Unlike their colleagues in music theory and music education teachers of music history have tended not to commit their pedagogical ideas to print. This collection of essays seeks to help redress the balance providing advice and guidance to those who teach a college level music history or music appreciation course be they a graduate student setting out on their teaching career or a seasoned professor having to teach outside his or her speciality. Divided into four sections the book covers the basic music history survey usually taken by music majors music appreciation and introductory courses aimed at non majors special topic courses such as women and music music for film and American music and more general issues such as writing using anthologies and approaches to teaching in various situations. In addition to these specific areas broader themes emerge across the essays. These include how to integrate social history and cultural context into music history teaching the shift away from the classical canon and how to organize a course taking into consideration time constraints and the need to appeal to students from a diverse range of backgrounds. With contributions from both teachers approaching retirement and those at the start of their careers this volume provides a spectrum of experience which will prove valuable to all teachers of music history. *The Development of Western music: From ancient times through the classical era* K Marie Stolba, 1994
