Diamond Lens and Other Strange Tales Fitz James O'Brien, 2002-08 Fitz James O'Brien lived only 33 years from 1828 till 1862 but in his brief life he left a mark that endures today O'Brien endures because he was a remarkable writer Remarkable indeed He had a way of blending of hard fact with almost fanciful fantasy juxtaposing technology and mysticism creating convincing and scientific settings that play against the otherworldly romance For all the weird fancifulness these days O'Brien is read mostly as a successor to Poe his work has qualities we now associate with science fiction O'Brien clearly researched the field of microscopy before he wrote *The Diamond Lens* it reads in places like hard SF **The Diamond Lens** Fitz James O'Brien, 2013-07 FROM a very early period of my life the entire bent of my inclinations had been toward microscopic investigations When I was not more than ten years old a distant relative of our family hoping to astonish my inexperience constructed a simple microscope for me by drilling in a disk of copper a small hole in which a drop of pure water was sustained by capillary attraction This very primitive apparatus magnifying some fifty diameters presented it is true only indistinct and imperfect forms but still sufficiently wonderful to work up my imagination to a preternatural state of excitement Seeing me so interested in this rude instrument my cousin explained to me all that he knew about the principles of the microscope related to me a few of the wonders which had been accomplished through its agency and ended by promising to send me one regularly constructed immediately on his return to the city I counted the days the hours the minutes that intervened between that promise and his departure *The Diamond Lens* Fitz James O'Brien, 2014-07-07 FROM a very early period of my life the entire bent of my inclinations had been toward microscopic investigations When I was not more than ten years old a distant relative of our family hoping to astonish my inexperience constructed a simple microscope for me by drilling in a disk of copper a small hole in which a drop of pure water was sustained by capillary attraction This very primitive apparatus magnifying some fifty diameters presented it is true only indistinct and imperfect forms but still sufficiently wonderful to work up my imagination to a preternatural state of excitement Seeing me so interested in this rude instrument my cousin explained to me all that he knew about the principles of the microscope related to me a few of the wonders which had been accomplished through its agency and ended by promising to send me one regularly constructed immediately on his return to the city I counted the days the hours the minutes that intervened between that promise and his departure Meantime I was not idle Every transparent substance that bore the remotest resemblance to a lens I eagerly seized upon and employed in vain attempts to realize that instrument the theory of whose construction I as yet only vaguely comprehended All panes of glass containing those oblate spheroidal knots familiarly known as bull's eyes were ruthlessly destroyed in the hope of obtaining lenses of marvelous power I even went so far as to extract the crystalline humor from the eyes of fishes and animals and endeavored to press it into the microscopic service I plead guilty to having

stolen the glasses from my Aunt Agatha's spectacles with a dim idea of grinding them into lenses of wondrous magnifying properties in which attempt it is scarcely necessary to say that I totally failed
