Law and the Environment Robert V. Percival, Dorothy C. Alevizatos, 1997 *Law and the Environment* A Multi disciplinary Reader brings together for the first time some of the most important original work on environmental policy by scientists ecologists philosophers historians economists and legal scholars Each of the book's four parts provides a different focus on the nature and scope of environmental problems and attempts to use public policy to address these concerns Part I examines how ecology economics and ethics analyze environmental problems and why they support collective action to respond to them Part II examines the history and present state of environmental law from early attempts to engage the government to the current debate over the effectiveness of environmental policy Part III explores the process by which environmental law gets translated into regulatory policy Part IV considers the future of environmental law at a time when international environmental concerns have become a major force in global diplomacy and international trade agreements In drawing together a wide variety of perspectives on these issues Robert V Percival and Dorothy C Alevizatos offer a comprehensive examination of how society has responded to the difficult challenges posed by environmental problems The selections provide a rich introduction to the complexities of environmental policy disputes Author note Robert V Percival is Professor of Law Robert Stanton Scholar and Director of the Environmental Law Program of the University of Maryland School of Law He is the principal author of *Environmental Regulation Law Science and Policy* and numerous articles on law and the environment P Dorothy C Alevizatos is an environmental lawyer with a Baltimore law firm She has an M S in conservation biology from the University of Maryland

The Greening of Sovereignty in World Politics Karen Litfin, 1998 This is the first book to connect two important subfields in international relations global environmental politics and the study of sovereignty the state's exclusive authority within its territorial boundaries The authors argue that the relationship between environmental practices and sovereignty is by no means straightforward and in fact elucidates some of the core issues and challenges in world politics today Although a number of international relations scholars have assumed that transnational environmental organizations and institutions are eroding sovereignty this book makes the case that ecological integrity and state sovereignty are not necessarily in opposition It shows that the norms of sovereignty are now shifting in the face of attempts to cope with

ecological destruction but that this greening of sovereignty is an uneven variegated and highly contested process By establishing that sovereignty is a socially constructed institution that varies according to time and place with multiple meanings and changing practices The Greening of Sovereignty in World Politics illuminates the complexity of the relationship between sovereignty and environmental matters and casts both in a new light Contributors Daniel Deudney Margaret Scully Granzeier Joseph Henri Jupille Sheldon Kamieniecki Thom Kuehls Ronnie D Lipschutz Karen T Litfin Marian A L Miller Ronald B Mitchell Paul Wapner Veronica Ward Franke Wilmer

Should Trees Have Standing? Christopher D. Stone, 2010-04-07 In this influential and enduring collection of essays Christopher D Stone argues that natural objects such as trees should be bestowed with legal rights through the appointment of special guardians who are designated to protect the voiceless elements in nature Through the essays in this volume Stone advances his thesis that the courts should acknowledge and protect the legal rights of threatened forests and endangered species by granting standing to objects and species themselves as opposed to the humans that are adversely affected by pollution deforestation and other harmful actions The 35th anniversary edition features updated chapters and new essays including Stone's most compelling writings on topics such as legal rights for natural objects climate change agriculture in the 21st century protecting the oceans and the influence of ethics on courts and Congress in shaping U S environmental policy A new Introduction and Epilogue Trees at Thirty Five narrate the reception of Stone's central thesis in various countries and appraise the present state of the environmental movement
