The Development of Cotton Textile Production in China Kang Chao, 2020-03-17 There are many studies of the Chinese cotton textile industry for various time periods But most of them are rather limited in the scope of inquiry and occasionally their interpretations cannot stand rigorous economic reasoning The present study is an attempt to reorganized the data which are widely scattered in an extremely large number of Chinese historical documents and modern writings in a systematic fashion and to provide an economic analysis This study covers the entire history of the industry Contextual Dictionary of Chinese Cultural Knowledge , 2025-09-23 This dictionary contains nearly 1500 entries and constitutes a core of essential knowledge on Chinese culture in a systematized and modernized form It offers a professional yet highly readable introduction to Chinese culture for a global academic audience Organized by subject and keyword the book is divided into six sections philosophy and ideology social governance literature and history art and aesthetics humanities and geography and artefacts and technology It contains both core knowledge and diversified information while covering both historical and contemporary aspects The target audience chiefly includes general readers of Chinese culture as well as sinologists and translators of Chinese books The dictionary provides the latest information on the full range of Chinese knowledge an accurate interpretation of Chinese culture a logically arranged and accessible reference framework and a panoramic experience across the breadth of the subject It enables readers to grasp the patterns of Chinese culture and its knowledge systems while also gaining a deeper understanding of contemporary Chinese life **Communist China's Cotton Textile Exports** Bernice M. Hornbeck, United States. Foreign Agricultural Service, 1956 **The Ashgate Companion to the History of Textile Workers, 1650-2000** Els Hiemstra-Kuperus, 2016-04-01 This impressive collection offers the first systematic global and comparative history of textile workers over the course of 350 years This period covers the major changes in wool and cotton production and the global picture from pre industrial times through to the twentieth century After an introduction the first part of the book is divided into twenty national studies on textile production over the period 1650 2000 To make them useful tools for international comparisons each national overview is based on a consistent framework that defines the topics and issues to be treated in each chapter The countries described have been selected to included the major historic producers of woollen and cotton fabrics and the diversity of global experience and include not only European nations but also Argentina Brazil China Egypt India Japan Mexico Turkey Uruguay and the USA The second part of the book consists of ten comparative papers on topics including globalization and trade organization of production space identity workplace institutions production relations gender ethnicity and the textile firm These are based on the national overviews and additional literature and will help apply current interdisciplinary and cultural concerns to a subject traditionally viewed largely through a social and economic history lens Whilst offering a unique reference source for anyone interested in the history of a particular country s textile industry the true strength of this project lies in its capacity of

international comparison By providing global comparative studies of key textile industries and workers both geographically and thematically this book provides a comprehensive and contemporary analysis of a major element of the world s economy This allows historians to challenge many of the received ideas about globalization for instance highlighting how global competition for lower production costs is by no means a uniquely modern issue and has b

*China's Economic Revolution* Alexander Eckstein,1977-05-27 Professor Eckstein s book is a study of China s efforts to achieve rapid modernization of its economy within a socialist framework Eckstein begins with an examination of economic development in pre Communist China specifically focusing on the resources and liabilities inherited by the new regime in 1949 and their effects on development policies He then analyses the economic objectives of the Communist leadership narrowing income disparities maintaining full employment without inflation and achieving rapid

industrialization and argues that the implementation of these goals required a potent ideology capable of providing a strong faith and motivational force for the mass mobilization of resources In discussing the methods used by the government to achieve its aims Eckstein makes a thorough evaluation of China's general framework for economic planning particularly in regard to the distribution and pricing of farm products and the allocation of resources in the industrial sector The author also evaluates the radical institutional changes in property relations and in economic organization in the People's Republic of China *Transnational Corporations* Geoffrey Jones,1993 *A History of Qing Economy Studies* Zhu Hu,2023-11-29 This

book is a historiographical study of the economic history of the Qing dynasty that systematically examines the research paradigms underlying the range of historical studies conducted over the past century In reviewing historical studies of the economic history of the Qing dynasty from an epistemological and methodological perspective the book explores how this research area emerged and developed and explores the three major paradigms that dominate the field the revolutionary historical paradigm based on productive relations the modernization paradigm centring on productivity and the Chinese centric approach that seeks to understand the internal momentum of economic development It is shown that shifts in paradigms derive not only from the linear derivation of academic ideas but are also closely related to wider changes in society and social discourse Hence the author proposes an approach that studies economic and social history with an emphasis on social practice shedding light on a better understanding of the direction of China's economic history The title will benefit scholars and students interested in economic history and modern Chinese history *Foreign Agriculture* ,

**Japan, China, and the Growth of the Asian International Economy, 1850-1949** Kaoru Sugihara,2005-03-24 Economic history in modern Asia is commonly written in terms of its impact on the West This book the result of a 1993 workshop held in Osaka on the role of China in the Asian economy argues that the growth of trade and the migration of capital itself has been a strong factor in determining East Asian development The twelve papers in this volume concern themselves with three major themes The first is the importance of economic interactions between Japan and China for example how Japan's industrialization took advantage of the Chinese merchant networks in Asia and how Chinese competition was a critical factor in Japanese organizational and technological upgrading in the periods in between The second theme shows how China's entry into the international economy was shaped by the growth of intra Asian trade by migration and by capital flows and remittances The third is how intra Asian trade enables us to understand the nature of colonialism and the climate of imperialism **Journal of the Textile Institute** Textile Institute (Manchester,

Yudahua from the late nineteenth century to the middle of the twentieth century this study analyzes a successful inland business model among textile companies in modern China The steady growth of this enterprise relied primarily on its strategy to focus on low end markets and to locate new mills in underdeveloped interior regions This strategy further allowed the enterprise to pioneer industrialization in its host localities demonstrating a major social and economic impact on the local societies At the same time Yudahua s unique team leadership pattern five leading families shared its ownership and management made the business an atypical family firm and allowed relatively easy institutional departure from Chinese social networks and adoption of Western corporate hierarchy Therefore by the late 1940s Yudahua had gradually developed into a fairly integrated business group with a unified management structure and routinized connections between its member mills which differed noticeably from the loose alliances normally found in other early twentieth century Chinese business conglomerates

The 46 sociologists featured in this volume are chosen from the pantheon of notable scholars who labored in this burgeoning field. Each of the 46 chapters is devoted to introducing one sociologist. Every chapter begins with a short biography that sheds light on how one sociologist became the scholar they were and earned their place in not only sociology but also for some of them other fields in the social sciences and the humanities. This is followed by a review and analysis of the representative works by this sociologist and how those laid the foundation for and contributed to the early development of a particular field of research in sociology as we know it today. The book weaves together a history of this academic discipline in China over those turbulent decades that organically combines personal details, methodological development, institutional changes, and also larger social, economic, and intellectual trends.
