Evenett, Shahid Yusuf, 2002-09-27 East Asian economies of the 1980s and much of the 1990s were among the most competitive exporters of manufactured products and were also able to sustain growth

rates far higher than those of other countries developing or industrial. However the economic crisis of 1997-98 impacted the economies of these countries. Although recovery began fairly quickly in some countries others have yet to regain their growth momentum. Can East Asia Compete looks at whether or not East Asia can restore its near magical performance or is its competitive strength beginning to wane. This volume argues that East Asian countries have far from exhausted their growth potential. However future competitiveness will depend on much greater innovative capability in manufacturing and services innovativeness that is grounded in stronger institutions, improved macroeconomic policies and closer regional coordination. Can East Asia Compete clearly summarizes the issues currently being debated and provides guidance to East Asian economies on how to deal with the policy concerns that lie ahead.

The Economics and Management of Small Business Graham Bannock, 2005. Despite the seemingly relentless march of the multinationals, small businesses continue to thrive across the globe and form a vital part of all successful economies. The Economics and Management of Small Business provides an international perspective on this important topic and includes many useful pedagogical features such as questions for discussion, international case studies and empirical research. Graham Bannock's accessible writing style is key to the reader gaining a good understanding of this important area, and students of small business and entrepreneurship courses will find this book extremely useful.

Entrepreneurship, Small Business and Public Policy Robert J. Bennett, 2014-06-20. Public policy interventions aimed at encouraging, supporting and developing small businesses are important for understanding entrepreneurship and small business management. This textbook is the first to provide teachers and students with a resource that gives an overview of how institutional and policy structures interact with small firm start-ups, continuation and succession, failures. Beginning with a brief introduction to policy processes, the text covers the main policy instruments for entrepreneurial market entry and start-up support, on-going small business advice and financial support and succession planning. It particularly focuses on policies that improve the Business Enabling Environment through macroeconomic policy, institutional reform and deregulation of bureaucratic burdens. Theoretical rigour is complemented by detailed assessments of current policies around the world, including USA, advanced and emerging economies, and Policy support from global institutions such as the World Bank and the ILO are included. Written by a pre-eminent scholar of public policy and entrepreneurship, this textbook provides a concise but thorough introduction to the subject for Master's students internationally. Policy recommendations in the author's conclusion also highlight the book's value to policy makers as they adapt to the globalized digital world.

Sustaining Growth and Performance in East Asia Charles Harvie,Boon-Chye Lee,2005-01-01 This third book in the series focuses on how small and medium sized enterprises SMEs contribute to achieving and sustaining growth and performance in their economies as well as the ways in which governments can assist and enhance that contribution This is of particular concern given the trauma

suffered by East Asian economies in the wake of the financial and economic crisis of 1997-98. Faced with the need to restructure and reform their economies and thereby achieve a firm foundation for future sustainable growth, many East Asian countries actively pursued SME growth focusing on the encouragement of entrepreneurialism in the private sector. Drawing on the insights of a wide range of SME experts, the book provides a broad coverage of important aspects of SMEs including the contribution of micro enterprises to economic recovery and poverty alleviation, measurement and evaluation issues, managing knowledge development, ethical values in SMEs, the internationalisation process, entry mode decisions in export markets, technological sourcing and use of the Internet. Presenting a contemporary analysis of SME developments in East Asia, both academics and policymakers will find *Sustaining Growth and Performance in East Asia* of great interest. The Economics of Industrial Development John Weiss, 2010-09-13 This book aims to explain this process from the perspective of developing countries. It charts current trends in industrial development, drawing on available statistics and explores different perspectives on the role the manufacturing industry can play. Entrepreneurship and Economic Growth in China Ting Zhang, Roger Stough, 2013 This book provides an analysis of the existing economic dynamics and factors contributing to entrepreneurship in China. Featuring contributions from prominent authors such as Zoltan Acs and Jian Gao, it first poses a theoretical question of whether entrepreneurship exists in China and if so, the extent and form it takes. This book also examines whether the nature of entrepreneurship in China differs from that elsewhere. Following this investigation, empirical tests and analyses focus on important issues such as: What is the special value of entrepreneurship in China? Does entrepreneurship in China drive economic growth like it does in other more market-oriented economies? What is entrepreneurship in China like? What is its history, nature, environment and what are some of the underlying diversities or challenges it is facing? Assuming entrepreneurship in China is important to economic growth, how can public policy help to enhance the entrepreneurship milieu in China? Finally, based on the empirical findings and potential policy implications, future directions of investigation are suggested. Increasing Formality and Productivity of Bolivian Firms The World Bank, 2009-07-06 Bolivia's informal economic sector is the largest in Latin America and has been attributed to many factors including the burden of regulations, the weakness of public institutions and the lack of perceived benefits to formality. *Increasing Formality and Productivity of Bolivian Firms* presents fresh qualitative and quantitative analyses to help understand the reasons why firms are informal and the impact of formalization on their profitability in order to better inform appropriate policies. A crucial finding of the study is that the impact of tax registration on profitability depends on firm size and the ability to issue tax receipts. The smallest and largest firms have lower profits as a result of tax registration because their cost of formalizing exceeds benefits. The study concludes by recommending policy priorities to increase the benefits of formalization through information training, access to credit and markets and business support. Longer term policy recommendations include simplifying formalization, regulatory and taxation procedures and reducing their costs as well as

