The Dialectic Of Essence:

The Dialectic of Essence Allan Silverman, 2009-02-09 The Dialectic of Essence offers a systematic new account of Plato's metaphysics. Allan Silverman argues that the best way to make sense of the metaphysics as a whole is to examine carefully what Plato says about ousia (essence) from the *Meno* through the middle period dialogues, the *Phaedo* and the *Republic*, and into several late dialogues including the *Parmenides*, the *Sophist*, the *Philebus*, and the *Timaeus*. This book focuses on three fundamental facets of the metaphysics: the theory of Forms, the nature of particulars, and Plato's understanding of the nature of metaphysical inquiry. Silverman seeks to show how Plato conceives of Being as a unique way in which an essence is related to a Form. Conversely, partaking (having) is the way in which a material particular is related to its properties. Particulars, thus, in an important sense, lack essence. Additionally, the author closely analyzes Plato's idea that the relation between Forms and particulars is mediated by forms (copies). Even when some late dialogues provide a richer account of particulars, Silverman maintains that particulars are still denied essence. Indeed, with the *Timaeus*'s introduction of the receptacle, there are no particulars of the traditional variety. This book cogently demonstrates that when we understand that Plato's concern with essence lies at the root of his metaphysics, we are better equipped to find our way through the labyrinth of his dialogues and to better appreciate how they form a coherent theory.

Being and Dialectic Brian Jonathan Wolk, 2016-10-07 Existential dialectical materialism is the philosophic synthesis of Marxism, dialectical materialism, and existentialism, providing the delineation of a new philosophic paradigm based on a more adequate view of humanity and the nature of human reality. *Being and Dialectic* sets forth the core principles of the philosophy. Among other insights, the new and intriguing law of politicoeconomic entropy is shown to naturally arise from the

philosophy's deductive structure Existential dialectical materialism is at once both a philosophy of revolution and conservatism being the rational result of the necessary dialectic development of political philosophical theory and thought

Marx and Hegel on the Dialectic of the Individual and the Social Sevgi Dogan, 2018-08-15 Marx and Hegel on the Dialectic of the Individual and the Social is a detailed investigation of the major works of Hegel and the young Marx with exploring how the concept of the individual is positioned within their ontologies and how this positioning is reflected in their related political views Instead of contrasting a Marxist understanding of the individual with that of a liberal thinker Sevgi Dogan chooses to take Hegel's theory of the state as representative of the modern state which Marx criticizes The decision to be in opposition to Hegel rather than some other liberal thinkers is important for two reasons First since Marx has developed many of his early ideas in critical interaction with Hegel this comparative approach enables the book to present a more thorough and well grounded exposition of Marx's arguments Second since Hegel himself has also criticized the concepts of liberal ideology in many respects differentiating Marx's arguments from those of Hegel's enables the book to underline how and why Hegel's critique of liberal ideology falls short of actually empowering individuals in the way that Marx's account does *The Dialectic of Capital (2 Vols.)* Thomas Sekine, 2020-07-13 This is the first book written in English that tries to expose the thing in itself or inner logic of capitalism in a form homomorphic to Hegel's Logic following the method previously established in Japan by K z Uno 1987 1977 Neither bourgeois liberal nor even conventionally Marxist economics possess a logical hence objective knowledge of capitalism as such which is regrettable The manuscript of this book was completed in typescript at York University Canada in 1983 then privately published in that form by the author in about 500 copies which are by now virtually dispersed In order however to re launch economics as objective knowledge when the world must prepare itself to correctly terminate capitalism we need to rediscover a book of this kind as a dependable guide **The Dialectics of Creation** Martin G. Poulson, 2014-03-13 This book investigates the philosophical components of Christian faith in creation by analyzing the distinction and the relation between creation and its Creator The writings of Edward Schillebeeckx and David Burrell supply a terminology of distinction and relation that shapes the discourse following in the footsteps of Aquinas Poulson elucidates the relational dialectic in the thought of Schillebeeckx as a way of thinking about the Creation and offers a helpful comparison with the thought of David Burrell Relational dialectic is an organizing principle not only of Schillebeeckx's account of creation but of his philosophical theology more generally It can operate as a hermeneutic for his material on praxis and humanism in a way that resolves some problems noted by other Schillebeeckx scholars Poulson's interpretation of Schillebeeckx enriches current approaches to this thinker and offers a significant contribution to thinking on the doctrine of Creation and issues surrounding the ontological distinction which is of major concern in philosophical theology today Valences of the Dialectic Fredric Jameson, 2020-05-05 After half a century exploring dialectical thought renowned cultural critic Fredric Jameson presents a comprehensive study of a misunderstood yet vital strain in Western

philosophy The dialectic the concept of the evolution of an idea through conflicts arising from its inherent contradictions transformed two centuries of Western philosophy To Hegel who dominated nineteenth century thought it was a metaphysical system In the works of Marx the dialectic became a tool for materialist historical analysis Jameson brings a theoretical scrutiny to bear on the questions that have arisen in the history of this philosophical tradition contextualizing the debate in terms of commodification and globalization and with reference to thinkers such as Rousseau Lukcs Heidegger Sartre Derrida and Althusser Through rigorous erudite examination Valences of the Dialectic charts a movement toward the innovation of a spatial dialectic Jameson presents a new synthesis of thought that revitalizes dialectical thinking for the twenty first century

