Sky Fever The Autobiography Of Sir Geoff:

Sky Fever Sir Geoffrey De Havilland,1961 *Sky Fever: the Autobiography of Sir Geoffrey de Havilland, C.B.E.* Sir Geoffrey DE HAVILLAND,1961 Sky Fever Geoffrey De Havilland,1999-07-01 **The Man Who Built the Swordfish** Adrian Smith,2018-04-30 Sir Richard Fairey was one of the great aviation innovators of the twentieth century His career as a plane maker stretched from the Edwardian period to the jet age he lived long enough to see one of his aircraft be the first to break the 1000mph barrier and at least one of his designs the Swordfish holds iconic status A qualified engineer party to the design development and construction of the Royal Navy s state of the art sea planes Sir Richard founded Fairey Aviation at the Admiralty s behest in 1915 His company survived post war retrenchment to become one of Britain s largest aircraft manufacturers The firm built a succession of front line aircraft for the RAF and the Fleet Air Arm including the iconic Swordfish In addition Fairey Aviation designed and built several cutting edge experimental aircraft including long distance record breakers between the wars and the stunningly beautiful Delta 2 which broke the world speed record on the eve of Sir Richard s death in 1956 Fairey also came to hold a privileged position in the British elite courting politicians and policymakers He became a figurehead of the British aviation industry and his successful running of the British Air Commission earned him a knighthood A key player at a pivotal moment Fairey s life tells us much about the exercise of power in early twentieth century Britain and provides an insight into the nature of the British aviation manufacturing industry at its wartime peak and on the cusp of its twilight years *Secret Warriors* Taylor Downing,2015-04-15 World War I is often viewed as a war fought by armies of millions living and fighting in trenches aided by brutal machinery that cost the lives of many But behind all of this an intellectual war was also being fought between engineers chemists code breakers physicists doctors mathematicians and intelligence gatherers This hidden war was to make a positive and lasting contribution to how war was conducted on land at sea and in the air and most importantly life at home *Secret Warriors* provides an invaluable and fresh history of the World War I profiling a number of the key incidents and figures which lead to great leaps forward for the twentieth Century Told in a lively and colorful narrative style *Secret Warriors* reveals the unknown side of this tragic conflict *A History of the Royal Navy: World War I* Mike Farquharson-Roberts,2014-07-08 World War I is one of the iconic conflicts of the modern era For many years the war at sea has been largely overlooked yet at the outbreak of that war the British Government had expected and intended its military contribution to be largely naval This was a war of ideologies fought by and for empires Britain was not defending simply an island it was defending a far flung empire Without the navy such an undertaking would have been impossible In many respects the Royal Navy fought along the longest front of any fighting force of the Great War and it acted as the leader of a large alliance of navies The Royal Navy fought in the North and South Atlantic in the North and South Pacific its ships traversed the globe from Australia to England and its presence extended the war to every continent except Antarctica Because of the Royal Navy Britain could finance and resource not only

its own war effort but that of its allies Following the naval arms race in the early 20th century both Britain and Germany were equipped with the latest naval technology including revolutionary new vessels such as dreadnoughts and diesel powered submarines Although the Royal Navy's operations in World War I were global a significant proportion of the fleet's strength was concentrated in the Grand Fleet which confronted the German High Seas Fleet across the North Sea At the Battle of Jutland in 1916 the Royal Navy under the command of Admiral Jellicoe fought an iconic if inconclusive battle for control of shipping routes The navy might not have been able to win the war but as Winston Churchill put it she could lose it in an afternoon The Royal Navy was British power and prestige 43 244 British navy personnel would lose their lives fighting on the seas in World War I This book tells their story and places the Royal Navy back at the heart of the British war effort showing that without the naval dimension the First World War would not have been a truly global conflict Sky Fever Sir Geoffrey De Havilland, 1979 Selvbibliografi af den berømte engelske flyvepioner og flykonstruktør Sir Geoffrey de Havilland

