The German Century A Photographic History:

The German Century Michael Stürmer, 2001 The German Century is a magnificent and compelling photographic chronicle of this country at the heart of Europe More than 300 images many of them previously unpublished are complimented by Michael Stürmer's penetrating text Gathered from national and state archives newspapers and private collections this visual survey includes the work of talented photographers like the Nazi era photojournalist Max Ehlert whose work had largely been forgotten From imperial ambition to democratic high hopes from violence and destruction to political division and rebirth Germany's story has been an integral part of the dramatic events of the 20th century *The German Century*

Michael Stürmer, Sarah Jackson, Franziska Payer, 2001 *Encyclopedia of Nineteenth-Century Photography* John Hannavy, 2013-12-16 The Encyclopedia of Nineteenth Century Photography is the first comprehensive encyclopedia of world photography up to the beginning of the twentieth century It sets out to be the standard definitive reference work on the subject for years to come Its coverage is global an important first in that authorities from all over the world have contributed their expertise and scholarship towards making this a truly comprehensive publication The Encyclopedia presents new and ground breaking research alongside accounts of the major established figures in the nineteenth century arena Coverage includes all the key people processes equipment movements styles debates and groupings which helped photography develop from being a solution in search of a problem when first invented to the essential communication tool creative medium and recorder of everyday life which it had become by the dawn of the twentieth century The sheer breadth of coverage in the 1200 essays makes the Encyclopedia of Nineteenth Century Photography an essential reference source for academics students researchers and libraries worldwide *Encyclopedia of World Geography* Peter Haggett, 2002 Each volume focuses on a specific geographic region covering its physical geography economics government and peoples **Everyone's History** John H. Chambers, 2008-10-16 The book's structure blends history and geography A good world atlas or a world historical atlas will be helpful in the reading The historical arrangement of contents has six Parts Classical Mediaeval Early Modern Lands Early Modern Ideas Late Eighteenth and Nineteenth Centuries Twentieth Century Although this sequence of periods and categories fits Western European history best it is also reasonably appropriate for Central Asia India and China For other regions it is more arbitrary and Classical and Mediaeval periods are merged Because the Parts overlap and involve imprecise categories in the List of Contents and Summaries no attempt is made to give dates for their beginning and end

Photographic History of the Great War, 1914 **The German Chemical Industry in the Twentieth Century** John E. Lesch, 2013-04-17 In the twentieth century dyes pharmaceuticals photographic products explosives insecticides fertilizers synthetic rubber fuels and fibers plastics and other products have flowed out of the chemical industry and into the consumer economies war machines farms and medical practices of industrial societies The German chemical industry has been a major site for the development and application of the science based technologies that gave rise to these products and has had an

important role as exemplar stimulus and competitor in the international chemical industry This volume explores the German chemical industry's scientific and technological dimension its international connections and its development after 1945 The authors relate scientific and technological change in the industry to evolving German political and economic circumstances including two world wars the rise and fall of National Socialism the post war division of Germany and the emergence of a global economy This book will be of interest to historians of modern Germany to historians of science and technology and to business and economic historians

German Life Writing in the Twentieth Century Birgit Dahlke, Dennis Tate, Roger Woods, 2010 Life writing an increasingly accepted category among scholars of literature and other disciplines encompasses not just autobiography and biography but also memoirs diaries letters interviews and even non written texts such as film Whether these were produced in diary or letter form as events unfolded or long after the event in the form of autobiographical prose common to all are attempts by individuals to make sense of their experiences In many such texts the authors reassess their lives against the background of a broader public debate about the past This book of essays examines German life writing after major turning points in twentieth century German history the First World War the Nazi era the postwar division of Germany and the collapse of socialism and German unification The volume is distinctive because it combines an overview of academic approaches to the study of life writing with a set of German language case studies In this respect it goes further than existing studies which often present life writing material without indicating how it might fit into our broader understanding of a particular culture or historical period
