Smarandache Rings:

Smarandache Rings W. B. Vasantha Kandasamy, 2002 Generally in any human field a Smarandache Structure on a set A means a weak structure W on A such that there exists a proper subset B which is embedded with a stronger structure S By proper subset one understands a set included in A different from the empty set from the unit element if any and from A These types of structures occur in our every day's life that's why we study them in this book Thus as two particular cases A Smarandache ring of level I S ring I is a ring R that contains a proper subset that is a field with respect to the operations induced A Smarandache ring of level II S ring II is a ring R that contains a proper subset A that verifies A is an additive abelian group A is a semigroup under multiplication For $a, b \in A$ $a \cdot b = 0$ if and only if $a = 0$ or $b = 0$ **A Study on Neutrosophic**
