National Research Council,Division on Earth and Life Studies,Board on Environmental Studies and Toxicology,Committee on Toxicology,Subcommittee on Acute Exposure Guideline Levels,2004-05-16 The Bhopal Disaster of 1984 resulted in the death of around 2 000 residents living near chemical plants and irreversible injuries to more than 20 000 other residents These numbers can be attributed to the community s lack of awareness concerning the chemicals existence dangers and effects and or how to react in case of emergency The disaster emphasized the need for governments to identify hazardous substances and to aid local communities in developing plans for emergency exposures As a result the United States government issued the Superfund Amendments and Reauthorization Act SARA of 1986 requiring the identification of extremely hazardous substances EHSs by the Environmental Protection Agency EPA EPA was also tasked with assisting Local Emergency Planning Committees LEPCs in conducting health hazard assessments to develop emergency response plans for sites where EHSs are produced stored transported or used The EPA identified nearly 400 EHSs in terms of their immediate danger to life and health IDLH as their first step in assisting these LEPCs In 1991 the EPA went on to request that the National Research Council NRC Committee on Toxicology COT develop criteria and methods for developing emergency exposure levels for EHSs for the general population The COT who had published many reports on emergency exposure guidance levels at the time designated the task to a subcommittee The subcommittee focused on Guidelines for Developing Community Emergency Exposure Levels for Hazardous Substances Four years later the National Advisory Committee for Acute Exposure Guideline Levels for Hazardous Substances NAC was created with a focus on identifying reviewing and interpreting relevant toxicologic and other scientific data and developing acute exposure guideline levels AEGLs for high priority acutely toxic chemicals In *Acute Exposure Guideline Levels for Selected Airborne Chemicals Volume 4* the NAC outlines acute exposure guideline levels for chlorine hydrogen chloride toluene 2 4 hydrogen fluoride 2 6 diisocyanate and uranium hexafluoride *LDAP Directories Explained* Brian Arkills,2003 Directory services matter to nearly every organization because they help centrally manage information and thereby reduce the costs of computing services LDAP Lightweight Directory Access Protocol is a set of protocols that have become the internet standard for accessing directories Many people need to understand directory services and LDAP in order to make decisions for their business The books currently available are too advanced for technical managers and those new to directory services This book is designed to fill that need The author spends the first half of the book exploring how directory services and LDAP work and then the second half discussing the most popular implementations OpenLDAP Microsoft Active Directory and Directory Server for those who are trying to compare products This book provides the technical foundation that will enable IT managers to make sound business decisions and developers to move on to more advanced books Fatal Sunday Mark Edward Lender,Garry Wheeler Stone,2016-04-18 Historians have long considered the

Battle of Monmouth one of the most complicated engagements of the American Revolution Fought on Sunday June 28 1778 Monmouth was critical to the success of the Revolution It also marked a decisive turning point in the military career of George Washington Without the victory at Monmouth Courthouse Washington s critics might well have marshaled the political strength to replace him as the American commander in chief Authors Mark Edward Lender and Garry Wheeler Stone argue that in political terms the Battle of Monmouth constituted a pivotal moment in the War for Independence Viewing the political and military aspects of the campaign as inextricably entwined this book offers a fresh perspective on Washington s role in it Drawing on a wide range of historical sources many never before used including archaeological evidence Lender and Stone disentangle the true story of Monmouth and provide the most complete and accurate account of the battle including both American and British perspectives In the course of their account it becomes evident that criticism of Washington s performance in command was considerably broader and deeper than previously acknowledged In light of long standing practical and ideological questions about his vision for the Continental Army and his ability to win the war the outcome at Monmouth a hard fought tactical draw was politically insufficient for Washington Lender and Stone show how the general s partisans determined that the battle for public opinion would be won in his favor engineered a propaganda victory for their chief that involved the spectacular court martial of Major General Charles Lee the second ranking officer of the Continental Army Replete with poignant anecdotes folkloric incidents and stories of heroism and combat brutality filled with behind the scenes action and intrigue and teeming with characters from all walks of life Fatal Sunday gives us the definitive view of the fateful Battle of Monmouth [Forthcoming Books](#) Rose Army,2002-02 **The Europa Directory of**
