The German Southpolar Expedition Aboard The Gaub 19011903

Milton Oliver Lee

The German Southpolar Expedition Aboard The Gaub 1901-1903:

Encyclopedia of the Antarctic Beau Riffenburgh, 2007 Publisher description *German Exploration of the Polar World* David Thomas Murphy, 2002-01-01 German Exploration of the Polar World is the exciting story of the generations of German polar explorers who braved the perils of the Arctic and Antarctic for themselves and their country. Such intrepid adventurers as Wilhelm Filchner, Erich von Drygalski and Alfred Wegener are not as well known today as Robert Falcon Scott, Roald Amundsen, Ernest Shackleton, Robert E. Peary or Richard E. Byrd, but their bravery and the hardships they faced were equal to those of the more famous polar explorers. In the half century prior to World War II the poles were the last blank spaces on the global map and they exerted a tremendous pull on national imaginations. Under successive political regimes the Germans threw themselves into the race for polar glory with an ardor that matched their better known counterparts bearing English, American and Norwegian flags. German polar explorers were driven like their rivals by a complex web of interlocking motivations. Personal fame, the romance of the unknown and the advancement of science were important considerations, but public pressure, political and military concerns and visions of immense untapped wealth at the poles also spurred the explorers. As historian David Thomas Murphy shows, Germany's repeated encounters with the polar world left an indelible impression upon the German public, government and scientific community. Reports on the polar landscape, flora and fauna enhanced Germany's appreciation of the global environment. Accounts of the indigenous peoples of the Arctic, accurate or fantastic, permanently shaped German notions of culture and civilization. The final failed attempt by the Nazis to extend German political power to the earth's ends revealed the limits of any country's ability to reshape the globe politically or militarily.

Antarctic Peninsula & Tierra del Fuego: 100 years of Swedish-Argentine scientific cooperation at the end of the world Jorge Rabassa, Maria Laura Borla, 2006-11-23 This symposium held in Argentina in March 2003 commemorates Otto Nordenskjöld's 1901 expedition and pays tribute to the Swedish and Argentinian explorers who took on the challenge of early fieldwork in Patagonia and Antarctica. This theme is extended to include recent fieldwork in the natural sciences in the Archipelago of Tierra del Fuego.

Antarctica N. Bonner, David Walton, 2013-10-22 Antarctica, a vast land remote from the other continents and still the least known of them all, provides a unique international laboratory for science. Despite the costs, a growing number of countries are supporting basic scientific research on the continent and in its surrounding seas. Our knowledge of life in this extreme environment, although limited, suggests that it is a key environment for many areas of science. Potential economic developments for food and minerals, as well as increasing political complications, might jeopardise the present scientific accord in the future. Now is the time to take stock: what do we know about Antarctic ecology? What are the threats and how can they be met? In this volume Antarctic scientists from six countries write about the Antarctic ecosystem.

Trans, 1968 *Architecture in Oceania (1840-1970)* Michael Falser, 2025-10-28 Knowledge of colonial architecture in the South Pacific remains sparse, with often overlooked connections to para-colonial

settings and postcolonial continuities This edited volume seeks to address these gaps focusing on the period from 1840 to 1970 across the broader South Pacific region Through in depth architectural case studies of buildings ensembles and urban projects the essays reflect on the complex interactions between locals and foreigners colonisers and the colonised and their shifting allegiances even across changing political powers With a rare focus on German colonial influences in the region the contributions go beyond the predominant narratives of British and French colonial influence This volume is a valuable resource for students and researchers of architectural history and colonial history in Oceania

Biology of the Antarctic Seas Milton Oliver Lee, 1964 Empires of Coal Shellen Xiao Wu, 2015-04-22 From 1868 1872 German geologist Ferdinand von Richthofen went on an expedition to China His reports on what he found there would transform Western interest in China from the land of porcelain and tea to a repository of immense coal reserves By the 1890s European and American powers and the Qing state and local elites battled for control over the rights to these valuable mineral deposits As coal went from a useful commodity to the essential fuel of industrialization this vast natural resource would prove integral to the struggle for political control of China Geology served both as the handmaiden to European imperialism and the rallying point of Chinese resistance to Western encroachment In the late nineteenth century both foreign powers and the Chinese viewed control over mineral resources as the key to modernization and industrialization When the first China Geological Survey began work in the 1910s conceptions of natural resources had already shifted and the Qing state expanded its control over mining rights setting the precedent for the subsequent Republican and People s Republic of China regimes In Empires of Coal Shellen Xiao Wu argues that the changes specific to the late Qing were part of global trends in the nineteenth century when the rise of science and industrialization destabilized global systems and caused widespread unrest and the toppling of ruling regimes around the world Wissenschaftliche ergebnisse der schwedischen südpolar-expedition 1901-1903, unter mitwirkung zahlreicher fachgenossen: Botanik. 2. abt. 1908-21 , 1921 **Biogeography and Ecology in Antarctica** J. van Miegheem, P. van Oye, 2013-11-11 This book is the third in a series of publications devoted to the biogeographical and ecological research in the Southern Hemisphere published in the *Monographiae Biologicae* After dealing with Australia vol VIII and Southern Africa Vol XIV it was thought essential to include Antarctica in this series Ever since the expedition of the Belgica made the first successful wintering within the antarctic circle in 1898 and brought back a very rich harvest of scientific data Belgium kept a vivid interest in Antarctica and took an active part in the modern and international exploration of this vast continent As part of their programs for the International Geophysical Year I G Y twelve nations established permanent or semi permanent bases on the Antarctic Continent or on subantarctic islands Thus a new era of vast and free international scientific collaboration in the Antarctic was opened and it culminated in the formulation and the signing of the Antarctic Treaty Washington 1959 It was recognized and accepted that Antarctica shall be used for peaceful purposes only and Freedom of scientific investigation in Antarctica and cooperation toward that end as applied during the I G Y shall

continue In order to organize this collaboration e g by full exchange of programs and results a Special Committee on Antarctic Research S C A R was founded in 1957
