The Geography Of Nationalism In Russia And The Ussr:

The Geography of Nationalism in Russia and the USSR Robert J. Kaiser, 2017-03-14 The Geography of Nationalism in Russia and the USSR is an important addition to the small library of essential works on the collapse of the Soviet empire The first attempt to construct and test broad theoretical propositions about place and territoriality in the making of nations it examines the critical social processes underlying the formation of nations and homelands in Russia and the USSR during the nineteenth and twentieth centuries Robert Kaiser finds that for the most part national self consciousness was only beginning to supplant a localist mentality by the time of World War I The national problem faced by Lenin was fundamentally different from the more difficult nationalist challenge that confronted Gorbachev In Kaiser s place based theory the homeland once created in the imaginations of the indigenous masses powerfully structured national processes and international relations Indigenization from below became an active competitor with nationality policies that promoted Russification resulting in the restructuring of ethnic stratification to favor indigenes in their own respective home republics and to challenge Russian dominance outside Russia The revolutionary changes occurring since 1989 Kaiser argues should therefore be seen as part of a longer process of indigenization Originally published in 1994 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **A History of Russia**

From Socialist to Post-Socialist Cities Alexander C. Diener,Joshua Hagen,2016-04-14 The development of post socialist cities has become a major field of study among critical theorists from across the social sciences and humanities Originally constructed under the dictates of central planners and designed to serve the demands of command economies post socialist urban centers currently develop at the nexus of varied and often competing economic cultural and political forces Among these nationalist aspirations previously simmering beneath the official rhetoric of communist fraternity and veneer of architectural conformity have emerged as dominant factors shaping the urban landscape This book explores this burgeoning field of research through detailed cases studies relating to the cultural politics of architecture urban planning and identity in the post socialist cities of Eurasia This book was published as a special issue of Nationalities Papers

Ethnic Relations in Post-Soviet Russia Andrew Foxall,2014-10-03 While the collapse of communism in Russia was relatively peaceful ethnic relations have been deteriorating since then This deterioration poses a threat to the functioning of the Russian state and is a major obstacle to its future development Analysing ethnic relations in the North Caucasus this book demonstrates how a myriad of processes that characterised post Soviet transition including demographic change economic upheaval geopolitical instability and political re structuring have affected daily life for citizens It raises important questions about ethnicity identity nationalism sovereignty and territoriality in the post Soviet space

Kazakhstan in the Making Marlene Laruelle,2016-11-21 Kazakhstan is one of the best known success stories of Central Asia perhaps even of the entire Eurasian

space It boasts a fast growing economy at least until the 2014 crisis a strategic location between Russia China and the rest of Central Asia and a regime with far reaching branding strategies But the country also faces weak institutionalization patronage authoritarianism and regional gaps in socioeconomic standards that challenge the stability and prosperity narrative advanced by the aging President Nursultan Nazarbayev This policy oriented analysis does not tell us a lot about the Kazakhstani society itself and its transformations This edited volume returns Kazakhstan to the scholarly spotlight offering new multidisciplinary insights into the country s recent evolution drawing from political science anthropology and sociology It looks at the regime s sophisticated legitimacy mechanisms and ongoing quest for popular support It analyzes the country s fast changing national identity and the delicate balance between the Kazakh majority and the Russian speaking minorities It explores how the society negotiates deep social transformations and generates new hybrid local and global cultural references
