**Students with Both Gifts and Learning Disabilities** Tina A. Newman, Robert J. Sternberg, 2012-12-06 We were motivated to edit this book when we began to hear stories of exceptional students who were struggling with reading writing or math but who could solve seemingly any problem with computers or build the most intricate structures with Legos or could draw beautiful pictures or could tell the most creative stories but ended up in tears when asked to write it out How is it possible to have so much talent in some areas and yet to appear to have a disability in another What resources are available for these students How can we ensure that these students abilities are nurtured and developed Our goal in this book is to provide ideas and possibly even tentative answers for educators and to stimulate more questions to be answered by researchers We have ourselves been addressing related questions for some time Our group at the PACE Center at Yale has explored the development of abilities competencies and expertise that allow people to be successful in life Through this work we have collaborated with school districts and other educators and researchers across the country to expand the notion of what is traditionally thought of as intelligence We use the concept of successful intelligence to allow for the possibility that the skills traditionally taught in school are not the only ones and often not even the most important ones that allow people to be successful in the world

Duarte,2012-10-17 Education is not an art of putting sight into the eye that can already see but one of turning the eye towards the proper gaze of Being That s what must be managed Plato insists This claim is the take off point for Eduardo Duarte s meditations on the metaphysics and ontology of teaching and learning In *Being and Learning* he offers an account of learning as an attunement with Being s dynamic presencing and unconcealment which Duarte explores as the capacity to respond and attend to the matter that stands before us or in Arendtian terms to love the world and to be with others in this world This book of poetic thinking is a chronicle of Duarte s ongoing exploration of the question of Being a philosophical journey that has been guided primarily through a conversation with Heidegger and which also includes the voices of Plato Aristotle Heraclitus Nietzsche as

well Lao Tzu and the Buddha among others In Being and Learning Duarte undertakes a phenomenology of the original a writing that consciously and conspicuously interrupts the discursive field of work in philosophy of education As the late Reiner Schurmann described this method it recalls the ancient beginnings and it anticipates a new beginning the possible rise of a new economy among things words and actions Being and Learning is a work of parrhesia a composition of free thought that disrupts the conventional practice of philosophy of education and thereby open up gaps and spaces of possibility in the arrangement of words concepts and ideas in the field With this work Eduardo Duarte is initiating new pathways of thinking about education

Labor of Learning Alexander Sidorkin, 2019-02-11 This book is about the end of an era in education It argues that schooling as we know it will cease to exist and be replaced with something else Education will undergo a radical fundamental change replacing traditional compulsory schooling with a market based system of learning that is finely tuned to demand and does not rely on extra economic coercion The premise of the book is to treat school learning as a form of labor Its genre lies somewhere between educational theory and a political economy of education The author explores the origins of the contemporary mass schooling models and redefines school learning in terms of labor with special reference to genesis of education and to the history of childhood in its connection with schooling Schools are described as islands of non market semi feudal economies in the midst of the sea of markets which explains some of the most common worries about learning motivation The book offers several critiques of the most influential thoughts on schooling today Progressivism the Human Capital theory the belief in intrinsic motivation the voucher movement and the accountability reform And finally it outlines two alternative solutions for educational problems which stem from the essential lack of learning motivation This book is an invitation to resurrect the tradition of asking fundamental questions about education Improving what is essentially a flawed institution can take us only so far the author is inviting the reader to go further