Atkinson,Michael Lind,2018-03-30 Why small business is not the basis of American prosperity not the foundation of American democracy and not the champion of job creation In this provocative book Robert Atkinson and Michael Lind argue that small business is not as is widely claimed the basis of American prosperity Small business is not responsible for most of the country s job creation and innovation American democracy does not depend on the existence of brave bands of self employed citizens Small businesses are not systematically discriminated against by government policy makers Rather Atkinson and Lind argue small businesses are not the font of jobs because most small businesses fail The only kind of small firm that contributes to technological innovation is the technological start up and its success depends on scaling up The idea that self employed citizens are the foundation of democracy is a relic of Jeffersonian dreams of an agrarian society And governments motivated by a confused mix of populist and free market ideology in fact go out of their way to promote small business Every modern president has sung the praises of small business and every modern president according to Atkinson and Lind has been wrong Pointing to the advantages of scale for job creation productivity innovation and virtually all other economic benefits Atkinson and Lind argue for a size neutral policy approach both in the United States and around the world that would encourage growth rather than enshrine an anachronism If we overthrow the small is beautiful ideology we will be able to recognize large firms as the engines of progress and prosperity that they are *The Contest for Japan's Economic Future* Richard Katz,2024 Among the many books on why some nations prosper better than others this is the first such focusing this theme on Japan in many years And it is the first in English to show how a revival of Japan s past entrepreneurship will promote broader economic recovery and written in a lively style this book will appeal to laypersons scholars businesspeople and policymakers alike Adding to the appeal is that the book demonstrates how current trends give Japan its best opportunity for recovery in a generation At the same time its discussion of the forces opposing an entrepreneurial revival adds both realism and drama There truly is a contest of forces for control of Japan s economic future On top of that the book will attract those interested in broader themes ranging from generational attitudes and gender relations to culture and technology *Learning to Compete in African Industry* Banji Oyelaran-Oyeyinka,2017-11-28 This book examines the institutional roots of the persistent differences in economic performance of firms industries and countries in Africa It draws attention to the role of institutions in supporting technical change and shows how technological progress is central to competitiveness in a global context The role of initial conditions such as levels of literacy and natural endowment the structure of industry and resource endowment are also emphasized With its focus on how institutions shape systems of innovation this book makes a unique contribution to the

debate about African development **Entrepreneurship and Small Business** Michael Schaper,Thierry Volery,2004-01-07 Entrepreneurship and small business management are two very close and often overlapping disciplines Entrepreneurship refers to the dynamic process of creating a new business venture Small business management addresses various issues of organizing and operating a small business The goal of this textbook is to provide a package covering all of the issues related to business start up and those arising from running a small business within the Australasian and South East Asian contexts The geographic markets for the book are Australasia Australia and New Zealand and South East Asia Indonesia Hong Kong Malaysia and Singapore An increasing amount of goods capital and people are moving between these two regions and this text provides the reader with a better regional understanding of this environment Features The What would you do feature presents a scenario in which an entrepreneur small business manager needs to respond to a problem or situation The Entrepreneur profile in every chapter profiles Australian New Zealand and Asia Pacific entrepreneurs and small business leaders The end of chapter case study profiles an entrepreneurial approach and or small business management issue in the pacific Rim **International Handbook on Industrial Policy** P. Bianchi,2008-01-01 This timely and much needed Handbook reconsiders an old topic from a fresh perspective raising a number of new interesting and worthwhile issues in the wake of ten years of globalization This comprehensive analysis illustrates that old style industrial policies whereby the government directly intervened in markets and was often the producer itself are no longer relevant Structural changes occurring in economies summarized in the term globalization are triggering the definition and implementation of new industrial policies The contributors leading experts in their field unite to evaluate this shift of over a decade ago Employing various empirical and methodological approaches with a strong theoretical underpinning this world wide study of the state of the art of industrial policy issues is an invaluable reference tool It has been enthusiastically received by a wide ranging audience including scholars researchers and policy makers with an interest in industrial economics and policy business studies and policies for growth competitiveness and development
