Funicular Structures Damon Bolhassani,2025-04-16 Funicular structures are structural skeletons designed using methodologies that analyze the flow and direction of forces which can be categorized as compression tension or a combination of both They are not only elegant resembling naturally occurring forms but also highly efficient and can be built with minimal use of relatively low strength materials thus minimizing their negative environmental impact This book presents an in depth overview of the theoretical foundations and practical methods of designing funicular structures for maximum efficiency Beginning with a foundation and introduction to funicular structures for those new to the subject the book then provides in depth coverage of cables arches shells and vaults domes and spatial structures Chapters explain the theory behind funicular structures in 2D spatial funicular structures in 3D and examine their structural behavior Recent and historically famous structures from around the globe are analyzed and their potential design methods revealed through step by step visual explanations Structural analysis of funicular structures in different forms are also presented to demonstrate pitfalls and common errors Tracing the various methods of designing funicular structures including the latest computational tools this book provides a solid foundation for students of architecture structural design civil engineering landscape design and environmental design to embark on their own funicular design projects **Bridging Deep South Rivers** John S.

Lupold,Thomas L. French Jr.,2019-03 Horace King 1807 1885 built covered bridges over every large river in Georgia Alabama and eastern Mississippi That King who began life as a slave in Cheraw South Carolina received no formal training makes his story all the more remarkable This is the first major biography of the gifted architect and engineer who used his skills to transcend the limits of slavery and segregation and become a successful entrepreneur and builder John S Lupold and Thomas L French Jr add considerably to our knowledge of a man whose accomplishments demand wider recognition As a slave and then as a freedman King built bridges courthouses warehouses factories and houses in the three state area The authors separate legend from facts as they carefully document King s life in the Chattahoochee Valley on the Georgia Alabama border We learn about King s freedom from slavery in 1846 his reluctant support of the Confederacy and his two terms in Alabama s Reconstruction legislature In addition the biography reveals King s relationship with his fellow white contractors and investors especially John Godwin his master and business partner and Robert Jemison Jr the Alabama entrepreneur and legislator who helped secure King s freedom The story does not end with Horace however because he passed his skills on to his three sons who also became prominent builders and businessmen In King s world few other blacks had his opportunities to excel King seized on his chances and became the most celebrated bridge builder in the Deep South The reader comes away from King s story with respect for the man insight into the problems of financing building and

maintaining covered bridges and a new sense of how essential bridges were to the southern market economy
