The Globalization Of Labour Standards The Soft Law Track Bulletin Of Comparative Labour Relations:

The Globalization of Labour Standards Roger Blanpain, Michele Colucci, 2004-01-01 Do core labour standards exist in today's global economy If so what are they And most important how effective are they In this book two labour law scholars answer these questions in a definitive manner In detail they demonstrate that although insufficiently legally binding instruments governing employment and labour exist beyond the national level a significant body of international soft law has developed that does in fact carry great weight Blanpain and Colucci identify four major sources of this soft law the UN Global Compact of 1999 the ILO Tripartite Declaration of Principles the North American Agreement on Labour Cooperation and the OECD Guidelines for Multinational Enterprises and show how the principles these instruments enunciate act as a countervailing power to the international economic decision making of multinational corporations The authors cite relevant cases and highlight emerging trends in this important area of labour law Annexes reprint all four of the instruments The Globalization of Labour Standards will be welcomed by all sectors of the labour and employment law community as a fully realized analysis of what is currently available to those who would like to ensure economic and social progress in a world dominated by multinational corporations **BOOK JACKET**

The Global Labour Market Roger Blanpain, Michele Tiraboschi, Pablo Arellano Ortiz, 2008-01-01 As global power relations increasingly favour international capital it becomes crucial for labour and employment lawyers to center their field in a supranational context As long as wages social security and taxes remain national matters states compete at this level in order to attract foreign investment This does not bode well for employees or the self employed Most ameliorative measures come in the form of unenforceable and soft law and guidelines and recommendations The conference recorded in this vitally important book confronts this losing battle of local responses to global challenges The book reprints the papers submitted to that conference by twenty three outstanding scholars from fourteen countries Among the many critical issues they expose and discuss are the following and the proliferation of varieties of non standard employment and protection of migrant workers and rights by regional organizations and global and regional trends in the human resources function and work training and education policy and effectiveness of equality and non discrimination standards and involvement of employees in workplace decision making and and the need for an equitable social safety net In the course of the discussion the authors examine cases from many countries including not only EU Member States both West and East and the U S but also Japan Chile South Africa and Indonesia With a focus on the nexus of multinational enterprises and international standards the book provides both a sharp image of where labour law stands in today's world and revealing serious social problems in a clearer light than is usually encountered and a very valuable guide to directions to pursue and potential solutions offered by some of the most engaged and committed minds in the field It is an indispensable resource for legal workers in this and eye of the storm and of globalization *Child Labour in a Globalized World* Luca Nogler, Marco Pertile, 2016-04-15 This volume examines the legal dimension of the ILO's action in

the field of Child Labour The authors investigate the implementation of the relevant legal instruments and assess the effectiveness of the ILO supervisory system All relevant instruments are considered while particular attention is given to Convention 182 on the elimination of the worst forms of child labour Child Labour in a Globalized World describes the ILO s activities concerning the eradication of child labour whilst assessing and evaluating the effectiveness of the relevant legal framework and functioning of the supervisory system This book contextualizes the issue of the eradication of the worst forms of child labour in the recent doctrinal debate on the nature of labour standards and the transformation of the ILO This important work will be a valuable resource for academics researchers and policy makers with an interest in labour law international law and children s rights

Comparative Labour Law and Industrial Relations in Industrialized Market Economies Roger Blanpain, 2007 Comparativism is no longer a purely academic exercise but has increasingly become an urgent necessity for industrial relations and legal practitioners due To The growth of multinational enterprises And The impact of international and regional organizations aspiring to harmonize rules The growing need for comprehensive up to date and readily available information on labour law and industrial relations in different countries led to the publication of the International Encyclopaedia for Labour Law and Industrial Relations In which more than 70 international and national monographs have thus far been published This book Comparative Labour Law and Industrial Relations in Industrialized Market Economies goes a step further than the Encyclopaedia in as much as most of the chapters provide comparative and integrated thematic treatment The aim is to describe the salient characteristics and trends in labour law and industrial relations in the contemporary world This book is obviously not exhaustive with respect to the coverage of countries and topics The authors limit themselves mainly to the industrialized market economies The book is divided in three main parts an introduction relating to methodology and documentation including the use of Internet The second part concerns international actors like the International Employers' Organisations And The International Trade Union Movement As well as Human Resources Management The third concerns the sources of regulation concentrating on International and European Labour Law as well as on Codes of Conduct for Multinational Enterprises and describes also the rules in case of conflict of laws The last part deals with international developments and comparative studies in not less than 15 chapters The IXth edition will like the previous editions serve as a textbook and reference work to facilitate the task of teachers and students of comparative labour law and industrial relations it will also provide labour lawyers with the necessary insights to cope with a world which is increasingly international

Labour Markets, Industrial Relations and Human Resources Management Roger Blanpain, 2012-03-01 Social models are always contested and ambiguous This is particularly evident in the field of human resources management where decisions that ultimately affect the patterns of social relations are made every day This collection of in depth essays focuses on some central human resources elements gender youth ageing educational background training workers rights providing an up to date summary and analysis of how employers are dealing and should

be dealing with workforce characteristics under current globalized forces The emphasis is on Europe but valuable insights come also from Chile Canada and the United States Sixteen experts discuss such important issues as the following the shift from intervention in favour of workers rights towards corporate neo liberal policies importance of transnational framework agreements in countries where a trade union tradition is lacking evidence that provision of childcare promotes female labour market participation short time working labour hoarding and labour underutilization enhancing training policies for employable skills enforcement of corporate social responsibility alarmingly high rates of precarious employment worldwide decline of full time permanent positions pension system reform over exposure of young people to non standard employment discouraged workers regional imbalances in employment policy and weaknesses of education programmes in connection with the world of work Industrial relations and human resources professionals as well as employment lawyers worldwide will welcome this incisive analysis and academics everywhere are sure to benefit from its evidence insights and proposals The book presents a selection of papers from the international conference in commemoration of Marco Biagi entitled Europe 2020 Comparative Perspectives and Transnational Action held at the Marco Biagi Foundation in Modena Italy 17 19 March 2011

Corporate and Employment Perspectives in a Global Business Environment Boel Flodgren, 2006-01-01

In today's society the foreground of deliberation in politics legislation judicial decisions even war is increasingly experienced by citizens as a mask for the working out of norms and institutions the precise nature of which eludes us We are accustomed to looking behind every news item often feeling that the real decisions are made by other people than those who seem to be in power or that events are merely driven by facts on the ground or unconscious motives To consider global business activity and especially employment issues in this experiential context is a daring and provocative challenge one which was taken up in August 2004 under the sponsorship of the Department of Business Law at Lund University This remarkable book presents a rich sampling of what was said at that unique symposium among a group of notable authorities in law business and international relations The seventeen authors whose contributions appear in this book bring their lucid perspectives to bear on the vital and complex issues that emerge from the contemplation of the territory where the rule of law encounters global business interests These perspectives encompass such factors as the following the role of the expert global extension of the nation state model the effect of development aid on legal systems in developing countries WTO rules and dispute settlement the most favoured nation MFN principle efforts to harmonise contract law international taxation multinational corporate behaviour the search for fair labour standards the clash of economic law and labour law corporate social responsibility and alternative dispute resolution in international trade Underlying all the essays is the insight that although there is no established global law and no global law giver yet there is no national law that is not deeply affected by the globalisation of markets Collectively these authors provide a deeper and truer vision of the real global legal regime that is rapidly taking shape The powerful impetus this book provides toward an understanding of actually developing global governance and global
