Touching Space Gregory P. Kennedy, 2007 Project Manhigh took humans to the threshold of space using balloons In the 1950s a small band of Air Force doctors were on the cutting edge of the United States space research programs Working at the Aeromedical Field Laboratory at Holloman Air Force Base in southern New Mexico they used balloons to carry laboratory animals followed by human pilots above 99% of the atmosphere Drawing upon flight reports and technical data this book

documents Project Manhigh and the high altitude flights that preceded it The Manhigh flights were in many ways prototypes for future space missions On each of the three flights the Air Force placed a lone pilot in a sealed capsule nineteen miles above the ground At such extreme altitudes the pilots were well within the functional equivalent of outer space and needed the sealed capsule to survive Manhigh existed prior to the creation of NASA and helped pave the way for human space exploration Stratonauts Manfred "Dutch" von Ehrenfried, 2013-12-13 Just what does it take to be a stratonaut soaring to higher and higher altitudes of Earth's atmosphere Brave men and women have reached extreme heights in balloons aircraft and rocket ships over the past two centuries from the first untethered balloon flight to the first flights in the newly defined stratosphere through to the present flights that continue to set new records This book defines the altitudes related to the stratosphere how it changes with latitude and the effects on ascending aviators Also described is how over time technology enabled aircraft and balloons to achieve higher altitudes The book shows the clear influence of the military on designs that initially focused on speed and maneuverability but only later on reaching new altitudes The early flights into the troposphere and eventually the mid to upper reaches of the stratosphere are chronicled with great emphasis on flight operations This includes decompression bailouts inertia coupling ejections catastrophic disintegration crashes and deaths Although the book highlights major altitude attempts and records it also focuses on the life threatening problems confronting the would be stratonaut and the causes of many of their deaths In doing so it tries to define just what it takes to be a stratonaut