Dialectics of the Concrete K. Kosík,2012-12-06 Kosík writes that the history of a text is in a certain sense the history of its interpretations In the fifteen years that have passed since the first Czech edition of his Dialectics of the Concrete this book has been widely read and interpreted throughout Europe in diverse centers of scholarship as well as in private studies A faithful English language edition is long overdue This publication of Kosík's work will surely provoke a range of new interpretations For its theme is the characterization of science and of rationality in the context of the social roots of science and the social critique which an appropriately rational science should afford Kosík's question is How shall Karl Marx's understanding of science itself be understood And how can it be further developed In his treatment of the question of scientific rationality Kosík drives bluntly into the issues of gravest human concern not the least of which is how to avoid the pseudo concrete the pseudo scientific the pseudo rational the pseudo historical Starting with Marx's methodological approach of ascending from the abstract to the concrete Kosík develops a critique of positivism of phenomenalist empiricism and of metaphysical rationalism counter posing them to dialectical rationalism He takes the category of the concrete in the dialectical sense of that which comes to be known by the active transformation of nature and society by human purposive activity

A New Exploration of Hegel's Dialectics II Deng Xiaomang,2022-05-10 Focusing on the self negation and reflective forms of Hegel's dialectics and representing the spirit of nous and logos respectively this volume explores core functions in the subjectivity free spirit and practicality of Hegelian dialectics As the second volume of a three volume set that

gives insights into Hegel's dialectics and thereby his overall philosophical thought the book proposes and discusses the soul and form of Hegelian dialectics As the soul of Hegel's dialectics which represents the spirit of nous self negation plays a fundamental role in Hegel's philosophy and all other dialectical laws derive from this core principle with which the subjectivity and free spirit of Hegel's dialectics take shape along with their essential practicality The form of expression belonging to this negative dialectic as such is the reflective mode of thinking that represents the spirit of logos and it is this reflective mode of thinking that follows the logical procedure of reflecting on reflection rendering the progression of Hegel's dialectical subject lawful rational and logical The title will appeal to scholars and students interested in Hegel's and Marx's philosophy German classical philosophy and Western philosophy

New Being Kenan B. Osborne, 2013-11-21 The following study on Tillich's theology is based on a doctoral dissertation presented to the Ludwig Maximilian University at Munich in December 1967 Tillich's theology however is not a simple structure to analyze since it is so systematically interrelated Certainly every major area of his theological system involves all other major areas and even the minor areas have complex ramifications to the total system itself The following pages therefore can only be construed as one among many viewpoints of his system Tillich's theological structure might be compared to a painting or some other work of art one must view it now from this direction now from that in order to appreciate the total effect Certain points should however be mentioned here First of all a key notion in this system is essentialization This concept rounds off and completes Tillich's entire work Unfortunately Tillich himself did not write extensively on this topic nor did he actually correlate it to the beginning and middle of his system although it expresses the final telos of his entire theological work I have drawn out of the Systematic Theology as much as possible on the subject of essentialization and have tried to analyze it in light of other key concepts in his system

C.L.R. James's Notes on Dialectics John H. McClendon, 2005-01-01 John H. McClendon III's CLR James's Notes on Dialectics Left Hegelianism or Marxism Leninism is the first ever book devoted exclusively to James's magnum opus Notes on Dialectics Hegel Marx Lenin The seed for this study was planted over thirty years ago when James handed the author his personal copy of Notes James's contribution to dialectical philosophy and his vast intellectual and

