The demography of tropical Africa. [By] W. Brass, A.J. Coale, P. Demeny [a.o.]. ,1968 **The Demography of Africa** Bloomsbury Publishing,1996-11-25 Written lucidly and simply to serve as an introduction to the study of the African continent from a human population perspective this book demonstrates important factors in the ebb and flow of group size and structure using the example of the fastest growing region in the world From a total original population of less than a quarter million in prehistoric times to the present count of 642 million people in 1990 Africa is now demonstrating an annual growth rate of 3 0% the highest on the planet While the rest of the world s population is expected to increase by 60% Africa s is expected to increase by 100% doubling by the year 2025 to a projected total of 1 6 billion people The major factor creating the high growth rate is the drop in death rates while the fertility rates remain high Stress on the population has been related to urbanization which has increased since African countries attained independence in the 1960s Employment opportunities in cities are inadequate and slum conditions have appeared around most major cities Since agriculture remains the major industry and occupation rural development policies are seen to hold the most promise for stemming urban migration and reducing famine and poverty **The Demographic Transition in Tropical Africa** Organisation for Economic Co-operation

and Development. Development Centre. Population Unit,1971 Population and Political Systems in Tropical Africa Robert F. Stevenson,1968 **The Demographic Transition as Applied to Tropical Africa with Particular Reference to Health, Education and Economic Factors: Annex: Statistical tables** Julien Condé,1971 *Population of Tropical Africa* N. i. g. e. r. i. a African Population Conference,1968 *The Population of Tropical Africa* John Charles Caldwell,Chukuka Okonjo,1968 Population Characteristics of the Commonwealth Countries of Tropical Africa Thomas Edward Smith,J. G. C. Blacker,1963 **The Demographics of Empire** Karl Ittmann,Dennis D. Cordell,Gregory H. Maddox,2010-10-05 The Demographics of Empire is a collection of essays examining the multifaceted nature of the colonial science of demography in the last two centuries The contributing scholars of Africa and the British and French empires focus on three questions How have historians demographers and other social scientists understood colonial populations What were the demographic realities of African societies and how did they affect colonial systems of power Finally how did demographic theories developed in Europe shape policies and administrative structures in the colonies The essays approach the subject as either broad analyses of major demographic questions in Africa s history or focused case studies that demonstrate how particular historical circumstances in individual African societies contributed to differing levels of fertility mortality and migration Together the contributors to The Demographics of Empire question demographic orthodoxy and in particular the assumption that African societies in the past exhibited a single demographic regime characterized by high fertility and high mortality
