detail different contemporary approaches to group work with children and adolescents. Further this volume illustrates the application of these models to work with the youth of today whether victims of trauma, adolescents struggling with LGBT issues or youth with varying common diagnoses such as autism spectrum disorders, depression and anxiety. It offers chapters presenting a variety of clinical approaches written by experts in these approaches from classic play therapy and dialectical behavior therapy to cutting edge attachment based intervention, mindfulness and sensorimotor psychotherapy. Because of its broad scope the book is suitable for a wide audience from students to first time group leaders to seasoned practitioners.

Modern Applications to Group Work Kevin A. Fall, Justin E. Levitov, 2001. The effectiveness of group counselling as a treatment modality has been well established. And while additional theoretical work will always be needed perhaps the greater challenge for contemporary group practitioners lies in crafting theoretically sound applications of group theory so that group methods can be used more effectively to benefit clients struggling with various psychological and developmental problems. This book responds to this need by offering fourteen chapters of creative useful examples of how group methods can be successfully applied to a wide range of problems and populations. Each chapter written by innovators from the fields of counselling, social work, psychology and psychiatry focuses on specific mental health problems or issues that will interest a wide population. A careful analysis of each psychological or development problem greets the reader followed by a discussion of the theoretical basis for the interventions. Each chapter utilises practical recommendations, outlines of procedures and liberal use of case examples to illuminate important process points. Each broad category Adults, Children and Adolescents and Training and Theory includes interesting chapter topics such as Group counselling with late deafened adults, Marital restoration groups, Therapist's uses of self in group psychotherapy and Group play therapy with abused children. The elegant combination of theory and practice offers the reader a range of easily implemented methods and techniques applied to each specified problem. *Modern Applications to Group Work* is a valuable companion text for any group oriented course.

Undergraduate and graduate courses in group can use the text to illustrate the application of general group principles to specific psychological concerns. *Modern Applications to Group Work* may be used as the primary text for advanced courses in group counselling, psychology and social work programs. Practitioners will be attracted to the book due to the comprehensive scope and the strong theoretical basis of each chapter that is followed by pragmatic treatment strategies.
