The Developmental Psychology Of The Black Child:

The Developmental Psychology of the Black Child Amos N. Wilson, 1978 **The African American Child** Yvette R. Harris, James A. Graham, 2007-05-01 This book argues convincingly that children's cultural differences need to be recognized for any accurate understanding of their development. Pointing out the need for additional and more effectively designed research, Harris and Graham provide a valuable foundation for further investigations. This nonpolemic book should be in all libraries, filling an unfortunate gap. Highly recommended. Choice Current Reviews for Academic Libraries. This major new textbook introduces students to issues that have an impact on the lives of African American children but have typically been ignored or inadequately discussed in mainstream child development textbooks. The authors hope to familiarize students with a sampling of research that moves beyond a deficit view of the development of the African American child while stimulating critical thinking about future directions for research on African American children and their families. The book is designed to be student friendly, with each chapter presenting an overview of the material covered as well as an Insider's Voice which offers a personal story or viewpoint about the issues discussed in the chapter. Each chapter goes on to feature a dialogue of current biological, environmental, constructivist, and cultural contextual theories as well as suggestions for additional reading, videos, websites, and questions to guide critical thinking. **The African American Child, Second Edition** Yvette R. Harris, PhD, James Andrew Graham, 2014-02-13 Print CourseSmart **Awakening the Natural Genius of Black Children** Amos N. Wilson, 1992 African children are naturally precocious and gifted. They begin life with a natural head start. However, their natural genius is too frequently underdeveloped and misdirected. In this volume, the author surveys the daily routines, child rearing practices, parent-child interactions, games, and play materials, parent training, and pre-school programs which have made demonstrably outstanding and lasting differences in the intellectual, academic, and social performance of Black children.

Handbook of Early Childhood Intervention Jack P. Shonkoff, Samuel J. Meisels, 2000-05-22 Eighteen new chapters have been added to the 2000 edition of this valuable Handbook which serves as a core text for students and experienced professionals who are interested in the health and well-being of young children. It serves as a comprehensive reference for graduate students, advanced trainees, service providers, and policy makers in such diverse fields as child care, early childhood education, child health, and early intervention programs for children with developmental disabilities and children in high-risk environments. The Development of Social Essentialism, 2020-06-19 Expecting a gentle baby tiger to inevitably grow up to be ferocious a young girl growing up in a household of

boys to prefer princesses to toy trucks or that liberals and conservatives are fundamentally different kinds of people all reflect a conceptual commitment to psychological essentialism. Psychological essentialism is a pervasive conceptual bias to think that some everyday categories reflect the real underlying natural structure of the world. Whereas essentialist thought can sometimes be useful, it is often problematic, particularly when people rely on essentialist thinking to understand groups of people, including those based on gender, race, ethnicity, or religion. This Volume will bring together diverse theoretical and methodological perspectives on how essentialist thinking about the social world develops in childhood and on the implications of these beliefs for children's social behavior and intergroup relations more generally. This volume draws on diverse theoretical perspectives from psychology, philosophy, and linguistics and empirical work from experiments with children and cross-cultural studies to provide a comprehensive view of how social essentialism develops. This volume addresses the link between cognition, essentialist beliefs, and social behavior with implications for prejudice, morality, the justice system, and intergroup relations. By drawing on a diverse evidence base, this volume addresses how beliefs emerge from the interplay among children's conceptual biases and their social experiences. Racial Stereotyping and Child Development Diana T. Slaughter-Defoe, 2012. In contemporary societies, children's racial identity is co-constructed in response to racial stereotyping with extended family, peers, and teachers, and potent media sources. The studies in this volume take cognizance of earlier research into skin colour and racial stereotyping but advance its contemporary implications.
