Sm Nursing Community I M:

Sm Nursing Community I/M Clark, Mary Jo Dummer Clark, 1998-11 **Community & Public Health Nursing: Promoting the Public's Health** Judith Allender, Cherie Rector, Cherie Rector, PhD Rn-C, Kristine Warner, Kristine Warner, PhD MS MPH RN, 2013-04-26 Community Public Health Nursing is designed to provide students a basic grounding in public health nursing principles while emphasizing aggregate level nursing. While weaving in meaningful examples from practice throughout the text, the authors coach students on how to navigate between conceptualizing about a population focus while also continuing to advocate and care for individuals, families, and aggregates. This student-friendly, highly illustrated text engages students and by doing so eases students into readily applying public health principles along with evidence-based practice nursing science and skills that promote health, prevent disease, as well as protect at-risk populations. What the 8th edition of this text does best is assist students in broadening the base of their knowledge and skills that they can employ in both the community and acute care settings while the newly enhanced ancillary resources offers interactive tools that allow students of all learning styles to master public health nursing.

Housing and Young Families in East London Anthea Holme, 2023-08-09 Originally published in 1985, Anthea Holme focuses her study on Bethnal Green in East London and Wanstead and Woodford in outer East London, the areas covered by Michael Young and Peter Willmott in their celebrated books *Family and Kinship in East London* and *Family and Class in a London Suburb*. Her aim was to discover how things had changed in the twenty-five years or so since the publication of these classic studies. She makes a four-way comparison between then and now and between two neighbourhoods of the present: a relatively prosperous outer London suburb and a London East End district carrying its full quota of inner-city problems. The book takes as its starting point a crucial event in a family's history: the birth of the first child. Housing may contribute to the happiness or the stress of the family at this time. The author looks at the present housing and the housing history of families who have just had their first child and discusses their satisfactions, problems, and aspirations. She draws attention to the contrasts in housing in tenure, dwelling type, condition, surroundings, and in the opportunity to acquire a home in the first place, already evident twenty-five years ago. She also shows that while in many ways in patterns of consumption, for instance, change has brought the two places together, housing has driven them further apart. Owner occupation dominant in Woodford and council tenancy dominant in Bethnal Green are rapidly becoming the respective symbols of the have and the have-nots. Anthea Holme concludes that in the present political, economic, and social climate, this division can only grow wider unless or until housing is regarded as the vitally important component it is in inner-city life.