The Birth of Military Aviation Hugh Driver, 1997 A survey of the development of British military aviation from 1903 to 1914 revealing the consequences of its annexation by the state as a branch of armaments as an underlying cause of aircraft inadequacies on the outbreak of war A mine of information drawing on an impressive range of archives It will become an important point of reference ENGLISH HISTORICAL REVIEW This book aims to demonstrate how the crisis evident in British military aviation in the early years of the First World War was inherent in the entire development of aviation in the years preceding the conflict After outlining the work of the early pioneers and the growth of an aviation industry as a branch of armaments Dr Driver considers the objectives of the War Office in increasingly seeking to divert design development to their research establishment at Farnborough He shows how the resultant virtual state monopoly in design and procurement had disastrous consequences for aircraft innovation and development suffocating both competition and initiative and leading to the maintenance of inadequate aircraft by the Royal Flying Corps following the outbreak of war The continuing dispute and its culmination in the Fokker Scourge controversy of 1915-1916 graphically characterise the strained development of military industrial relations in this area Dr HUGH DRIVER gained an MA in War Studies from King's College London and a D Phil in modern history at Oriel College Oxford Speedbird Robin Higham, 2013-05-30 Between 1939 and 1946 BOAC the British Overseas Airways Corporation was the nationalised airline of Great Britain and between 1946 and 1974 as such it exclusively operated all long haul British flights With its iconic Speedbird logo and its central role in the glamorous jet age of the 1950s and 1960s BOAC achieved a near cult status with admirers around the globe Yet to date there has been no comprehensive history of the organisation covering its structure fleet and the role it played in the critical events of the age from World War II to the end of empire a period when BOAC played a pivotal part in projecting British political power even as that power was waning During World War II BOAC operated a limited wartime service and prepared for the return of commercial flight in the postwar era But it was in the service of Britain's colonies and latterly the process of decolonisation that BOAC achieved its

most pivotal role The development of flight technology enabled much faster connections between Britain and her imperial possessions as the colonies prepared for independence BOAC ferried diplomats politicians and colonial administrators between London and the far flung corners of Africa and Asia in much faster times than had previously been possible In this book acclaimed historian Robin Higham presents a unique comprehensive study of BOAC from the early jet travel of the de Havilland Comet and the Vickers VC10 to the dawn of supersonic passenger aviation Highly illustrated and meticulously researched using previously unseen sources this book will be essential reading for all aviation enthusiasts and anyone interested in the history of modern Britain

England and the Aeroplane David

Edgerton, 2013-04-04 The story of the strange mixture of romanticism militarism and technology that has made planes so important to England from the brilliant author of Britain's War Machine The history of England and the aeroplane is one tangled with myths of the Few and the Blitz of boffins flying machines amateur inventors and muddling through In England and the Aeroplane David Edgerton reverses received wisdom showing that the aeroplane is a central and revealing aspect of an unfamiliar English nation a warfare state dedicated to technology industry empire and military power England had the strongest air force in the Great War the largest industry in the world in the 1920s outproduced Germany by 50% at the time of the Battle of Britain and was the third largest producers of aeroplanes well after this time In a revelatory recounting of the story of aeronautical England from its politics to its industry and culture David Edgerton reconfigures some of the most important chapters of our history Reviews A brilliant polemic Guardian Full of good stories an illuminating read Spectator A tour de force after which the history of the aircraft industry will never be quite the same again Business History David Edgerton's sure footed essay sees Britain from an unusual perspective His arguments provide sound backing for the idea that modern Britain is as much a warfare state as a welfare one Economist About the author David Edgerton is Hans Rausing Professor at Imperial College London where he was the founding director of the Centre for the History of Science Technology and Medicine He is the author of a sequence of groundbreaking books on 20th century Britain Science Technology and the British Industrial Decline 1870 1970 Warfare State Britain 1920 1970 and Britain's War Machine published by Penguin He is also the author of the iconoclastic and brilliant The Shock of the Old Technology and Global History Since 1900

Wings for the Rising Sun Jürgen P. Melzer, 2021-02-01 The history of Japanese aviation offers countless stories of heroic achievements and dismal failures passionate enthusiasm and sheer terror brilliant ideas and fatally flawed strategies In Wings for the Rising Sun scholar and former airline pilot Jürgen Melzer connects the intense drama of flight with a global history of international cooperation competition and conflict He details how Japanese strategists diplomats and industrialists skillfully exploited a series of major geopolitical changes to expand Japanese airpower and develop a domestic aviation industry At the same time the military and media orchestrated air shows transcontinental goodwill flights and press campaigns to stir popular interest in the national aviation project Melzer analyzes the French British German and American influence on Japan's aviation revealing in unprecedented detail how Japanese aeronautical experts absorbed foreign technologies at breathtaking speed Yet they also designed and built boldly original flying machines that in many respects surpassed those of their mentors Wings for the Rising Sun compellingly links Japan's aeronautical advancement with public mobilization international relations and the transnational flow of people and ideas offering a fresh perspective on modern Japanese history
