Koutroufinis, 2014-05-21 Alfred North Whitehead is arguably the most original 20th century philosopher of nature and metaphysics In recent decades a number of physicists have produced groundbreaking new theories in fundamental physics influenced by his process philosophy In contrast few biologists are even aware that Whitehead's radical rethinking of the Cartesian assumptions implicit in 19th century sciences might be relevant to their enterprise This book seeks to fill this gap by exploring how Whitehead's process ontology might provide a new philosophical foundation for the biosciences of the 21st century The central premise shared by all of the volume's authors is the idea that all living processes are irreducible processes Each chapter focuses on assumptions implicit in some of the core concepts of biology such as organism evolution information and teleology that play crucial explanatory roles in the biosciences but as metaphysical concepts fall outside its purview The authors each identify important shortcomings implicit in contemporary biological paradigms and show how an approach grounded in a process oriented metaphysics can avoid them *Nature and Resources*, 1987 **Paths to Knowledge** Barbara Sarter, 1988 **Geontologies** Elizabeth A. Povinelli, 2016-09-15 In *Geontologies* Elizabeth A. Povinelli continues her project of mapping the current conditions of late liberalism by offering a bold retheorization of power Finding Foucauldian biopolitics unable to adequately reveal contemporary mechanisms of power and governance Povinelli describes a mode of power she calls geontopower which operates through the regulation of the distinction between Life and Nonlife and the figures of the Desert the Animist and the Virus *Geontologies* examines this formation of power from the perspective of Indigenous Australian maneuvers against the settler state And it probes how our contemporary critical languages anthropogenic climate change plasticity new materialism antinormativity often unwittingly transform their struggles against geontopower into a deeper entwinement within it A woman who became a river a snakelike entity who spawns the fog plesiosaurus fossils and vast networks of rock weirs in asking how these different forms of existence refuse incorporation into the vocabularies of Western theory Povinelli provides a revelatory new way to understand a form of power long self evident in certain regimes of settler late liberalism but now becoming visible much further beyond
