Sintered Metallic And Ceramic Materials:

Sintered Metallic and Ceramic Materials Gopal S. Upadhyaya, 2000-01-21 Sintering is one of the most important industrial techniques for optimizing the capabilities of different materials and this book deals exclusively with the state of the art on the processing of sintered materials both metallic and ceramic. Emphasis is placed on the relationship between the composition of the material, the powder processing techniques used and the properties of the materials and the applications of end products. Materials covered include ferrous low and high alloy steels and nonferrous light and heavy alloys, rare earth intermetallics, ceramics, oxide and nonoxide and cermets. The various applications of sintered materials in the automotive, aerospace and defence, machine tool and power industries and in magnetic, electrical and electronic applications are discussed in the final chapter. This book will be used by engineers working with sintering techniques and sintered materials and by engineering students studying powder metallurgy. The author is internationally renowned for his work on sintering and sintered materials.

Materials Processing Handbook Joanna R. Groza, James F. Shackelford, 2007-03-28 The field of materials science and engineering is rapidly evolving into a science of its own.