scholarly output is rivalled only by the seemingly bottomless depths of McClendon's own analysis and erudition. McClendon provides a thoroughgoing critique of James's exploration into the dialectic of Hegel, Marx, and Lenin while challenging all the seminal texts on James's *Notes*. A book of this magnitude is rare. This is ever more the truth when it is focused on a giant like James who stands at the nexus of so many disciplines: philosophy, history, sociology, Caribbean studies, cultural studies, African and African American studies. CLR James's *Notes on Dialectics: Left Hegelianism or Marxism-Leninism* is a must read for anyone concerned with how revolutionary theory is a guide to contemporary struggles. *God, History, and Dialectic* Joseph P. Farrell, 1997-10. The Dialectic of Historicity in Modernist Fiction: a Study Based on Select Works of O V Vijayan and M Mukundan Swapna Gopinath, 2017-12-15. Modernism, when viewed through the spectacles of Marxian aesthetics, emerges as a problematic artistic movement, especially when placed within the context of social structures that define the cultural practices at any given point in time. The much-discussed debate within the Marxist canon regarding the dialectic relationship between society and art in the context of modernism had stalwarts of Marxist criticism deliberating this relationship between art and society. From Europe, modernism spread to other parts of the world, including India, where it captured the imagination of the writers of regional languages as well. In Kerala, with its staunch Marxian perspectives and its supporters, including a faithful political network of leaders and followers, modernism invited heated debates of a similar nature. A debate was triggered off, challenging the ideological frameworks of modernist aesthetics, with a large part of the intelligentsia actively participating in it. Kerala Kaumudi magazine published these arguments as a series, leading to further discussions in the cultural and political discourses that shaped the sensibility of the times. This book is an attempt to explore this relationship with these debates and discussions as referral points. To substantiate the arguments, four texts that emerged as iconic texts are studied: O V Vijayan's *The Legends of Khasak* (1969) and *The Saga of Dharmapuri* (1985) and M Mukundan's *On the Banks of Mayyazhi* (1974) and *God's Mischief* (1989). Dialectics and Deconstruction in Political Economy R. Albritton, 1999-06-08. Robert Albritton offers the most authoritative reassessment of Marxist political economy since Althusser. Original reinterpretations of thinkers including Hegel, Weber, Althusser, Derrida, and Adorno cast new light on heated battles between Hegelian dialectics and deconstructivist criticism. The book makes accessible the sometimes daunting thought associated with both dialectics and deconstruction, drawing upon insights from philosophy, sociology, political science, and critical theory. Finding a non-essentialist way of using the immense cognitive power of dialectics, accepting a limited deconstruction but challenging further deconstructionist directions, represents a major breakthrough for political economy. *Hegel, Deleuze, and the Critique of Representation* Henry Somers-Hall, 2012-02-14. Hegel, Deleuze, and the Critique of Representation provides a critical account of the key connections between twentieth-century French philosopher Gilles Deleuze and nineteenth-century German idealist G W F Hegel. While Hegel has been recognized as one of the key targets of Deleuze's philosophical writing, Henry Somers Hall shows how Deleuze's antipathy to Hegel has its roots in a problem the two thinkers

both try to address getting beyond a philosophy of judgment and the restrictions of Kant's transcendental idealism. By tracing the development of their attempts to address this problem, Somers Hall offers an interpretation of the sweep of nineteenth and twentieth century philosophy providing a series of analyses of key moments in the history of thought including the logics of Aristotle and Russell, Kant's own philosophy of judgment and the philosophy of Bergson. He also develops a novel interpretation of Deleuze's philosophy of difference and situates his philosophy in relation to the broader post-Kantian tradition. In addition to Deleuze's relation to Hegel, the book makes important contributions to the study of Deleuze's philosophy of mathematics as well as to the study of several underappreciated areas of Hegel's own philosophy. **Digital**

Democracy and the Digital Public Sphere Christian Fuchs, 2022-11-30 This sixth volume in Christian Fuchs' Media Communication and Society series draws on radical Humanist theory to address questions around the digital public sphere and the challenges and opportunities for digital democracy today. The book discusses topics such as digital democracy, the digital public sphere, digital alienation, sustainability in digital democracy, journalism and democracy, public service media, the public service Internet, and democratic communications. Fuchs argues for the creation of a public service Internet run by public service media that consists of platforms such as a public service YouTube and Club 2.0, a renewed digital democracy, and a digital public sphere version of the legendary debate programme formats Club 2 and After Dark. Overall, the book presents foundations and analyses of digital democracy that are interesting for both students and researchers in media studies, cultural studies, communication studies, political science, sociology, Internet research, information science, as well as related disciplines. *Dialectic and Gospel in the Development of Hegel's Thinking* Stephen Crites, 2010-11-01 The

Ontology of Prejudice Jon Mills, Janusz A. Polanowski, 2021-11-01 This book offers a bold and controversial new thesis regarding the nature of prejudice. The authors' central claim is that prejudice is not simply learned; rather, it is predisposed in all human beings and is thus the foundation for ethical valuation. They aim to destroy the illusion that prejudice is merely the result of learned beliefs, socially conditioned attitudes, or pathological states of development. Contrary to traditional accounts, prejudice itself is not a negative attribute of human nature; rather, it is the necessary precondition for the self and civilization to emerge. Defined as the preferential self-expression of valuation, prejudice gives rise to greater existential complexities and novelties that elevate selfhood and society to higher states of ethical realization. Rather than offer another contribution that highlights the destructive nature of prejudice, Mills and Polanowski address the ontological, psychological, and dialectical origins of prejudice as it manifests itself in the process of selfhood and culture. They provide an original conceptualization of the phenomenology of prejudice and its dialectical instantiation in the ontology of the individual worldhood and the very structures of subjectivity. As a unique synthesis of psychoanalysis, Hegelian idealism, Heideggerian existential ontology, and Whiteheadian process philosophy, prejudice is the indispensable ground for humanity to actualize its highest potentiality for Being. The striking result is 1) a revolutionary theory of human nature, 2) a new ethical system, and 3) the elevation of dialectical

ethics to the domain of metaphysics
