The Global Power The United States Since 1941:

America in the World Frank Costigliola, Michael J. Hogan, 2013-12-23 This volume includes historiographical surveys of American foreign relations since 1941 by some of the country's leading historians. Some of the essays offer sweeping overviews of the major trends in the field of foreign international relations history. Others survey the literature on US relations with particular regions of the world or on the foreign policies of presidential administrations. The result is a comprehensive assessment of the historical literature on US foreign policy that highlights recent developments in the field.

The Global Power Richard S. Kirkendall, 1975 Rethinking U.S. World Power Daniel Bessner, Michael Brenes, 2024-03-06 Since the late 1990s diplomatic historians have emphasized the importance of international and transnational processes, flows, and events to the history of the United States in the world. *Rethinking U.S. World Power* provides an alternative to these scholarly frameworks by assembling a diverse group of historians to explore the impact of the United States and its domestic history on U.S. foreign relations and world affairs. In so doing, the collection underlines that even in a global age, domestic politics and phenomena were crucial to the history of U.S. foreign policy and international relations more broadly. *National Interests And Presidential Leadership* Donald E. Nuechterlein, 2019-04-10 Many scholars have ignored the concept of national interest simply because no logical systematic means of dealing with this key aspect of international politics has been available. A new approach to defining national interest forms the basis for this study of presidential decisions on U.S. involvement in foreign wars. Professor Nuechterlein looks at various crisis situations to determine what defense, economic, world order, and ideological interests are at stake; he identifies sixteen cost, risk, and value factors that affect the U.S. view of which interest is most vital in a given situation. In any dispute, it is the interest that is considered vital, too important to compromise, that is the key element in crisis decisions. Professor Nuechterlein uses his analytical framework to examine the ways Presidents Wilson, Roosevelt, Truman, Johnson, and Nixon perceived the national interest when making their decisions to begin or extend U.S. war involvement. He assesses the value of National Security Council participation in the decision-making process and presents case study analyses of three imminent U.S. foreign policy concerns: Quebec's possible separation from Canada, the Panama Canal Treaty, and the potential for race war in South Africa, with an epilogue on the challenges facing Carter. The author suggests that the most important U.S. national interest in the future will be economic, with energy conservation a top priority. Empire of the Air Jenifer Van Vleck, 2013-11-01 Jenifer Van Vleck's *Empire of the Air* reveals the central role commercial aviation played in the U.S. ascent to global preeminence in the twentieth century as the federal government partnered with the aviation industry to deliver American power across the globe and sell the idea of the American Century to the public at home and abroad. The American Century Donald Wallace White, 1996-01-01 From a wide range of sources, the author identifies major trends in past American foreign policy and describes the decline of American power that has been in abeyance since the end of the Vietnam War. **The Cold War**
