The Goddess Natura In Medieval Literature:

The Goddess Natura in Medieval Literature George Economou, 1972 Perhaps the most significant allegorical figure of medieval Latin and Vernacular poetry was the goddess Natura A more complex creature than the goddess Fortuna she drew upon many strands of classical and Christian thought from Plato's Timaeus to Boethius Consolation of Philosophy George D Economou includes in this first full length study of Natura an examination of both her philosophical background and the literary traditions that contributed to her image The major part of his work centers on the renaissance of the twelfth century when a new kind of allegory appeared especially in the writings of the Platonist scholar poets of the school of Chartres Free and often ingenious in plot these poems both celebrated and explored the nature of the cosmos Mr Economou thoroughly analyzes Natura's central role in the philosophical poems of Bernard Silvestris and Alan of Lille he provides as well a detailed examination of the guises in which she appears in Jean de Meun's continuation of the Roman de la Rose and in Chaucer's

Nature, Sex, and Goodness in a Medieval Literary Tradition Hugh White, 2000 Nature is a highly important term in the ethical discourse of the Middle Ages and as such a leading concept in medieval literature This book examines the moral status of the natural in writings by Alan of Lille Jean de Meun John Gower Geoffrey Chaucer and others showing how particularly in the erotic sphere the influences of nature are not always conceived as wholly benign Though medieval thinkers often affirm an association of nature with reason and therefore with the good there is also an acknowledgement that the animal the pre rational the instinctive within human beings may be validly considered natural In fact human beings may be thought to be urged almost ineluctably by the force of nature within them towards behaviour
