Shepherd,Johan Wiklund,2005 The authors of this comprehensive study address why it is that some small firms perform well and others don t and whether high performing firms share characteristics that distinguish them from low performing firms By exploring bundles of resources and their interaction with other factors the authors explain important small business outcomes such as growth performance entrepreneurial activity and the chance of receiving debt or equity capital The authors find that while resources may be valuable it is essential that small businesses have the processes to facilitate the manipulation of resources into value creating strategies Rather than reaching the conclusion that more is always better the authors tease out the conditions under which certain resources are particularly valuable as well as the conditions under which these and other resources are less valuable The resource factors examined range from aspects of the human capital of the small business manager such as length of education or prior experience with business start ups to social capital variables and firm level resources such as access to financial capital and competence Representing leading edge research across several levels of analysis this volume will be a useful resource for scholars and students of entrepreneurship and small business as well as for entrepreneurs and small business owners Policymakers will find the volume helpful in understanding the effect policies may have on small businesses and the subsequent impact on the economic performance of a region **Small Business Management** Justin Gooderl Longenecker,Carlos W.
