Tiwari, Madhu Kamle, Zafar Abbas, Priyanka Singh, 2020-01-29. Addressing the most critical issues in the management of emerging diseases throughout the world, experts in plant pathology from internationally renowned institutes share their research and examine key literature. They look at both traditional pathology and advanced biotechnological and molecular diagnosis and integrated management practices. This book is divided into four parts covering viral and fungal disease detection and management, nematode diseases and management, bio control, and biotechnological approaches and impact of climate change. The authors look at the challenges of crop protection against diseases caused by plant pathogens for the most economically important crops. The establishment and management of plant diseases using conventional and eco-friendly methods are discussed with an emphasis on the use of beneficial microbes and modern biotechnological approaches.
