourt,2021-08-17 A novel integrative approach to cities as complex adaptive systems applicable to issues ranging from innovation to economic prosperity to settlement patterns Human beings around the world increasingly live in urban environments In Introduction to Urban Science Luis Bettencourt takes a novel integrative approach to understanding cities as complex adaptive systems claiming that they require us to frame the field of urban science in a way that goes beyond existing theory in such traditional disciplines as sociology geography and economics He explores the processes facilitated by and in many cases unleashed for the first time by urban life through the lenses of social heterogeneity complex networks scaling circular causality and information Though the idea that cities are complex adaptive

systems has become mainstream until now those who study cities have lacked a comprehensive theoretical framework for understanding cities and urbanization for generating useful and falsifiable predictions and for constructing a solid body of empirical evidence so that the discipline of urban science can continue to develop Bettencourt applies his framework to such issues as innovation and development across scales human reasoning and strategic decision making patterns of settlement and mobility and their influence on socioeconomic life and resource use inequality and inequity biodiversity and the challenges of sustainable development in both high and low income nations It is crucial says Bettencourt to realize that cities are not zero sum games and that knowledge human cooperation and collective action can build a better future

The Defeat of Distance John Gunn, 1985

Managing at a Distance Tom Coughlan, David J. Fogarty, Gary Bernstein, Lynda Wilson, 2024-02-26

The world of hybrid and remote management is a territory that has yet to be completely explored this book provides some simple navigational aids to help managers and leaders find their way Research indicates that over 56% of college graduates currently work either remotely or in a hybrid arrangement while prior to the pandemic less than 5% of working hours were remote How to manage remote and hybrid workers has rapidly become a significant challenge and one that often requires new policies and organizational restructuring The remote work handbooks available are tactical which can be helpful for day to day decisions but not to tackle larger issues and initiatives This book presents a fully formed research backed strategic framework more than a vehicle to the future it will help leaders to understand where they are now and what is happening around them to change the landscape and to decide where they want to be Speaking to senior executives and team leaders as well as business students this book will become the preferred tool for the development and evaluation of remote and hybrid management policy and strategy across industries

La muerte de la distancia Frances Cairncross, 1998

Cada vez con mas frecuencia la geografia las fronteras e incluso el tiempo apenas tienen ya que ver con la forma en que dirigimos nuestros negocios y nuestra vida personal y todo ello gracias a la imparable revolucion que esta experimentando el mundo de las comunicaciones Segun la prestigiosa periodista Frances Cairncross esta B muerte de la distancia B sera la fuerza economica que dara forma al conjunto de la sociedad por lo menos durante la primera mitad del proximo siglo Y por eso su nuevo libro tan profetico como apasionante esta dedicado a proporcionar al lector la guia mas adecuada que concebirse pueda para enfrentarse con animos al milenio siguiente Los amigos los colegas y los clientes pueden estar en cualquier parte a la vuelta de la esquina o en el otro extremo del mundo pero las nuevas formas de comunicacion son capaces de borrar todo tipo de distancias y variar sustancialmente las formas en que hasta ahora se han establecido las relaciones entre paises y ciudadanos empresas y trabajadores padres e hijos Cairncross escribe con elocuencia y de forma convincente sobre los cambios que estan experimentando las comunicaciones y sobre el modo en que las consecuencias de todo esto no solo variaran los conceptos de grande y pequeno rico y pobre sino que tambien influiran en un gran numero de decisiones los lugares en que se ubicaran las empresas la clase de trabajo que haran las personas la

manera en que los gobiernos incrementaran sus ingresos el tipo de negocios que tendra exito el desarrollo y la evolucion de las ciudades etc Y el resultado es tanto un agudo y perceptivo analisis de la industria de las comunicaciones como un fascinante relato de lo que sera la vida tras la muerte definitiva de todas las distancias para nosotros y para las g
