Small Property Versus Big Government Social Origins Of The Property Tax Revolt:

Small Property versus Big Government Clarence Y. H. Lo, 2018-10-23 Clarence Lo's investigation of California's Proposition 13 and other tax reduction bills is both a tribute and a warning to people who get mad as hell and try to do something about being pushed around by government. Homeowners in California faced with impossible property tax bills in the 1970s got mad and pushed back, starting an avalanche that swept tax limitation measures into state after state. What we learn is that although the property tax was slashed, two thirds of the benefits went to business owners rather than homeowners. How did a crusade launched by homeowners seeking tax relief end up as a pro-business supply-side political program? To trace the transformation, Lo uses the firsthand recollections of 120 activists in the movement going back to the 1950s. He shows how their protests were ignored until a suburban alliance of upper middle-class property owners and business owners took charge. It was the program of that latter group, not the plight of the moderate-income homeowner that inspired tax revolts across the nation and shaped the economic policies of the Reagan administration. This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1990.

Postwar Conservatism, A Transnational Investigation Clarisse Berthezène, Jean-Christian Vinel, 2017-04-19

This volume offers a unique comparative perspective on post-war conservatism as it traces the rise and mutations of conservative ideas in three countries: Britain, France, and the United States across a short twentieth century (1929-1990) and examines the reconfiguration of conservatism as a transnational phenomenon. This framework allows for an important and distinctive point: the 1980s were less a conservative revolution than a moment when conservatism understood in Burkean terms was outflanked by its various satellites and political avatars: namely populism, neoliberalism, reaction, and cultural and gender traditionalism. No longer running, unique conservative mind comes out of this book's transnational investigation. The 1980s did not witness the ascendancy of a movement with deep roots in the 18th-century reaction to the French Revolution, but rather the decline of conservatism and the rise of movements and rhetoric that had remained marginal to traditional conservatism.

Race and the Origins of American Neoliberalism Randolph Hohle, 2015-06-12 Why did the United States forsake its support for public works, projects, public schools, public spaces, and high corporate taxes for the neoliberal project that uses the state to benefit businesses at the expense of citizens? The short answer to this question is race. This book argues that the white response to the black civil rights movement in the 1950s, 60s, and early 70s inadvertently created the conditions for the emergence of American neoliberalism. Neoliberalism is the result of an unlikely alliance of an elite liberal business class and local segregationists that sought to preserve white privilege in the civil rights era. The white response drew from a language of neoliberalism as they turned inward to redefine what it meant to be a good white citizen. The

language of neoliberalism depoliticized class tensions by getting whites to identify as white first and as part of a social class second This book explores the four pillars of neoliberal policy austerity privatization deregulation and tax cuts and explains how race created the pretext for the activation of neoliberal policy Neoliberalism is not about free markets It is about controlling the state to protect elite white economic privileges [My Blue Heaven](#) Becky M.
