The Geography Of United States Poverty Patterns Of Deprivation 1980 199:

The Geography of United States Poverty Wendy Shaw, 2015-11-19 Until this book was originally published in 1996 there had been little detailed research concerning the geographic location of the poor in America The book examines the spatial distribution of the poor within the US and discusses the general characteristics of the poverty population It explores the complex web of theory pertaining to poverty presenting different categories no fault theories individual responsibility theories societal responsibility theories governmental and institutional responsibility theories and responsibility of the economic system theories Information on poverty from the 1980s and 90s in the US is provided as well as historical background The problems and complexities associated with defining and measuring poverty are also discussed *American Book Publishing Record*, 1997 **The Cumulative Book Index**, 1997 A world list of books in the English language **The New Urban Frontier** Neil Smith, 1996 Why have so many central and inner cities in Europe North America and Australia been so radically revamped in the last three decades converting urban decay into new chic Will the process continue in the twenty first century or has it ended What does this mean for the people who live there Can they do anything about it This book challenges conventional wisdom which holds gentrification to be the simple outcome of new middle class tastes and a demand for urban living It reveals gentrification as part of a much larger shift in the political economy and culture of the late twentieth century Documenting in gritty detail the conflicts that gentrification brings to the new urban frontiers the author explores the interconnections of urban policy patterns of investment eviction and homelessness The failure of liberal urban policy and the end of the 1980s financial boom have made the end of the century city a darker and more dangerous place Public policy and the private market are conspiring against minorities working people the poor and the homeless as never before In the emerging revanchist city gentrification has become part of this policy of revenge **Building the Urban Environment** Harold L Platt, 2015-10 History and critique of post World War II urban planning explores its effects on the environment race labor housing and municipal administration **The Global Casino** Nick Middleton, 2024-09-03 The Global Casino is an introduction to environmental issues which deals both with the workings of the physical environment and the political economic and social frameworks in which the issues occur Using examples from all over the world the book highlights the underlying causes behind environmental problems the human actions which have made them issues and the hopes for solutions It is a book about the human impact on the environment and the ways in which the natural environment impacts human society The seventh edition has been fully revised and updated throughout with new case studies figures and online resources comprising a complete lecture course for tutors and multiple choice questions for students New concepts and topics covered for the first time in this edition include the blue economy marine heatwaves Africa's Great Green Wall rewilding net zero commitments nature based solutions emerging contaminants in global rivers green infrastructure in sustainable cities initiatives promoting zero emission vehicles and zoonotic diseases including the COVID 19 pandemic New

case studies include gender impact assessment of big dams in Laos and Vietnam reducing food loss and waste liming sugar maple trees in North America to counteract soil acidification and soil erosion and poverty in Rwanda Eighteen chapters on key issues follow three initial chapters which outline the background contexts of the physical and human environments and the concept of sustainable development Each chapter provides historical context for key issues outlines why they have arisen and highlights areas of controversy and uncertainty to appraise how issues can be resolved both technically and in political and economic frameworks Each chapter also contains an updated critical guide to further reading most of them open access and websites talks and podcasts as well as discussion points and essay questions The text can be read in its entirety or individual chapters adopted as standalone reading This book is an essential resource for students of the environment geography development studies and earth sciences It provides comprehensive and inspirational coverage of all the major global environmental issues of the day in a style that is clear concise and critical **PAIS Bulletin** ,1990 **Geospatial**

Technology for Human Well-Being and Health Fazlay S. Faruque,2022-03-21 Over the last thirty years or so there have been tremendous advancements in the area of geospatial health however somehow two aspects have not received as much attention as they should have received These are a limitations of different spatial analytical tools and b progress in making geospatial environmental exposure data available for advanced health science research and for medical practice This edited volume addresses those two less explored areas of geospatial health with augmented discussions on the theories methodologies and limitations of contemporary geospatial technologies in a wide range of applications related to human well being and health In 20 chapters readers are presented with an up to date assessment of geospatial technologies with an emphasis on understanding general geospatial principles and methodologies that are often overlooked in the research literature As a result this book will be of interest to both newcomers and experts in geospatial analysis and will appeal to students and researchers engaged in studying human well being and health Chapters are presenting new concepts new analytical methods and contemporary applications within the framework of geospatial applications in human well being and health The topics addressed by the various chapter authors include analytical approaches newer areas of geospatial health application introduction to unique resources geospatial modeling and environmental pollution assessments for air water and soil Although geospatial experts are expected to be the primary readers this book is designed in such a way so that the public health professionals environmental health scientists and clinicians also find it useful with or without any familiarity with geospatial analysis **Migration and Cities** Anna Triandafyllidou,Amin Moghadam,Melissa Kelly,Zeynep

Şahin-Mencütek,2024-05-02 This open access book brings together different perspectives on migration and the city that are usually discussed separately to show the special character of the urban context as a territorial and political space where people coexist whether by choice or necessity Drawing on heterogeneous situations in cities in different world regions including Europe North America the Middle East South Southeast and East Asia and the Asia Pacific contributions to this

volume examine how migration and the urban context interact in the twenty first century The book is structured in four parts The first looks at cities as hubs of cultural creativity exploring the many dimensions of cultural diversity and identity as they are negotiated in the urban context The second focuses on what lies outside the large urban centres of today notably suburbs while the third part engages with migration and diversity in small and mid sized cities many of which have adopted strategies to welcome growing numbers of migrants Last but not least the fourth part looks at the challenges and opportunities that asylum seeking and irregular migration flows bring to cities By providing a variety of empirical cases based on various world regions this book is a valuable resource for researchers students and policy makers
