Learning for the New Global Century published through the LEAP Liberal Education and America's Promise initiative spells out the essential aims, learning outcomes and guiding principles for a 21st century college education. It reports on the promises American society needs to make and keep to all who seek a college education and to the society that will depend on graduates' future leadership and capabilities. Foreword p vii **Leadership Development in a Global World J.**

Canals, 2012-10-29 Global companies are facing a new pressure to develop leaders with global mindsets. The war for managerial talent has never been so intense. Companies and business schools need not only to fine-tune practices and models but redesign current paradigms and create more effective and sustainable ways to invest in leadership development.

Winning the Global Game Jeffrey Rosensweig, 2010-05-11 In the 21st century global economy, emerging nations will provide almost half of the potential customers for western goods and services, concludes international business expert Jeffrey A. Rosensweig. Drawing on extensive research, Rosensweig contends that firms with truly global strategies will profit from the untapped resources of emerging markets and at the same time improve the living standards of the world's poor. Dismissing the doomsday scenario that so-called Third World nations will continue to be mired in poverty, he argues persuasively that western executives must break out of the mindset that profitable ventures can only be found within the Triad of the United States, Europe, and Japan. Rosensweig reminds us that American exports to emerging nations have tripled since 1986. He projects that by the year 2010 the world will contain six great regional economies, four of them in Asia, and that three of every eight middle-class consumers will reside in the developing world. In clear, nontechnical language, he explains how executives can identify trends of globalization and apply them to business strategy, particularly to what he calls a time-phased global strategy for synchronizing a firm's investments with the progress of emerging middle classes. *Winning the Global Game* demonstrates that adopting a global perspective now is a win-win strategy that links people and profits. It will be important reading for all multinational executives and managers in firms which are going global. The chapter on 21st century personal career strategy will appeal particularly to the aspiring global executive. Material Cultures of the Global Eighteenth

Century Wendy Bellion, Kristel Smentek, 2023-01-26 Things change. Broken and restored, reused and remade, objects transcend their earliest functions, locations, and appearances. While every era witnesses change, the eighteenth century experienced artistic, economic, and demographic transformations that exerted unique pressures on material cultures around the world. Locating material objects at the heart of such phenomena, *Material Cultures of the Global Eighteenth Century* expands beyond Eurocentric perspectives to discover the mobile, transcultural nature of eighteenth-century art worlds. From porcelain to betel leaves, Chumash hats to natural history cabinets, this book examines how objects embody imperialism, knowledge, and resistance in various ways. By embracing things both elite and everyday, this volume investigates physical and technological manipulations of objects while attending to the human agents who shaped them in an era of accelerating global contact and conquest. Featuring ten essays, the volume foregrounds diverse scholarly approaches to chart new directions for

art history and cultural history Ranging from California to China Bengal to Britain Material Cultures of the Global Eighteenth Century illuminates the transformations within and between artistic media follows natural and human made things as they migrate across territories and reveals how objects catalyzed change in the transoceanic worlds of the early modern period
